RING OF LOW PRICES

BROODHEAD. J. H. Jarrett Declares For Good Roads.

Mr. J. H. Jarrett, who is in Louisville shopping this week for his wife, is visiting his sister, Mrs. Joshua Mann, of Danville. Albert Hiatt, of Louisville, is spending a few days with home folks. Miss Maud Frith has left for her home at Leitch Green after spending a few days with friends in this city. Miss U. H. Hutcheson, of Owensboro, Ky., and Miss Alma McAfee, of Harrodsburg, Ky., are two charming visitors at Mr. and Mrs. J. W. Hutcheson's. All who attended the party of Miss Dora Dickerson's last Monday night report a very enjoyable time. H. H. Hutcheson, of Kirksville, spent last Sunday in Broodhead.

We are glad to say that Dr. Ben ton is to be among us again after he has been laid up most all winter with rheumatism. Miss Anna Hemenway has returned to her home at Crab Orchard after spending a few days with Mrs. L. C. Smith. Robert G. Wilmott, of Habersham, Tenn., spent last Sunday and Monday with home folks. Miss Carrie Frith, of Gum Sulphur, is visiting her uncle, J. G. Frith, of Owensboro, and Miss Leila DeBor, aged 16, were married last Sunday at Mrs. Roberts in this city. Best wishes for you and yours "K. K." The Democrats in convention met here last Saturday and morning. Jas. I. Hamilton for Congress, W. H. Benton of Livingston, was down Tuesday night calling on the our fair sex. Jno. Robins and Barbee McAfee attend at Mair's lodge at Crab Orchard Wednesday night. W. B. Burk, Jr., is in Point Lick this week on business. Walter Miller spent last Sunday with home folks. The stockholders of the Fair Association met last night in their office for the purpose of electing officers and auditing upon dates as to when the fair will be held. All stockholders are requested to be present. Mrs. J. M. Clark is on the sick list.

DEATHS FROM APPENDICITIS

decrease in the mortality rate in the case of Dr. Knebe's New Die Pills in creases. They save you from danger and pain, and restore the strength and vigor always follow their use. Guaranteed by all druggists. 25c. Try them.

MARETTBURG.

Mrs. J. J. McCall is with her husband in Eliz. Patch this week. Mr. S. H. Martin, and family of Mt. Vernon, spent Sunday last with Mr. and Mrs. L. E. Hays.

Miss Sallie Gentry of Broodhead, is visiting her mother, Mrs. J. Lee Hooper, in Marettburg Saturday evening in honor of her guests, Messrs. Maudie Martin and Mary Hooper. Mr. Hooper reports a nice time.

Mr. J. S. Griffin visited relatives at Leitch Green last week. Miss Juddie McCall returned home from Italy Hatch accompanied by her sister, Mrs. Grace, and little friend Mirtle Nicholson. Rosece Griffin and Bud Purcell made a diving trip to Livingston last week. Don't forget the supper at our church Saturday night May 12th. Come every one. Come girls and bring your partners. Come boys and bring your partners. Everybody is invited. Come!

SCIATICA DOUBLED AFTER TWENTY

YE SUFFER TOGETHER. For more than thirty years Mr. J. B. Massey, 1522 Clinton street, Minneapolis, Minn., was tortured by sciatica. The pain and suffering which he endured during this time is beyond comprehension. Nothing gave him any permanent relief until he used Chamberlain's Pain Balm. The application of that liniment relieved the pain and made sleep and rest possible, and less than one hour had effected a permanent cure. Mr. Massey relates his experience for the benefit of others who are similarly afflicted. If tried with sciatica or rheumatism, they not try a 25 cent bottle of Pain Balm and see for yourself how quickly it relieves the pain. Sold by Chas. C. Davis leading druggist.

FOLEY'S HONEY AND TAR

Broodhead, Ky., May 9, 1906. Editor Signal--

I will give you my views on the county road business. We want good roads can't live but only exist without them. I am for hoods or levs or any old way to get good roads. There should be a competent man in each precinct that knows how to build roads and knows what should be done for a days work and never stop work until roads and bridges are all up.

Our present system will never give satisfactory results. Once the roads are put up with proper grades, then expenses are done. It is too late to live in a country where you at best can't make half time and take half of a load and a good portion of the late winter and early spring can hardly get along on horseback or with an empty wagon. Yours for good roads.

J. H. JARRETT.

QUAIL

John Cress, of Preachersville was in this part first of the week on business. Broughton & Burk have moved their saw mill near Jacob Elder's. Mr. H. C. Broughton is improving. Rev. R. E. Todd filled his regular appointment at Besie Saturday and Sunday. Dr. E. E. Proctor will soon have his new store house completed. Rev. John Todd of Sevier, passed through Friday last en route to Buckeye church to fill his appointment. Sheep shearing is the order of the day at this place. All that want their sheep sheared call on Mr. David Proctor, Nailer. Tomey, a young hustling farmer, says he wants to be a stock raiser and uses technicals. Make your fertilizer last two years. Just pull up the old straw and crop your corn in the old hill and those you save breaking laying off and the extra fertilizer.

George W. Clapper, a survivor of the Sultana disaster of the Great War, died at Jaysville from injuries received by being struck by a train.

Col. Frank Powell a famous Indian scout, known as "Fighting Fever," died suddenly on a hill road train near El Paso, Tex.

POSTMASTER ROBBED

W. W. Kates, Postmaster at Riverport, Ia., writes last this week and was robbed of all comfort, according to his letter which says "For 25 years I had chronic liver complaint, which led to such a severe case of jaundice that my finger nails turned yellow; and when my doctor prescribed Electric Bitters which cured me and have kept me well for eleven years." Sure cure for Biliousness, Neuralgia, Weakness and all Stomach, Liver, Kidney and Bladder derangements. A wonderful Tonic. At all druggists, 50 cents.

In the United States Court in Chicago the jurisdiction of the Fayette County Court, over the assets of the American Reserve Bond Company, was denied by Judge Coker, with the appointment of the Federal receiver confirmed.

Miss Alberta Frank, of Stringtown, Ky., attempted to commit suicide in Denver by shooting herself. An unsteady hand caused the bullet to miss her heart and was clear of the larger arteries. She will recover.

Subcommittees representing the anthracite miners and mine operators met in New York Tuesday and signed an agreement to continue the work of the Strike Commission for another three years. The miners will return to work as soon as practicable, probably next Monday.

At a conference held by Senator McCreary and Brig. Gen. McKenney, the latter gave out a statement that of the 14 locks required on the Kentucky river, beginning at the Ohio, ten had been completed, and that the remainder would be finished as early as practicable. The work on the Big Sandy river was reported satisfactory.

HOGWALLOW HAPPENINGS

Several bridges were washed out of Gilet creek by the ice last week, and many people are waiting to get across. These bridges are now located on Gander creek, and all who desire to use them should turn off at the forks of the road just after the side of the stream. There is some talk of getting the water out of Gilet creek. If this was done the creek would be much longer and the fish could travel up and down with greater convenience. As the stream now stands it is so crooked that it takes the water several days to travel from its source to the end. Roz Barlow is not able to do about this week on account of hav-

ing a cold in his throat, and in an effort to blow it out.

The post-office tampered over in the building Thursday morning. It was in place 42 in as soon as the mail arrives the last of the coming week.

Smith will begin to-morrow on the judgment of his moonlight house. This has been needed for some time as a dance will be given there in a few days.

It has been discovered that so many of the Hog Ford congregation in the back end of the church that an addition will have to be built in that end.

It is thought that a destruction of several months. The trap is not only large enough, but a section in the last crop has already been noticed around Hog Ford. In fact the people clean up as Bonning Billows are feeling the effects. Only one fox at this time is caught but Friday is present at all hours to turn it out so the best one can come in.

A large number of friends guests were present and all enjoyed themselves very much. Mr. and Mrs. G. D. Cook arrived at their home at Hamilton on Monday.

BROWN'S SHOO. BE KEEPING. Since many people are more interested in bee profits than bee habits, it might be well as we have said a good deal about hive life, to give attention to the practical art of bee-keeping. In order that every thing said may be true, we shall quote directly from the best bee authority in the country, namely from specialists. First we shall learn where bees can be kept: what use they are to cross, and how stings may be avoided in the handling of the honeybee.

"It may be safely said that any place where farming, gardening or fruit raising can be successfully followed is adapted to the probable keeping of bees in a limited way at least if not extensively. Many of the localities with particularly favorable conditions in this respect are within the borders of the United States and of good locations for the apiculturists-forts, prairie, swamp, and mountain regions-where agriculture has not yet gained a foothold, either because of remoteness from markets or of the unimpaired character of soil and climate. The value of bees in the pollination of various fruit and seed crops is often the best reason to warrant the keeping of a small apiary, even if circumstances do not favor its management in such a manner as to secure the largest possible crops of either, or to insure the sav-

ing, in swarms. The quality and quantity of many varieties of apples, plums, pears, and small fruits depend absolutely on the amount of cross-pollination. The most active agents in this work are honey bees. Any person with fairly steady nerves and some patience and courage can easily learn to control them to a few exceptions. It is a few exceptions that are particularly susceptible to the poison injected by the bees, so much so that serious effects follow a single sting. Such cases are, however, very rare. In most instances where care is not taken to avoid all stings, the system gradually becomes accustomed to the poison so that beyond momentary pain a sting causes no inconvenience. To a certain extent the belief exists that bees have, without apparent cause, a violent dislike for some people, while others without any cause are received into their favor. The latter part of this proposition has a better foundation than the first part, for it is the actions, rather than any peculiarity of the individual himself, that angers the bees.

Bees prefer of course not to be disturbed, and this is especially true in the long hot days of summer. When visitors approach they, however, these guards are apt to fly towards them as if to inquire whether harm is intended or not, and should the visitor not inspire them with fear by using smoke or other similar means but shake about in their consciousness he will be very likely to arouse their suspicions still further, or endeavor to judge their approach. Judged, and not accustomed to the notes of bees, they fly unconsciously to do so. The head about when a worker does so, means that she is about to do some uncomfortable close work, such as to touch or to sting. The bees are not so much afraid of the human hand as they are of the human foot, and it is not the touch of the foot, but the sound of the foot, that angers them. The sound of the foot, when it is about to step on a bee, is much more alarming to the bee than the touch of the foot. The sound of the foot, when it is about to step on a bee, is much more alarming to the bee than the touch of the foot.

At a meeting of the State Normal School Commission, held at Louisville Monday, the cities of Richmond and Bowling Green were selected as the sites for the two normal schools provided for in the last Legislature. The decision was unanimous and schools will be established as soon as practicable. The collections in the Eighth District Internal Revenue office for the month of April are reported by Collector Cooper as follows: List \$818.37; beer, \$180.00; spirits, \$297.74; cigars, \$37.50; case, \$518.18; tobacco, \$239.10; specials, \$148.91. Total, \$2,107.65. These figures show an increase from the receipts of the previous month of \$72,669.59 and a gain over the corresponding month last year of \$28,421.75.

At a meeting of the State Normal School Commission, held at Louisville Monday, the cities of Richmond and Bowling Green were selected as the sites for the two normal schools provided for in the last Legislature. The decision was unanimous and schools will be established as soon as practicable. The collections in the Eighth District Internal Revenue office for the month of April are reported by Collector Cooper as follows: List \$818.37; beer, \$180.00; spirits, \$297.74; cigars, \$37.50; case, \$518.18; tobacco, \$239.10; specials, \$148.91. Total, \$2,107.65. These figures show an increase from the receipts of the previous month of \$72,669.59 and a gain over the corresponding month last year of \$28,421.75.

SUCCESSFUL SCULPTRESS.

Miss Evelyn Longman of Chicago Awarded Fifteen Thousand Dollar Prize.

To Carve Bronze Doors at Annapolis Naval Academy—Has Attained Fame Through Her Figure of "Victory" at St. Louis Fair.

When the new bronze entrance doors of the Annapolis Naval Academy are completed and hung in place there will exist another monument to the skill of American women. Colonel Robert M. Thompson, who presented these doors to the academy as a memorial of the class of '68, stipulated in making the offer that the design selected for the doors should be awarded by competition, the winner to receive a prize of \$15,000. There were thirty-three competitors for this prize, an unusually large number, and the designs submitted are said to have been of a high degree of excellence. The votes of all five jurors were cast for the model presented by Miss Evelyn B. Longman, of Chicago.

Tatt. She is rather proud of the fact that she has never studied abroad, and also that she has been able to make all the expenses of her artistic education herself.

Sculptress Is Rather Famous.
The best known work of Miss Longman is the bronze figure of "Victory" which was carved for the Festival of the St. Louis World's Fair. For this she was awarded a silver medal. At the close of the fair the original was brought to the Chicago Art Institute. A bronze reproduction has been purchased by the Union League Club and will adorn the entrance to the club rooms.

Another one of Miss Longman's works which has won commendation is a bronze figure of "Death," which she recently completed, and which is to be placed as a Story monument in the cemetery at Lowell, Mass.

WOMAN CIVIL ENGINEER.
Granddaughter of Mrs. Stanton Hatfield Offer to Go to China.

Miss Nora Stanton Hatfield, granddaughter of Mrs. Elizabeth Gady Stanton, is now a member of the American Society of Civil Engineers. She is the first woman admitted to membership in that body. It is said, there was not a dissenting

opinion expressed when she was proposed for membership.
Miss Hatfield was the first woman to receive a degree in civil engineering at Cornell University. She took a four years' course, and has become the first of the class. Since her graduation she has been draughtsman in a big bridge concern. She is now considering an offer from

No Connection With Vesuvius.
Coming as the disaster did, practically coincident with the Vesuvian campaign, it is frequently supposed that there was a direct relation between the two. The idea, however, is rejected by the geological survey.

Dr. Walcott holds that there is no connection of a connection between the Vesuvian eruption and the Italian volcano, for these two are entirely different. Scientific phenomena responsible for such earthquakes and volcanic disturbances.

Great earthquakes, says Mr. Walcott,

are never caused by volcanoes, but by faulting planes. This is particularly true of both seaboard and inland States. Mr. Walcott and other scientists of the Geological and Geographical Survey, during the earthquake which demolished Charleston, S. C., on August 31, 1886. Volcanoes occasionally cause shaking of the earth's crust, but the disturbances occasioned by pent-up gases seeking to escape are felt only locally.

The cause generally attributed to earthquakes is the gradual cooling of the earth, which is known by millions of miles inside. When any object cools it contracts, and so will the earth's crust. The contraction will not, however, uniformly contract, and a disturbance

SAN FRANCISCAN HORROR.

Terrible Destruction of the City by Violent Earthquake and Flood.

Fire Results in All Parts of Metropolitan Area—Geological Scientists Say No Connection Between Quake and Vesuvius Eruption.

It was during the repose of early morning; the Spring-time sun was casting its golden rays over the Sierra Nevada and striking down into the peaceful, slumbering valleys of the Sacramento. All the Western Hemisphere was at peace with the elements. Suddenly there came an awful growling and crashing beneath the very feet of the people. A shock of such magnitude that it required to describe the event, falling walls and fire combined to work on the metropolis of the Pacific the most appalling natural calamity which has occurred on this continent since the landing of the Pilgrims. The destruction that has been accomplished is almost incalculable. The towers of houses which burst forth simultaneously in various parts of the city were rendered still more terrible by the repeated quakes of the earth, by which the rescuers were in momentary danger of being buried with the dead beneath the falling structures. The very earth itself—our own mother earth—proved as treacherous as a deadly snake, and the usual ocean breeze, by a strange perversion of nature, hauled around to a point where it fanned the flames to intensity and became a deadly agent of destruction. The general dismay of the population was augmented by the constant rattle of dynamite explosions, made in a vain effort to check the progress of the flames. The vast wall of smoke that blotted out the sky did not tend to allay the general anxiety. Yet, in such surroundings, calculations of human suffering were impossible. The scene was one of universal panic and madness, there were performed numberless feats of heroism that will remain on the hearts of those as illustrious proofs of the nobility which hides beneath the garb of ordinary life. Cool heads, steady hands, with stout hearts behind them, performed their work with a courage that will remain on the hearts of those as illustrious proofs of the nobility which hides beneath the garb of ordinary life.

San Francisco, a rich and proud city, has been ravaged by fire and earthquake. The destruction is almost incalculable. The towers of houses which burst forth simultaneously in various parts of the city were rendered still more terrible by the repeated quakes of the earth, by which the rescuers were in momentary danger of being buried with the dead beneath the falling structures.

LAYING CORNERSTONE.

Impressive Ceremony Incident to Construction of New Capitol Buildings.

President Roosevelt and Speaker Cannon, Both Masons, Are Principal Actors—\$10,000,000 for Senate and House.

When President Roosevelt, on April 14th, laid the cornerstone of the new office building for the House of Representatives, it marked the beginning of improvements on Capitol Hill which will make that section of Washington comparable with the ancient Rome of Rome and Greece crowded with magnificent buildings in which met the solons of ages past.

President Roosevelt and Speaker Cannon, Both Masons, Are Principal Actors—\$10,000,000 for Senate and House.

The House annex was started first and is in a more advanced stage of construction than the Senate building, though the cornerstone of the latter may be ready to put in place next Fall.

THE SECRETARY OF THE ARCHITECTS.

What is known to modern dentists as bridge work was familiar to the Egyptians as extant specimens attest. According to an interesting article in the British Medical Journal, plaster casts, noses and lips were common among the Indians where the cutting out of these features was a punishment much in use, and Greek and Roman veterinarians had for a fix or an arm in wax tried to make good the deficiency by artificial substitutes. It is

THE CAPITOL PLAZA AS IT WILL APPEAR WHEN NEW BUILDINGS ARE COMPLETED.

It is estimated that the two buildings together will involve an outlay of about ten million dollars. In size and design they are identical; they occupy positions balanced in their relation to the main body, and are planned to fit into a general architectural scheme. The height of the buildings has been restricted that they may not overpower the Capitol, and they have been kept simple in design, without pediments, domes, or other architectural points.

from the effect of the Capitol itself. The exterior design for the buildings is classical, suggesting in its general division of parts the *Grande Meuble* in the Place de la Concorde, Paris, while the pavilions are modeled on those of the Colonnade de Louvre. Architecturally the front is divided into two parts, the lower corresponding to the first story of the building constituting a "truncated" base, on which, extending through the second and third stories, is the colonnade, surrounded by its entablature and balustrade. It is believed that the effect of the two flanking buildings will be to give unity to the whole scheme and to emphasize architecturally the great beauty of the Capitol, all of the lines leading up to and centering in its dome.

Work Progressing Rapidly.

Although the digging of the trenches for the House office building has been less than a year ago, the structure has now been put up to the first floor line. To carry the work, Elliott Woods, Superintendent of the Capitol, directed that excavation begin before all the specifications and contracts were completed. This was done through letting out the stone contract first, by authority of the House Building Commission. It is calculated that both buildings will be ready for the Sixtieth Congress.

In accordance with Masonic traditions, the ceremony was conducted in the open air, in a simple, unostentatious manner. In every detail it corresponded as nearly as practicable with the historic ceremony in which President Washington participated. The articles placed in the cornerstone were arranged in chambers, the names of those deposited in the original Capitol stone by Federal Lodge, and, as both President Roosevelt and Speaker Cannon are members of the Masonic order, the occasion in every way harmonized with the traditions of the ceremony directed by the Virginia jurisdiction in laying the cornerstone of the Capitol.

Let this "1900" Gravity Washing Machine do your Washing Free.

An answer, please, to the question, "How can I wash my clothes for nothing?" By installing this machine in your home, you can wash your clothes for nothing. The machine does the washing for you. It is a simple, efficient, and economical machine. It is a must for every household.

QUEEN OF FLOWERS.

Theme of the Poet and the Artist—The Rose.

GUY ELLIOTT MITCHELL.

Roses—queens of the American flower garden... The increasing tendency of people to patronize the rural sections, and the steadily increasing love for flowers...

It is astonishing what varied types of nature there are in this flower, and how world-wide is its distribution... Wild roses are found from frigid Lapland to tropic India.

While verandas and trellises of country homes may have their honeysuckles, and hills may bloom in abundance, nothing excels in beauty or fragrance the climbing roses when their gorgeous and glorious bloom.

Most Important Groups.

Roses of to-day are of complex lineage for old and new species have been crossed and re-crossed until now our cultivated roses are divided into more than thirty general groups.

For colder climates the hybrid perpetuals are a most valuable class, being generally hardier—and larger bloomers, though they do not bloom so

of great value to getting the finest blooms and the longest bud development... Good wood dirt is excellent. Fine, strong plants, set while entire-dormant, should give a satisfactory quantity of flowers the first summer.

While locusts have their own way of propagating roses, amateurs usually get a start of evergreening roses either from cuttings of the blooming wood, or from cuttings of mature wood rooted during winter while in a semi-dormant

The Fisher Bunion Protector is a neat, soft leather device that is worn over the stocking, inside a smaller shoe that you have been in the habit of wearing on your bunion-tortured foot.

It requires no buckling or strapping, it is self-adjusting, it will not slip or shift, it will not hollow immediately around the enlarged joint, and it will absolutely prevent the shoe from bulging, retaining perfect shape and correct lines.

Five and usually in large numbers. The eggs are laid in the soil, generally in the cracks or sandy land, they are not troublesome in heavy soil.

They are not troublesome in heavy soil, but the material discolors the foliage. In the early morning, when the bees are in the hives, you may see the bees picking off the honey.

How to Grow Cuttings. The greatest pleasure to be derived from roses is to have them for the first possible use.

The Golden Etouille de Lyon. Long as the roses. These have been obtained by crossing the French and Damask roses with the China rose.

The Old Fashioned Mary Washington Rose. are quite apt to throw out shoots from their own roots which are vigorous and soon overtake and run out the bud.

How to Kill the Aphid. This will be discovered on the tips of the branches and also upon the buds and at their stems.

Have Your Soil Rich. The soil can hardly be made too rich. Well composted manure should be worked down deep into the bottom of the bed or of the rows if they are not in better soil.

There are other caterpillars, the first of which are the green caterpillars that feed on the foliage and also upon the buds.
