

**LEVEL GREEN**  
Dear SIGNAL, I rode in home Saturday p. m. Found that a big change had been wrought in old nature since I have been absent—The corn, the grass, oats, needs, the flowers—all have undergone wonderful changes. What wonders two weeks can work under favorable circumstances of sun and showers. E. on Hetsy looks better, prettier than when I left. My bee hives are infallible bloom, and will produce an abundant crop, no doubt of the time. We find also, fine young cattle, mules and horses scattered here and there over the country.

No much regularity seems to prevail among the farmers, some are plowing corn the 2nd time, so late as 18th, others replanting and a very few others with a little to plant yet. The potato crop looks well and bugs are less troublesome than usual. A little partridge gun puffed on them in powdered form when dew is on, or mix with a little water and sprinkled on will do them up nicely, and if you farmer would try this the pest would soon be exterminated.

Why will the teachers of the county, and other educated citizens ignore the editor's proposition to give a column for Questions and Answers on literary matters? This certainly would be both amusive and profitable.—W. A. B. Davis, why are the days longer on the 60th parallel N. Lat. than they are on 40th deg. N. Lat. in the summer? Now we should not get up an undue rivalry between certain individuals, but let us fire up promiscuously and hit where it is not expected. This will cause us to investigate if we are at a loss on the matter.

An interesting Sunday school has been organized and is running smoothly at the new school house. Reuben Hurley seems to be at the helm, but many others assist him in the work.

"The Church of Christ," at Friendship, established a "Bible reading" I am informed; this too is only another name for Sunday-school. Popular Grove also has a flourishing S. S. These institutions should be kept up the year round, and could be easily done with just a little church effort from a few of the old church members. If we could learn fully Christ's admonition to Martha:—"But one thing is necessary and Mary hath chosen that better part,"—and put it into practice what a different world this would be. The Bible is found in almost every house in Rockcastle, but it is read less and more poorly understood than any other book in our library, yet it points the way from earth to that Eternal Home.

Married on last Sunday the 5th, Wade Graves and Alice McKinney. On Wednesday the 8th, Charley Hiddle in Fleeter Thompson, there have been others married and given in marriage, we understand. Such was the case in Noah's day. Aid sick will continue to be while men are men and women air women.

**W. B. Brown** returned Sunday from a visit to Science Hill, a very sick man but is now better.

Very Truly,  
BUCK VARNON.

**LAND, STOCK AND CROP**

**FOR SALES**—A good mare mule, 16 hands high, 7 years old and in very good condition. Also a mare at a bargain. **HOUK & ADAMS,** Mt. Vernon, Ky.

**STRAYED**—A white boar hog, weight about 75 pounds, has been at my house since February 1st. Owner can have same by paying all damages and cost of publishing this article.

W. A. COFFEY.

This is quite a critical time in the cattle situation, for conditions are such that they will surely show whether there are many cattle available or not. Recent developments would lead one to believe that the supply was small, for advancing prices have failed as yet to cause much to market. Even buyers are built-in to their talk and expect to have to pay \$6.50 before the first of July. Another week or two will surely demonstrate the volume of the supply and the temper of the feeder. There is no doubt but what this advance would have come sooner had there been less haste in getting cattle to market two or three months ago.

**A STRONG HEART**

is assured by perfect digestion. Indigestion weakens the stomach and cuffs it up against the heart. This causes shortness of breath, palpitation of the heart and general weakness. Kodol Dyspepsia Cure cures indigestion, relieves the stomach, takes the strain off the heart and restores it to full performance. It relieves naturally. Kodol increases the strength, by enabling the stomach and digestive organs to digest, assimilate and appropriate to the blood and tissues all of the food nutrients. Tones the stomach and digestive organs. Sold by Chas. C. Davis, the druggist.

**Legal Burial**—As there is a law against burying in the city of Albany, the Episcopal Bishop had to have a special act of the Legislature to be buried in the Cathedral. He was successful in having the law passed by the legislature, but his friends were astounded and worried when they read the text. It began with the usual verbiage: "The ending was something like this: 'We do grant that Bishop Doan be buried within the precincts of the Cathedral of Albany. This act to take effect immediately.'

**MANAGER WANTED**

Trustworthy lady or gentleman to manage business in this county and adjoining territory for well and favorably known house of solid financial standing. \$30.00 straight cash salary and expenses paid each Monday by check direct from headquarters. Expense money advanced. Position permanent. Address Manager, 810, Como Block Chicago, Ill.

**QUALITY**

Mrs. Cy Owens is very sick at this time.

Miss Lillie McBee spent last week in Palukki with relatives.

M.C. Dowell has returned home from the South and is now in 186 mountains of Kentucky.

Sam Tood, (the little grandson of W. Miller, still remains in a critical condition—not expected to recover.

Mr. T. C. Hamm is the home catcher of this section, having already caught 17 this season. "This is a benefit to the community."

John Stringer is better at this time—almost ready for work again, we are glad to say—as he is great try missed in the shop when not able to work.

A singing school will begin at Poplar Grove next Saturday, with the Rev. James Cummins as teacher. It will only be of Saturday's and Sunday's.

We'll, we hope that Buck Varnon's health will be greatly improved at Somerset, and especially do we hope that he will be able to attend the convention on June 25.

E. A. Herrin has returned from Jellico.—Ed Gentry and Dave Herrin went off in the picture business a few days ago, but we don't know whether either of them has returned or not.

Dr. Proctor, Sim Drown and Wade Proctor composed a fishing party to Black creek, but never returned with any fish. We suppose they left them on the banks of that famous stream.

The farmers are getting very fed behind on account of the wet weather. But they should be patient—as the rain will likely do more good than the work. People should learn to take the weather as it comes without murmuring or complaining.

Quite an interesting Sunday school is being carried on at Providence and the people should certainly hold it up. Sunday schools should be carried on in every community and each and every person ought to be interested in them. They lead the young and rising generation on to a higher plane of morality and christianity.

Seems to us like if the teachers of this county fare going to ask and answer questions through our paper, that more of them should get interested. That could be made a very interesting column if the teachers would only try, and we certainly think they should try, as they have given them the space. Let all join in with the Level Green and Crab Orchard correspondents and make this a success. We will be in time next week.

**DRIVEN TO DESPERATION**

Living at an abut of the way place, remote from civilization, a family is often driven to desperation in case of accident, resulting in burns, cuts, wounds, etc. Lay in a supply of Bicklen's Arnica Salve. It's the best on earth. 25c. at all druggists.

### THE UNIVERSAL EXPOSITION

The Achievements of Individuals and Nations Faithfully Recorded in This Encyclopaedia of Society.

By FREDERICK A. V. SKIFF, Director of Exhibits, World's Fair.

"The wisdom of all ages is none too great for the world's work." In this single silent sentence, uttered in his famous address at Buffalo in September, 1901, President McKinley described the object and the result of expositions.

A universal exposition is a collection of the wisdom and achievements of the world, for the inspection of the world, for the study of its errors, by which they may be compared and detected and development plans for the study of its progress. Such a universal exposition will be called an encyclopaedia of society. It constitutes a classified, compact, indexed nonperishable record of the achievements and ideas of society in all phases of its activity, existing in the most material as well as in the most spiritual. It offers illustrations covering the progress of the world as a whole from the production of the shoes on our feet and the payment beneath the wheel of the penny, to the most and most delicate creations of the brain and hands of man in what are called the fine arts of civilization.

The Universal Exposition of St. Louis in 1904 will be a social encyclopedia in the most complete and accurate sense. It will give to the world in revised and complete form the progress of the human mind in industrial development, at which mankind is ever striving. It will provide a new starting point from which all men may direct future exertions. It will be the starting point for the specialist in all lines of industrial and social endeavor and for the student of the history of the human race, who will find in the record of the past what the future has and what the future will do. It will be the most accurate and complete record of the achievements of society, these trophies of civilization, in a highly selected, accurately classified form.

The creators of the St. Louis Exposition have had the experience of all previous great expositions, which to plan and effect its high organization. The continuous and repeated burden of the necessity of preparing and sending out all its exhibitions has been more than a heavy, more a crushing, task. The classification of the St. Louis Exposition has been prepared by the St. Louis Exposition Commission, and it is so complete that it has marked the progress of human civilization since the beginning of the world, and it has been the most highly organized exposition the world has yet seen.

The St. Louis Exposition is divided into 10 departments, 144 groups and 307 classes. These grand departments, in their order will record the progress of the human race as it has been accomplished at this time with its facilities, industry and skill and the natural resources of the earth and the environment in which he has been placed.

At the head of the Exposition classification, has been placed Education, through which man enters socially into the progress of his culture and development. General Arts and Applied Sciences are placed next, to indicate the result of his education and culture. Illustrative of his scientific attainment and artistic expression. These three departments equip man for the battle and prepare him for the enjoyment of life.

The raw material departments, Agriculture, Horticulture, Mining and Forestry, show how man conserves the forces of nature to his use. The manufacture of manufactures will show what he has done with these; the departments of machinery the tools he has used. The Department of Transportation will show how he overcomes distances and becomes access to all parts of the world. The Department of Electricity will indicate the great forces he has discovered and utilized to counter power and intelligence. And so through the several departments to Anthropology, in which man studies man and to Social Economy, which will illustrate the development of the human race, how it has advanced the activities of civilization and saved progress in which society is involved.

Last in placed pharmacy, which shows how man has progressed in the treatment of his ailments and in the use of his intellectual and manual capacities to produce a social and permanent cure for his ailments.

Education, which forms the foundation of the human mind, is the basis of all progress. The progress of the world's history and development will be recorded in the Department of History, Geography and Chronology. It will show the progress of the human race, from the time of the first man to the present day.

AND we still continue to Lead with LOW PRICES:

20 per cent. Cut on all Shoes.

20 per cent. Cut on all Hats.

ALL CLOTHING at Manufacturer's Cost.

Best Flour per Sack, 75 cents

ALL kinds best STAPLE and FANCY GROCERIES at Rock Bottom Prices. Don't fail to make our store headquarters, when in Livingston, and get our prices before going elsewhere.

Yours, for bargains,

**L. H. DAVIS,**  
Livingston, Ky.

**NEWS ITEMS**  
There are persistent rumors that another great battle is in progress near Fort Arthur.

Curtis Lett, under life sentence of killing James B. Marston, was taken to the penitentiary Saturday and cost but a little over eight cents a day to maintain the inmates of the Home of the Aged and infirm.

Two thousand New York street sweepers who are afflicted with tuberculosis will be sent to the Adirondacks.

The Rev. Dr. John Gardner Murray has declined to accept the bishopric of the Episcopal diocese of Kentucky.

President Brown, of the American Humane Society, telegraphed a protest to the Governor of Missouri against a projected bill fight at St. Louis.

The anniversary of the birth of Jefferson Davis was generally observed throughout the South Friday, as Memorial Day by the Confederate veterans.

The Government estimate of the total area planted in cotton in the United States this season is 31,730,371 acres, an increase of 2,829,016 acres over last year.

Assurance has been given by the Louisville commercial organizations that stop-over privileges at Louisville will be granted on tickets to the Louisiana Purchase Exposition.

Ten men were killed by an explosion which destroyed the Corning distillery at Peoria, Ill. Thirty thousand barrels of spirits were destroyed and 3,000 cattle were burned to death. The loss is estimated at \$2,000,000.

The grand jury will reconvene at Bedford, Ind., July 11 to continue the investigation of the Schaefer murder. The belief now is that the woman was murdered because she had knowledge of some thing they would incriminate a person of prominence if divulged.

Agry because of their failure to sign a bill fight which was stopped by the legal authorities, the 3,300 members at the arena near the hotel at Peoria, Ill., started a riot and burned the arena to the ground.

**HOT ONE**  
The Rev. J. H. McElrath, one of the best known Presbyterian ministers in Dublin, where he is known as "The Angel of the Slaves," and who has just returned to Europe after raising a goodly sum here for his slim missions, is not only an earnest worker, but a good stock seller as well.

"I must tell you a good one about a famous sporting person in the old country," he said to a congenial company recently. "This old fellow was very fond of a good snipe and made it his secret of his life. He was standing outside of a church one day in which a conference was very held, and while talking to a very straight-haired brother parson he pulled a line weed from his pocket, and as he was about to light it, turned to the severe one and remarked:

"'Pardon me, but will you have a cigar?'"

"I will not," was the not very gracious reply. "I neither smoke myself nor do I encourage it in others."

"You don't smoke?" replied the freen, sitting up the frowning-one.

"'H'm, do you eat hay?'"

"'I do not eat hay,'" replied the other.

"Well, then, all I have to say," remarked the smoker, as he turned away, "is that you are a fit companion for neither man nor beast!"

—New York Times.

**STARTLING EVIDENCE**  
Fresh testimony in great quantity is constantly coming in, declaring Dr. King's New Discovery for consumption, coughs and colds, to be unequalled. A recent expression from T. J. McFarland, Bentonsville, Va., serves as example. He writes: "I had bronchitis for three years and doctored all the time without being benefited. Then I began taking Dr. King's New Discovery and a few bottles wholly cured me." Equally effective in curing all lung and throat troubles, consumption, pneumonia and grip. Guaranteed by all druggists. Trial bottles free, regular sizes 50c. and \$1.00.

A Western editor has been elected to a new position and is now able to argue the attention of his readers.

**HIS MEANS KNOWLEDGE**  
"I suppose that picture is one of your choice works of art?"

"I don't know the value of it," answered Mr. Cornix. "You see, indeed, and the girl have ideas of their own and they won't let me keep the price tag on it."

**CASTORIA**

**The "Good Old Summer Time" Will Come**  
—AND YOU MUST HAVE—  
**Summer Clothing**
