Why We Favor The Bond Issue For Good Roads.

I favor the bond issue for good roads, because good roads are the up-building of any county or State, and without good roads we can never hope for our county to take the position, as compared with other counties of the State, which it ought to have.

I favor the bond issue for good roads, because I believe the building of good roads in our county will be of greater benefit to our county than anything that they could do.

From a purely business standpoint, I favor the issuing and selling of bonds to give good roads to Rockcastle county. First, because by the present generation of people paying a small interest each year we will be enabled to have both the money and business properties.

Second, because good roads will be doubled in value as soon as we have good roads. Third, by building these roads we give employment to our farmers and their teams, thereby keeping the money at home and giving us good roads, which will put our county in the rank to which it belongs.

There is a minister who appreciates the editor. At a recent editorial convention he offered the following toast: "To save an editor from starvation take his paper and pay for it promptly. To save him from bankruptcy, advertise in his paper liberally. To save him from despair, send him every item of news of which you can get hold. To save him from profanity write your correspondence on one side of the sheet and send it in as early as possible. To save him from mistakes, bury him. Dead people are the only ones who never make mistakes."

The Browns Memorial School opened here Monday with a good attendance. Several new teachers have been added and the school is better equipped than ever before. The case of the Taylor against the L. & N. R. Co. for the killing of his son, Tommy, was called Monday and occupied the entire time of the court this week. Attorneys C. G. DEAD: About 2 o'clock yesterday the spirit of Mrs. T. Fish took to the air and nobler by a drowning. Money is being raised among the people here by private subscription for the building of a pike across the old town hill. The proposed route starting at the residences of C. C. Williams and M. J. Miller on Main street and ending at the corporate limits. The pike will not follow the line of the old road but will follow in part a new right of way which will be donated by M. J. Miller and Fritz Krueser. At present this is one of the worst roads in the county and the worst one leading into town. Last winter for months, the road was so muddy that the wagons sank into the mud over the hubs of the wheels and it takes the road was absolutely impassible. Over this road all the coal is brought into town and in winter traveled more than any of the other roads leading into Mt. Vernon. The building of the pike will be rather expensive owing to the grade, but this sum is quickly being subscribed for by public spirited citizens of the town. The pike is in this place a necessity and all should give their aid. Messrs. Miller and Krueser have most generally donated land which was valuable, and all there are falling in line with the amount. If Mt. Vernon can get the head by building this bit of pike, the people of the county will soon realize that a pike is not a luxury but a necessity and for Rockcastle to ever be classed a successful and prosperous county pikes must be built throughout the whole of it.

Consumption of young mutton is enormous. It astounds trade veterans who remember the time when a run of twenty loads of lambs in a single day glutted the Chicago market, says the Breeder's Gazette. More lambs were slaughtered at Chicago last week than ever before in the history of the trade. Although a heavy run occurred and it carried few sheep killers without many hands of rangers without cut-back, not even giving feeder buyers an opportunity to bid. With southern lambs exhausted, natives scarce and the East depleted, the western breeders will get better net results out of their lamb crop this year than ever. When range lambs sell straight at \$7.50 prices may be said to be high. There is a constantly increasing demand for young mutton from the Atlantic seaboard and the West must meet it. A feature of the range lamb supply is its superlative quality. If it is fetching good prices the fact that the breeder has done his best is largely responsible. Idaho is now marketing a crop of lambs that was never even dreamed of ten years ago. Its quality is superb—Kentucky Advocate.
