Miss Ida May Adams is very much improved and expects to leave to-day for California with her brother Jack, to spend a month.

Rev. William Williams died at his home near Orlando this country last night at 7 o'clock after an illness lasting several weeks. Rev. Williams was one of the leading Baptist ministers in the country and a splendid good man. The burial will take place this afternoon at the family burying ground with masonic hon.

U. G. Baker Monday began cleaning off the lot on which his store room burned last July, and as fast as possible will push to completion a handsome two story brick building which will be long & wider and a much handsomer building than the former one. R. H. Casey, the contractor who built the Peoples Bank recently drew the plans which Mr. Baker will use.

George Rogers, the strong boy was at the Broadhead fair. He is 22 years of age, stands 35 inches high and weighs 75 pounds, but that 75 is all muscle. He can muscle 65 pounds in each hand, bends the iron bar between his teeth, in fact he knows his strength. When you have an opportunity to see George, don't fail to take advantage of the opportunity. You will enjoy seeing him and be surprised at his wonderful performances.

Miss Nina L. Skelton, who was here Monday with her two children Tess and Ted, is a native of Rockcastle county, a daughter of A. J. Fox. The family left here during the war and located in Missouri. Mrs. Skelton's husband was for a number of years, a valued employee of the Roberts, Johnson and Reed Shoe Co. of St. Louis. His death occurred three years since. The shoe company wishing to do something for the widow as well as advertise "Star Brand Shoes" conceived the idea of training two of the children aged nine and twelve and sending them over the country with their mother to give free entertainments at the houses that handle their goods. The particular children talk up the child's school shoes called Tess-Ted (tested). The children are now known by the name of Tess and Ted. They are bright, intelligent, full of life and two jolly kids can hardly be found anywhere. A large crowd gathered enjoying their novel entertainment consisting of songs, dancing and recitations in front of J. Fishes store here on Monday evening. The mother furnished music on piano. The kids took the town by storm and were in evidence everywhere preaching. They took in Broadhead fair Wednesday and left in the afternoon to fill a Louisville engagement.

Miss Lotta Carmical and Mr. Lellan McHargue were married Thursday at Pine Hill.

Mrs. Ada Fishback and daughters have returned from a visit to Standard and Moreland.

Supt. J. W. Kueker has moved to his farm near Hansford. He can be reached by phone or mail anytime.

John W. Brown in his younger days was a leading member in the order of Good Templars and was a power in this and other countries during the Murphy movement which was joined by hundreds of thousands in the United States as well as foreign countries. Mr. Brown and the then representative in the Legislature, M. J. Cook, were the responsible parties first put through the "five county act" making Rockcastle, Laurel, Knox, Bell and Clay prohibition counties.

All attraction centers about the town of Broadhead this week and should the stranger enter within our gates he would be convinced that the attraction was some where besides Mt. Vernon. Actually have not had enough people in town to start a racket and had it not been for the dog fight which took place yesterday afternoon in Cox Bros. store, resulting in the knocking down of the big stave, we hardly know what would have become of the few left in Mt. Vernon to pass away the lovely hours and keep guard over the old town.

BIG CONTRACTS. The W. J. Sparks Co., have recently been awarded the contract for ballast for the L. & N.'s double track from Paris to Cincinnati. This is the largest contract ever given the company and will take two years full work to complete it. It means steady employment for nearly every available man in the county and necessitate the putting in of another plant, which will be installed at Mullins Sta. Such an industry as the W. J. Sparks Co., means much to a county and our people should feel exceedingly thankful that we have such an enterprise in our midst.

Stanford, Ky. 2-11, 1917.

A meeting of the creditors of the above named, who has been adjudged Bankrupt, will be held at the office of the Referee Stanford, Ky., on the 21 day of Aug. 1917 at 9 o'clock a. m. to elect a Trustee for the estate of said Bankrupt, and for that transaction of other business as may come before the meeting. Comply with Sec 57 of the bankruptcy act concerning proof of claims, otherwise your claim can not be allowed.

J. N. Saunders, Referee in Bankruptcy.

The Presbyterians at Livingston are getting ready this week for special evangelistic meetings. A new roof has been put on the church this week, also a new platform and steps at the entrance of the church. The work is being pushed in order to have the building ready for Sunday. The meetings will begin on Sunday, Aug. 26th and will be held every night for a period of ten days. Rev. Jas. M. Walton of Louisville, a Rockcastle man and a strong and practical preacher, has been secured for these services and will preach each night next week, after Sunday. The singing during the meetings will be under the able direction of Miss Margaret McClary.

The pastor of the church, Rev. Geo. S. Watson will open the meeting Sunday night and will spend most of the week in Livingston.

The conference report on the wool tariff revision bill, carrying a duty of 29 per cent. on raw wools and corresponding reduced rates on wool manufactures, was adopted yesterday by the House, 206 to 102. The Senate is expected to agree to it to-day, thus putting the measure up to the President's rejected veto.

Race trouble is expected at Durant, Okla., where a negro was burned for killing a white woman. At Caddo, Okla., the negroes have been ordered to leave the country.

Members of the Centerville, Pa., are making diligent efforts to apprehend the leaders of the mob that took a negro from a hospital and burned him to death.

FOR FLETCHER'S CASTOR OIL.

There is nothing like lettuce.

Plant tomatoes four feet apart each way.

Don't forget to spray the grape vines.

The Homer pigeon is the best bird for squab raising.

Sometimes litter soils so filthy that it is worse than none.

Leave it to the old hen to pick out the best nest to lay in.

To improve live stock requires intelligence and thought.

Among all dwarf-growing trees the Japanese maples stand first.

If possible grow potatoes on clover sod; this saves buying fertilizers.

Oats is the standard grain for the healthy development of young animals.

In the fattening pen give the pigs all they will readily clean up but no more.

Many farmers use a bow of different breed of that of their sows to produce a cross.

Sound, healthy cows can only be had by good stabling, careful feeding and good water.

When the chicks can get away from it at will, plenty of heat under the hover is a good thing.

After the calf has learned to drink, a little fine hay should be tied up in the pen for the calf to nibble.

Almost all flower seeds germinate more quickly if soaked in warm water for a few hours before planting.

Do not plant trees with a bunch of spreading roots. Trim them off to within four or five inches of the root stock.

Don't forget to give the little ducks plenty of drinkable water, and after one week old they want it to swim in, too.

Horses that are clipped dry off fast at night. This is better than having them stand around in a heavy wet coat.

A once lively falth in the existence and possibilities of strains of hens which would produce 300 eggs a year has decayed.

At the end of five to eight days remove the call to a roomy, clean box with a wire or a clean dry bed of wheat or straw.

The feeding and management of the young calves should be in the hand of a competent hand and not left to the boys or careless help.

Many a man has been surprised at the extent of one loss of upward measure scattered about under a tree it gives new life and fruitfulness.

The only way to make a profit with poultry is to attend closely to bustiness and not let the management of the flock to three help.

Extreme care must be taken of the food by putting finely cut hay between the feet and by more eggs than the yield of dry matter being little removed.

The horse can be made to associate the food by putting finely cut hay between the feet and by more eggs than the yield of dry matter being little removed.

A light sandy soil will be rather benefited by working it when moist, as such soil has a tendency to make it more compact and consequently more retentive of moisture.

Rhubarb is easy cultivation, and when once planted, the ground kept clean, mellow and heavily manured, will furnish a generous supply of juicy stalks for eight to ten years without removal.

The horse can be made to associate the food by putting finely cut hay between the feet and by more eggs than the yield of dry matter being little removed.

A Virginia man writes that for years he has sown a small patch of buckwheat for his hens and he says he is quite certain that they thrive better and lay more eggs than they did without this grain.

Since the cost of growing an acre of roots is two or three times as great as that of growing an acre of corn, the yield of dry matter being little more, it seems poor farm practice to abandon the all-time favorite of roots.

Poor soil management means in the end complete or partial soil exhaustion, which is a condition of the soil in which it is deficient in human constant or food content, or moisture content or all three, and they usually go together.

Good soils are very essential if hope of the highest quality are to be grown and a uniformly profitable herd built up. Only sure-bet soils should be kept and these should be carefully selected to insure productivity, quality and soundness.

To beautify the complexion there is nothing better than the old-fashioned white cornmeal made into a paste with sour milk.

Buy it now. Now is the time to buy a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is almost certain to be needed before the summer is over. This remedy has no superior. For sale by Chas. C. Davis.

"Tess and Ted" the "Star Brand" Kids, Giving an Entertainment.

HELLO! Boys and Girls

We haven't forgotten about all you boys and girls, who came to see us at Mt. Vernon and the Broadhead Fair. We had a jolly good time, and do hope we can go back some day. Went we have a great time, though!

We're just wondering how many of you know the little verse about "Tess and Ted". Here it is; let's say it together again.

When "Tess and Ted" were little tots, They wore their shoes all winter spots, Until their mother finally said, "I'll buy some shoes for "Tess and Ted," So some good strong shoes, the kind that wear," So she went and bought two pair, They were "Tess-Ted."

When you need a pair of shoes, be sure you go to

and ask for a pair of "Tess and Ted" School shoes. Our name is stamped on the sole, and is also sewed inside of the shoes. Look for it. Be sure you get "Tess and Ted" School Shoes, and you'll get more wear, more comfort and more style.

Well, good-bye. We'll write you again next week.

Your little friends,

"TESS AND TED"

The "Star Brand" Kids.

NOTE: "Tess and Ted" are members of the "Star Brand" shoe family.

"Star Brand Shoes are Better."

My Doctor Said

"Try Cardui," writes Mrs. Z. V. Spell, of Hayne, N. C. "I was in a very low state of health, and was not able to be up and tend to my duties. I did try Cardui, and soon began to feel better. I got able to be up and help do my housework. I continued to take the medicine, and now I am able to do my housework and to care for my children, and I feel as though I could never praise Cardui enough for the benefits I have received."

TAKE CARDUI The Woman's Tonic

Cardui is successful, because it is made especially for women, and acts specifically on the womanly constitution. Cardui does one thing and does it well. That explains the great success which it has had, during the past 30 years, in helping thousands of weak and ailing women back to health and happiness. If you are a woman, feel tired, dull, and are nervous, cross and irritable, because you need a tonic, buy and try Cardui? Cardui builds, strengthens, restores, and acts in every way as a special, tonic remedy for women. Ask it for yourself. Your druggist sells Cardui. Ask him.

ROCKCASTLE COUNTY FAIR

It is usually the custom to say that the last exhibition of the County Fair was a great success and excelled all former exhibitions. With the last exhibition of the Rockcastle Fair, it is deserving and can truthfully be said that it is the best held. President Granville Owens and Secretary J. Thomas Cherry, with the able assistance of the board of directors R. H. Hamm, A. E. Apley, and John Robins, have exerted every effort to redeem the past and give a fair where any one would feel like he got his money's worth. The first day's attendance was nearly double any former year and for the second day was proportionately as good and to day is looked forward to as a record breaker.

The barrel-hill display was a great and was conceded by every one to be the equal of no superior to that shown at any small fair in the state, and especially with the farm products which shows a wonderful improvement in the Rockcastle productions, over what it used to be. The products of the culinary department and the hand made articles attracted much attention and showed great skill in the part of the exhibitors.

Woman's Power Over Man

Woman's most glorious endowment is the power to awaken and hold the pure and honest love of a worthy man. When she loses it and still loves an unfaithful man, she is a martyr. The woman who suffers from weakness and derangement of her special womanly organs soon loses the power to woo the heart of a man. Her general health suffers and she loses her good looks, her attractiveness, her mobility and her power and prestige as a woman. Dr. R. V. Pierce of Buffalo, N.Y., with thousands of women, has prescribed for and cured many women. It is known as Dr. Pierce's Favorite Prescription. It is a positive specific for the weaknesses and disorders peculiar to women. It purifies, regulates and restores the system. Medicine dealers sell it. No honest dealer will sell it unless he has a supply on hand. It makes weak women strong, sick women well.

Dr. Pierce's Pleasant Pellets regulate and strengthen Stomach, Liver and Bowels.

ROBERT L. GREENE

The Democrats of Kentucky Tuesday night adopted a platform on which their candidates, previously named in a primary, will go before the people of the State and ask for their suffrages. The fight on the county unit plank, as was forecast, took place and one was inserted declaring that "temperance should not be made a partisan issue between political parties, but call for an extension of the present local option law as applied to the sale of liquors so that the citizens of each county may determine whether liquors shall be sold therein."

The temperance plank which was adopted:

"Section 13—temperance is essentially a moral, non-political and social question, and should not be made a partisan issue between political parties.

We favor the extension of the present local option law, as applied to the sale of liquor, which has been upheld by our highest court as valid and constitutional, so that the citizens of each and every county in the state may determine for themselves whether spirituous, vinous or malt liquors may be sold therein."

The minority embraced the following as a substitute for section

13, but was rejected. It reads as follows:

"The democratic party of Kentucky is, and has always been, a party of moderation and temperance. Every existing statute in restriction of the sale and use of intoxicants was enacted by a democratic legislature and approved by a democratic governor. It is justly opposed to the principle of paternalism, and pledging the party to the vigorous enforcement of the laws, the democrats of Kentucky renew their allegiance to the time honored principle of self-government and home rule embodied in the local option clause of the state constitution and denounce the double-dealing and hypocrisy of the republican effort to drag into party politics a social, moral and religious question having no proper place therein."

Now that the whiskey question cannot be made a special ground for argument by one party over the other in the coming Campaign in Kentucky it seems to us that it is only a matter of party strength and any old fool ought to know what that means.

PELLAGRA IS PROBABLY INFECTIOUS

That pellagra may be infectious is the belief of Dr. Geo. W. Arnes, superintendent of the Institute for the Feeble Minded at Lakeland. He has had some experience with the disease which is attracting so much attention just now, and when the members of the Board of Control said to him that there were several cases at the asylum at Lexington, he told the Board that there would be more cases. The members of the Board scouted this idea, but it has been shown that Dr. Arnes was right, for the number of cases is greater than they were several months ago.

Dr. Arnes said that the one case which had been treated at the Institute here about a year ago, when a boy sent from the asylum at Lakeland was found to have pellagra. Dr. Arnes had him isolated, and the patient was not allowed to mingle with the other inmates of the Institute. This is the only case that has been found here, and Dr. Arnes makes an examination of every inmate at least once each week to see that they are in good health.

The disease is a peculiar one, and death results from exhaustion. Dr. Arnes says that neurotic persons are more susceptible to the disease for which reason pellagra more often is found in the asylums for the insane. The first symptoms is a breaking out of the back of the hands and the bridge of the nose. This skin is trouble itches only slightly, and is said to look like sunburn. The back of the neck and the tops of the feet show the same skin affection. Later the bowels are affected, and there is loss of appetite, with some fever.

Dr. Arnes says that little is known of the disease, and there is no cure known, the only treatment

being fresh air and good food. He says the poor food theory has been exploded, and what one eats has nothing to do with the disease. Dr. Arnes says his opinion is that it is a nerve starvation, and the disease comes from the nerves. For several years there have been cases of pellagra in the asylum of this and other states, and Kentucky has had fewer cases than most of the states.

One peculiarity of the disease is the unpleasant odor which emanates from the bodies of persons afflicted with pellagra. For this reason, pellagra is thought to be akin to leprosy, and it is regarded as one of the most dreadful diseases that is known. The Rockefeller Institute is spending large sums of money to investigate pellagra and try to discover what causes it, as well as a cure. Thus far, they have done neither, and not only do not know what causes the disease but also do not know how to treat or effect its cure.

Dr. Arnes says it is not known whether the disease is communicable or not, but the general opinion is that it may be infectious, and therefore patients should be isolated.—Frankfort News Journal.

ALFALFA

Alfalfa is a crop that can be grown successfully in any section of Kentucky provided certain conditions are met. They are: First, a fairly fertile soil, second, a well drained soil, third, a soil with more than enough lime in it to correct acidity; fourth, a soil free from weeds. With these conditions, of course, must be a properly prepared seed bed. Such a seed bed is thoroughly pulverized throughout and makes a good contact with the subsoil. Alfalfa may be sown in the spring on ground free from weeds, but as most farms have difficulty in getting rid of weeds, and we believe the chance for a stand are better in a fall sowing, we will give the method of procedure in preparing fall seedling. Alfalfa may follow a crop like potatoes or wheat, but there is some danger that the ground may be left too dry to prepare well, therefore it is better to use land which may be prepared in the early spring. However, the method of procedure is the same. First thoroughly disk the ground and follow immediately with a turning plow. The ground should be harrowed every week or ten days until seeding time. Especially should the ground be harrowed after rains, as soon as possible to "conserve the moisture. The disk may be used occasionally to "throw up weed seed where they will germinate. The frequent harrowing conserve the moisture and kill weeds. Do not disk just before sowing as this may throw up weed seed that may not start until after the alfalfa is sown. The seed bed should be well compacted, so if necessary, use the roller. Three or four weeks before seeding, apply lime, if necessary, to use it. Try some on a small plot, even if you think you don't need. This is

the only way to find out definite of the lime requirements of the soil. Disk the lime in well. Either air-slacked lime or raw ground lime stone may be used. In buying fresh burnt lime, remember that it requires 56 lbs. of it to equal two tons of raw ground limestone. Seed between August 15th and 31st at the rate of 20 pounds per acre. Just before seeding, harrow and roll the ground. Sow one half the seed in one direction and the other crosswise of this in order to get an even stand. Harrow in lightly. At the end of three days there is no prospect for rain apply the roller to firm the ground and bring the moisture up to the seed. The whole story can not be told in an article of this length.
