### NEGLECTED COLDS

THREATEN LIFE.  
[FROM THE CHICAGO TRIBUNE]  
"Don't tinker with a cold," is good advice for prudent men and women. It may be vital in the case of a child. Proper food, good ventilation, and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary light cold will become severe if neglected, and a well established cold is to the germ of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold. Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted is to give Chamberlain's Cough Remedy. It is safe and sure. The great popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold never results in pneumonia when it is given. For sale by Chas. C. Davis.

**CHAMBERLAIN'S COUGH REMEDY.**  
Mrs. John Engelhardt, of Gera, Mich., tells of the anxious moments spent over her little two-year-old daughter who had taken a hard cold resulting in croup. She says: "I am satisfied that it had not been for Chamberlain's Cough Remedy she would have choked to death. I gave this medicine every ten minutes and she soon began to throw up the phlegm. I can recommend it in the highest terms as I have another child that was cured in the same way." Sold by Chas. C. Davis.

A mass meeting of the farmers of Henry county, in which both those who favor raising a crop this year and those opposed took part, was held at New Castle. J. Campbell Central spoke for the Barley Tobacco Society, urging the farmers not to raise a crop, while Judge Ben F. Hill took the other side of the question. That section 7 of the anti-trust law, awarding to the complainant three times the amount of damages sustained by a combination in restraint of interstate trade, can be revoked to prevent a boycott by organized labor, was held Monday in a decision by the Supreme Court of the United States in the case of *Lowe & Co.*, hat manufacturers of Danbury, Conn.

Just now is a good time to stick to your work-text. "Keep to your job and your job will keep you," said Old Ben Franklin, 150 years ago. This was never more true than today. Any man who leaves a job now will find it hard to get another. In New York 150,000 men are out of work, in Chicago nearly as many more, and there are 80,000 idle in Cincinnati. This distressing condition exists all over the country. The output in all manufactures has been out about one-third, and the total amount paid to operatives has been cut down in proportion. All extra men are being dropped. The "last man," the "slack man" and the "unlucky man" are all being laid aside. There were more jobs than men to fill them last June. There are more men than jobs today. If you have a job keep it and it will keep you. Drop it and you may not get another.

Dr. G. H. Albright, an uncle of the writer, underwent a very serious operation in Lexington Tuesday. The last report said he was doing fairly well. It will be remembered that six or seven years ago, Dr. Albright, who was returning from a visit to a patient about 12 o'clock at night, at his home in Harboursville happened by The National Bank of John A. Black, just as a band of robbers were trying to gain entrance; he was halted and with more than a half dozen revolvers pointed at him commanded to stand and when they finished their dastardly deed, was led inside of the vault and the door securely fastened, where he remained for more than six hours. When released, he was almost suffocated, as the vault was filled with smoke from "the explosion and the only fresh air he could receive was through a small hole burst in the vault door, by the explosion. With his mouth closed up to this little entrance he waited, for six hours, believing all the while that he would never be able to survive until time for the bank to open. As he often remarked afterward no one could realize the terrible ordeal through which he passed and as the result he has been almost a physical wreck ever since. The shock and the deep cold contracted is attributed as partly, if not wholly, the cause of his present serious condition. The present trouble was a mastoid abscess of the middle ear, the trouble reaching that stage, where the bone had become as a perfect honey comb and crumbled away, in which condition he could not have lived but a very short time. The operation which was performed by Dr. Stueckert of Lexington was successful, but Dr. Stueckert says that he can not speak very encouragingly of his condition as he fears other complications. If he can pass over tomorrow (Saturday) then there is some hope. Dr. Albright left Harboursville last spring and located at Lawrenceburg, where he was enjoying a splendid practice.

**GET RICH QUICK.**

Schemes of this class have again come to grief along with the gullible investors, causing serious loss to innocent business concerns, as is always the case of panics in Wall St.

While this last season is yet fresh in mind, it is an opportune moment to consider causes and means to avoid like trouble in the future.

Direct your attention to that greatest of all Newspapers, the Cincinnati Enquirer. From its columns one can readily detect the trend of currency, its lodging places, by whom handled, uses made of it, and final results.

Again you read quotations of Bonds, Stocks, and Securities of every nature, fixing Status of all business from the retailer, to United States Government.

Also Current News, facts and reliable data covering the entire world, all sufficiently explicit to enable thinking people to avoid snags and follow the channel of success.

Its extra size and high price is the secret of its ability to discover, obtain, print and serve its patrons with all the news, and cater to wants of people in every stage of life.

The Weekly Enquirer for the year 1908 has greatly increased its Clubbing offers, which now include the most select and popular publications of the day at prices slightly over half the regular Subscription rates.

Do not overlook the fact that the year 1908 promises to exceed in prosperity any of the past, and that the Enquirer printed at Cincinnati, Ohio, is one of the most reliable sources of information.

**VALUE OF NEWSPAPER TRAINING.**  
[THE EDITOR AND PUBLISHER.]

A few years' experience in newspaper work is now regarded as desirable part of a business man's equipment.

Newspaper training gives one a better insight into human nature than any other occupation. More than that, it furnishes him with a relation to those who are engaged in its pursuit, for it deals with almost every department of human knowledge.

The young man employed on any well established publication learns how to approach people, how to get the news under adverse circumstances, how to write tersely, intelligently and graphically about what he sees and hears, how to see important situations, and how to get at the bottom of things.

He learns that the only way to succeed is to hustle, and the best to promote his own interests, and those of the paper he represents, is to be honest and just in all that he does.

He is in touch with the throbbing life of the world. He interviews men who are making history. He listens to the wise utterances of the greatest teachers in science, in sociology, in art, in politics and in religion. He gets a broad view of life and learns his own limitations.

George E. Roberts in assuming the presidency of the Commercial National Bank of Chicago paid a deserving tribute to the work of the newspaper office as a training for financial responsibility when he said:

"I obtained my training in newspaper work. That is the best sort of training for any kind of work, in my mind. Newspaper work gives a man more adaptability, makes him a good judge of men, and gives him the power of thinking and acting quickly and accurately at a moment's notice, and on his own initiative. There is no better training school than a newspaper office for young men."

There has been many notable illustrations of Mr. Roberts' remarks. Frank A. Vanderbilt, vice president of the National City Bank of New York, the largest bank in the United States, was once a reporter and then financial editor of the Chicago Tribune.

In the literature of finance the leading authorities of the day, Horace White and D. D. East who have written books which are in almost all important libraries of the world, are men of active newspaper experience.

If a young man is to become a clergyman, a doctor, or a lawyer, he will find no better course of preparation than to be found in a newspaper office. Much has been said about the temptations of newspaper life. Perhaps they are more numerous than those in some other line of work. It is certainly no occupation for mollycoddlers or weaklings. Young men of ability and character need have no fear of the alleged demoralizing effect of journalism work. If they cannot go through the experiences they are bound to meet in the business and keep themselves straight, they do not have the right kind of stuff in them to make a success in an occupation.

**THE JUMPING OFF PLACE.**

"Consumption had me in its grasp, and I had almost reached the jumping off place when I was advised to try Dr. King's New Discovery, and I want to say right now, it saved my life. Improvement began with the first bottle, and after taking one or two bottles I was a well and happy man again."—Chas. George Moore of Gimmesland N. Y. As a remedy for coughs and colds and for people of weak, sore lungs and for prevention of consumption, New Discovery is a sure cure. Price \$1.00. At Chas. C. Davis' drug store. Trial bottle free.

A delegation of Tobacco men from Louisville arrived in Frankfort to protest against the passage of the McChord bill, which they say, will drive the warehouses and manufacturers out of Kentucky.

Everything taken into the stomach should be digested fully within a certain time. When you feel that your stomach is not in good order, that the food you have eaten is not being digested, that's a good, natural digester that will do the work the digestive juices are not doing. The best remedy known today for all stomach troubles is Kodol, which is guaranteed to give prompt relief. It is a natural digester. It digests what you eat, it is pleasant to take and is sold here by Chas. C. Davis.

**GAME AND FISH.**

Hon. R. D. Hunter, Representative in the General Assembly from Clark county, has introduced in the Lower House of the General Assembly, an act for the "preservation, propagation and protection of game and fish." This bill was introduced by J. O. Evans, Representative of the League of American Sportsmen in Kentucky.

The act provides for the creation of a State Game and Fish Commission of five members to be appointed by the Governor for a term of four years, who shall serve without compensation except necessary expenses when in actual service.

The office of the commission is to be kept in Frankfort and the duty of the commission shall be to enforce the laws of the State for the protection and propagation of game, animals, game and harmless birds, game and fish, with power to seize and dispose of all game birds, game animals and fish taken or killed in violation of the law, and all guns, seines, nets or other instrumentalities used in taking or killing game or fish contrary to law.

There is no more quiet or orderly rendezvous in all Kentucky's many old time hotels than is to be found at the House of the Castlers, The House of The Thousand Castlers. There in times past have been told and retold the thousand and one tales of these modern Arabian Knights. There around the stove will be found the characters, the real characters worth making, the new ones coming in too. These reflections are not intended in any sense as a boost for the "hot" or a knock for the "cool" hotels for drummers and high fivers. It is merely telling the difference in the impressions they make on the wayfarer. There are those who come here for "business" who doubtless feel a relief as they pull out of town for the place that makes them feel at home, home—for as man as at bottom a social animal he must find that place some place, or he is indeed an outcast and to be pitied.—E. X.
