J. N. CAMDEN.

VERSAILLES, KENTUCKY

TO THE FARIERS OF KRITUCKY

For a quarter of a century the great problems of manufacturing and of transportation have been handled upon the advice of experts-men whose accurate and scientific knowledge extends to the minutest points.

In the past for years able men have realized that farming could be put upon the same basis-that instead of being of measure at a haphazard enterprise it is one of the most scientific humiesses in the world-that it may be as the attack as reliable as those processes of nature upon which it depends.

It has been realized also, that the principles of co-operation which have worked out such great things in the industrial world, may be used with equal effectiveness in the realize of agriculture.

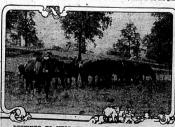

To aid in the rapid aprend of these ideas and a principles seems to me to be a most useful and noble work, and one in which I would gladly have a part in Kentucky.

With Life thought, I have decided to give and old fashioned barbecus at my home in Woodford County, near Versailles, on Wedneday, August 2011. It will be my aim to have matters along the lines. In will be my caused by some of the great agricultural expert along the country, and it will be my kope that this may give fresh imports to the work in Kentucky for the farmers which is already so well begun.

Which is already so weat wegue.

There' Panner, and every farmer's wife, and every one interested in better farming, in the state, who feels an interest the state of agriculture, and in bettering the state of farm life, is most cordially and urgelly intitions of farm life, is most cordially and urgelly intitions of farm life, is for the state of good fellowship, and the desire to help, and all who accept it will be most warmly welcomed.

Very sincerely,

DESTINED TO HELP FEED THE HUNGRY CROWD.
