MEMBER OF
KENTUCKY PRESS ASSOCIATION

National Highway Association

South Yarmouth, Mass.
Aug. 8, 1913.
Mr. Vernon Commercial Club,
Mt. Vernon, Kentucky.

Dear Sir:-
We are sending you herewith a blank for you to fill in, giving us information as to the towns which your proposed Boone Way would pass between Crab Orchard and Lancaster, Lancas and Nicholasville, and Nicholasville and Lexington.

We appreciate the arguments you have advanced in favor of a direct route from Crab Orchard to Lexington, not via Winchester. Our suggestions from the official sources of the State, however, show the Highway running from Mt. Vernon to Winchester, Crab Orchard to Stanford, and then running north-east thru Lancaster, Winchester, Mt. Sterling etc. with, of course, a westerly line from Winchester to Lexington, Frankfort, and Louisville. We intend to include also, tentatively at least, the route shown on our sketch under date of February 20, 1913, in addition to the official route; and for that purpose need the information we have asked of you so that we can definitely locate the road between Crab Orchard and Lexington according to your routing. Since with this exception we have Kentucky practically finished so far as our National Highway system is concerned, we will very much appreciate a reply to your early convenience, and wish to thank you in advance for your kind attention to this.

With the exception noted above, the State has designated your Boone Way as one of their suggestions for our National Highway.

Very truly yours,
TIMOTHY W. SPRAGUE,
Engineer to Board of National Commissioners.

The National Highway Association has the leading business and professional men of our country as members. Its object is to plan and build thousands of miles of highway and to secure the United States aided by the National Government. Among the prominent men who are taking a leading part in the work we find the names of Gen. Coleman Du Pont, the man who has built a splendid system of turnpikes for his native state, New Jersey, much of it at his own expense; he being Chairman Board of National Commissioners; Chas. Henry Davis, C.E. President, Washington, D. C. Will Ward Duffield, Engineer of chart construction and a host of others from all portions of the country. The question of highways has been taken up and systematized for action and presentation to Congress. One of the trunk lines as proposed by the association and which was shown on their first issued maps shows the line called the Great Lakes-Atlantic, starting at Charleston, S. C. as passing through Columbia, Gravelly, Asheville, Johnson City, Cumberland Gap, London, Richmond to Winchester, there to intersect with a trunk line called the South-West leading from Washington to Galveston Texas via Leal gton, Louisville, Cairo, Little Rock, Texascoxa, Dallas Houston and the Island City on the Gulf. The secretary of our commercial club through correspondence has called attention to the Boone Way proposition and its route and has about convinced the National Highway Association that it should endorse the route from Cumberland Gap to Lexington via Crab Orchard, Lancaster, and Nicholasville to Lexington via Winchester to Lexington and other information with

maps asked for in above letter has been furnished by our secretary and do not doubt the National Highway Association will prove a factor in assisting in putting the Boone Way question along with their proposed trunk line, in a favorable light before Congress at its next session.

Dr. LOCK. The Hookworm specialist, has been in the county a little over one week and up to Wednesday morning, he informs us that he had examined about 500 in Boone county; that he found about 20 per cent infested with Hook worm, and about 25 per cent were infected with other parasites, the most prevalent being the round worm. Dr. Lock is here at the expense of the state and the treatment he gives is absolutely free to the patient. We regret to learn that the majority of the people have shown such indifference in matters of this importance. The health of your family and community demands that these examinations be made. Dr. Lock will be here at Hanford tomorrow (Saturday) and at Pongo the following Monday. Other appointments will be announced and let us urge the people to take advantage of this golden opportunity to save guard the rising generations as well as the older one. The examination is absolutely free and the medicine, if it is found that you need any, is also free.

LIVINGSTON.

Att'y John Brown, of Mt. Vernon, was in our town Tuesday—One day last week a blind man came to Livingston and had wandered over on the street and was trying to get back to the depot when some one informed J. M. Foure, the Livingston blind man of the fact, and Foure went and led the other blind man back to the waiting room at the depot, so this is one case of the blind leading the blind.—The East Bernstadt base ball team came down and played our boys Sunday. Our team easily defeated them by a score of 11 to 4. Feature of the game was 14 round work of Livingston and battery work of Phelps and Phelps. Livingston journeyed to London, Monday. A very exciting game. Score 5 to 1. in favor of Livingston.

The Livingston team won a challenge of any team.—O. D. Bryant has purchased property in our town; is repapering and repainting the dwelling, and has not rented it to any one. We have it looks very suspicious, but we are cauping on his trail and we think cupid is at work.—Sheriff Nicely was here Tuesday. At last the primary is over and we hope all the defeated candidates have buried the hatchet and we will not have any more excitement until just prior to the November election.—The Big Mt. Vernon Fair is over and the Broodhead Fair will be pulled off this week.—Mrs. May Beavers and daughter, Mrs. Docia, of Clacianoti, Ohio, are visiting relatives here attending the fairs.—Mr. and Mrs. Fred Neighbors, after a ten-days' visit in New York and other points, have returned home and report a splendid time.—Mrs. L. H. Davis is visiting relatives at Berea.—Mr and Mrs. George Johnson and children were where between the 1st and 2nd, en route to Mt. Vernon. Ben Lamb, of Brodhead, was in our town a few days ago.—J. W. Sams, is repairing his property on Main street.—J. P. E. Drummond is on the sick list this week.—Miss Nellie Carver, of Lebanon Junction, is visiting Misses Carrie and Ella Mae Parley, this week.—Mrs. John Shear, and children, of Paris, are visiting Hugh Jenkins, this week.—Mrs. Sams and Mrs. C. A. Blanford and daughter, Mrs. Ella Mae, have returned from Louisville.—Cann Mullins arrested Ho or McClure and took him to Mt. Vernon and placed him in jail. He is charged in connection with the murder of a negro and depok.—Dr. R. G. Webb is attending the Masonic College in Denver, Colorado, this week.—DIED: Steve Crain, a son of Mrs. Alfred Crain, Monday, the 11th, and was buried Tuesday.

This is a son of Alfred Crain, who deserted his family some years ago and who is now under indictment for murder in Terry. He left his family on the mercy of the world and they have had a hard road to weed. Mrs. Crain, who is almost an invalid, and some of the children, are in very poor health. While we do not say that the penalty that is about to be meted out to Mr. Crain is what he deserves,

yet a man that will desert his little children we don't know but what he is a nuply rascal when the death sentence is passed on him.

GOOD WORK OF CANNING CLUBS

Girls and Women Taught to Save Vegetables.

AIDED BY THE GOVERNMENT.

Experts Furnished to Give Instruction in Scientific Canning While Kentucky Agricultural Department Loans Modern Outfits—Women Are Also Showing Interest in the Work.

The garden behind each and every farmhouse produces each summer more vegetables than can be fully consumed. When winter comes the farmer and his family have to buy canned tomatoes, peas, corn and beans at the cross roads store.

The Girls' Canning clubs that the United States government is developing in nine counties in Kentucky this summer are part of a huge movement to check this huge loss of fine food and money that totals millions annually. Besides the saving in money there is another fact which is commonly overlooked. In canning vegetables that are home grown the housewife is sure she has a first class article.

That the work may be done in the best possible manner, the United States government is furnishing experts to demonstrate this home can-

LIVINGSTON.

ning work. The state agricultural department is loaning each of the nine counties a home canning outfit, and the counties themselves are furnishing interested teachers, parents and wide awake country girls to form the clubs. In Jefferson county clubs have been developed at Valley Station, O'Banion's and Otation.

After the lot of tomatoes had been put through the canner by the expert in forty minutes the girls were thoroughly interested and continued the work. It was remarkable how fast the work went with five girls as they were so interested. As one old farmer expressed it: "Every year I've been on my place I've had my mind to plant fewer tomato vines, but I have more tomatoes than we can use and give away. But I don't believe I'll get them down in number this year if the girls can do the work this fall. I've

CANNING CLUB AT VALLEY STATION.

Just been figuring on it a little bit, and this little canner that'll set on top of a one burner gasoline or coal oil stove will can sixteen quarts of tomatoes every three-quarters of an hour. That is 208 quarts in a ten hour day."

"Yes," remarked one of the housewives, "and the great beauty of it is with the temperature you can get it on of these canners, you can can anything and be sure of its being perfectly sterile. You don't have to use anything with beans, for instance, but a pinch of salt and a little water."

"Well, it took a long time to get the old mothers in this part of the country to use thermometers to test their food before churning, and I reckon it'll take some time to get them to use modern canners with thermometers as they will be certain of results in canning."

Advantages of Night Schools

FOR years our large cities have recognized the absolute necessity for night schools, and they have become a part of such systems. The curricula have been slow to understand the great waste in energy that comes through the lack of education in each and every community.

Naturally one would suppose that a county which had for its county seat a city the size and importance of Louisville would have seen the tremendous advantage of such schools, but such has not been the case. When it has been suggested again and again that it should be done, it has not been done.

One day last spring your correspondent happened to be in the office of the county superintendent at the courthouse at Louisville. While waiting for a work from him until the end of the spring term of school, he interested in the night school proposition will you and the board stand by me and furnish high heat and some new lamps?" Of course the superintendent at once agreed to the proposition, but a farmer who stood by asked a little closer and asked, "Who's going to pay for the extra work?"

The teacher flushed for a moment and then managed to stammer, "Why—how—what do you mean?"

"Why," he answered, "you ain't in the school teachin' work for your health, are you? What are you going to get for this extra two or three hours a week from now until the end of the spring term of school?"

"I'm going to get a big price for the work," she answered with spirit. "The price is to be my own satisfaction that I am doing my full duty by the good folks that have kept me in one school for ten whole years. Don't you think I owe something to the people who have given me my school and board for ten years?"

That conversation made your correspondent vow that he would visit the little schoolhouse before the end of the spring term. He did just what he said. The building that is perched on a steep hillside to keep it out of the Ohio river during flood times. It was a dreary, rainy night. As he neared the little station he felt that there would be no one there for work, but he was mistaken. Four boys out of the eighteen enrolled were on hand and ready for business.

Not one of the four had walked less than a mile in the damp night air, and all of them had been at work all day. Yet there they were, smiling and bright and eager, youngsters who during the time they had been in school as little tots had accomplished nothing.

When the teacher said, "I am sorry it's a bad night and there are only four present," your correspondent thought: "Only four present! But if at this moment each and every schoolhouse in the county had just this number at work it would mean that each year 400 would be caught and held and developed into something better and finer than they would be otherwise. If it could be kept up for ten years it would mean that the county would have 4,000 made over citizens. In a few years it would mean a new state. It is most certainly very much worth while."

NIGHT SCHOOLS IN LOUISVILLE.

Teaching Agriculture

[From the Henderson Journal.]
Notice by the dispatches that agriculture to be taught in the rural schools of Kentucky—
It doesn't interfere too much with the curriculum (the regular courses) in the school.
If that's the way they feel about it all right.
But we surely that our vote in favor of teaching agriculture in the rural schools.
Especially—
We it DOES interfere with the curriculum in the schools.
If the curriculum of the schools hadn't been interfered with a good many times in the past the clock would have been stopped for fifty years.
There have been two separate and distinct schools of thought in the arrangement of the public school curriculum. There has been the faction which seemed determined to cram the juvenile mind full of any old information that was useless, and the less value to the pupil when he stepped out into the world the more of it they tried to cram into him.
It has been done largely under the pretext of fitting the pupil for the college which he never attended. The pupils have answered by quitting school at the close of the grades and leaving a corporal's guard to matriculate.
The other faction in the educational world has struggled to inject into the school course something useful, something that would enable the graduate to battle skillfully and successfully in the world for which he was supposed to be fitting himself.

That practical or utilitarian faction was in a very small minority at the start, but gradually consciousness has been wrung from the other side until in the most advanced schools they really teach the pupils something useful. Let's take a mirror and look ourselves squarely in the face. There is nothing wrong with Kentucky. Very fine lands are yours here only half what they are worth in other states which can boast no better soil. We could ask for no better soil. Where is a better climate?

There is NOTHING WRONG BUT OURSELVES.
Boys who should be raised on the farm are raised in the towns and then sent to feed the hungry, senseless call of the city. One blade of grain grows where two would grow if some one would tell it how. Farmers are a dollar in debt where they would have two in the bank if they and their sons were enabled to understand agriculture as it can now be understood where there is opportunity to learn it.

The theory is twenty-five years ahead of the practice. Why not take a short cut and inject a little theory into the pupils of the country schools in place of miscellaneous and classified useless information, facts and fancies, fables and furbelows?

WOMEN TAKE NOTICE!

A man cannot understand the torture and suffering many women endure uncomplainingly. If the quality of men suffered as much pain and endured with patience the weakening attacks that most women do, they would ask for immediate sympathy and look for a quick cure.

Many women have been saved from a life of misery and suffering by turning to the right remedy—Dr. Pierce's Favorite Prescription—a remedy which is safe to take because containing no narcotics, alcohol or injurious ingredients. It is an alternative extract of roots, made with pure glycerin, and first given to the public by that famous specialist in the diseases of women—Dr. R. V. Pierce, of the 'Lionel's' Hotel and Surgical Institute of Buffalo, N. Y.

Miss Lizzie M. Meskeworth, of Lincoln, Neb., 629 1/2 St. says: "I send a testimonial with much pleasure so that some suffering women may know the true worth of your remedy. I was a great sufferer from female troubles but after taking one bottle of Dr. Pierce's Favorite Prescription, which a friend advised me to take, I found myself very much improved. After taking five more bottles, and nine by boxes of Dr. Pierce's Lotion Tablets, I found myself on the road to recovery. I was in poor health for five years but now I am cured."

"I hope all women suffering from female weakness will give Dr. Pierce's Favorite Prescription a trial."

Doctor Pierce's Pleasant Pills regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules.

TRAIN YOUR BOYS AND GIRLS RIGHT

Don't Let Them Waste Time on Useless Studies.

WHAT CAN YOU EXPECT?

A Boy Trained For a Profession Is Not Apt to Be Contented or Successful as a Farmer—Yet Agriculture Is Quite as Important as the Classics of the Academy.

Could you expect to rear a fine trotting horse or a good steady farm animal if you sent the best in its early youth to a man who trained a stableful of fancy saddle stock? Can you expect your boy to go through the ordinary rural high school and have him "stay hitched" on the farm? These propositions are identical. The average county high school holds up ideals and teaches topics that will necessarily lead the boy to sign for a city career in the learned professions, so called.

Are you and I to blame? Of course we are, it is only necessary for the parent, the taxpayer, the everyday folks who hold the purse strings to say: "Here, we have had enough of an education that is so old that it is musty—education that is all books. Give our children an education that fits them for life here at home."

This new education that will fit people for life is coming, but it is coming too slowly in the country. Our very best young men are being shipped to the cities of the country and into the city. The cities do not need this new blood; the country does.

It is quite easy to say that the cry is rising, "Back to the farm." But it is not at all easy for the city man to go to the city man, the man bred and born in a big city, can hardly go back to the soil with any degree of certainty that he will succeed. He lacks the technical part of farm work that comes through daily contact with live growing things, that contact which the country boy has had since the day he first began to notice things. If these statements seem at all too strong simply pick up the Kentucky Educational Directory of 1912. Turn to the list of county high schools on page 34 and run through them. Out of about 180 approved high schools 114 are classical or English high schools and only thirty-six are scientific high schools.

Just so long as our country boys are pushed through schools that are classical in their tendencies just so long will our rural population drift cityward, for their education has developed them most carefully for that life.

IF YOUR BOY IS TO FARM TRAIN HIM FOR A FARMER.
IF YOUR BOY IS TO BE A PROFESSIONAL MAN TRAIN HIM IN THAT DIRECTION.

Their Wives Too

Speakers on Home Making Have Been Secured For the Barbecue at Versailles, Aug. 20

A BARBECUE has usually been for politics and men only. The Big Canebarbecue is to be exceptional and is to include the farmer's wives in the makeup of its splendid program. No effort will be spared to make the farmers' wives and daughters comfortable when they attend this huge meeting. A special tent will be provided for the ladies, and a physician will be in attendance.

In reading over the program which has been issued in the last week one is very much impressed with the fact that the major portion of the speakers will talk on co-operation and the marketing of crops instead of increased production of crops. For a long time the farmer has realized that increased production would solve all of his problems, but he now realizes that he must learn

THOROUGHBREDS.

more about marketing his crop when made manifest before it is made. Mr. J. C. Caldwell, or, as his friends and neighbors call him, Jim Caldwell of Lakefield, Minn., will talk on "The Farmer and His Finances." He is a man who speaks from a wide experience, an experience that embraces the launching of a co-operative elevator, a farmers' bank, a co-operative store, a co-operative creamery and, last and by no means the least, a co-operative church. He will have something to say that will get close to the people, for he is one of the people. He is not an expert or a theorist, but a man who has accomplished things in everyday life. It might be well to mention the fact that he is just studying foreign methods of farmers' credit and co-operation.

Professor Charles J. Brand, assistant in charge of the bureau of marketing, Washington, will tell of the work of his department in "Co-operative Farm and Home Marketing." Mr. E. M. Tinsley, who is editor of Co-operation and also secretary of the Right Relationship League, will discuss "Co-operation." The Farmers' Educational Co-operative Union of America will be represented by Mr. R. L. Bennett, who will discuss "The Farmers' Union."

Professor Cyrus W. Hopkins of the great University of Illinois has been secured to tell something of "Soil Conservation." The chief of the farmers'

DRUG STORE

Here are several reasons why I trade at C. C. Davis' Drug Store:

- BECAUSE—Quality considered, his price can't be beaten.
- BECAUSE—There are no delays; customers receive prompt attention.
- BECAUSE—Things we get at Chas. C. Davis' Store are all right.
- BECAUSE—Things that go wrong bought at "Chink's" will be made right.
- BECAUSE—The poor man's dollar is worth just as much at Charley's place as the rich man's.
- BECAUSE—There are no leaks from his store; every deal is strictly confidential.
- BECAUSE—Chas. C. Davis is never grouchy if you don't buy.

STOMACH TROUBLE FOR FIVE YEARS

Majority of Friends Thought Mr. Hughes Would Die, But One Helped Him to Recovery.

Pomeroy, Ky.—In interesting advice from this place, Mr. A. J. Hughes writes as follows: "I was down with stomach trouble for five (5) years, and would have sick headaches so bad, at times, that I thought surely I would die. I tried different treatments, but they did not seem to do me any good. I got so bad, I could not eat or sleep, and all my friends, except one, thought I would die. He advised me to try Theodore's Black-Draught, and quit taking other medicines. I decided to take his advice, although I did not have any confidence in it. I have now been taking Black-Draught for three months, and it has cured me—haven't had those awful sick headaches since I began using it. I am so thankful for what Black-Draught has done for me." Theodore's Black-Draught has been found a very valuable medicine for derangements of the stomach and liver. It is composed of pure, vegetable herbs, contains no dangerous ingredients, and acts gently, yet surely. It can be freely used by young and old, and should be kept in every family chest. Get a package today. Only a quarter.

"WE USE" DANIEL BOONE AXLE GREASE

And don't have to grease but once a week.

Made in Kentucky by CHAS. C. STOLL Oil Co. Lexington, Ky.

THIS IS 1913.

Would you plant and harvest as in 1850?
Would you light your house as in 1850?
Would you cook over the fire as in 1850?
Would you use a "muzzle loader" as in 1850?
Would you breed razzbackes as in 1850?

If everything on your farm and in your home bears the mark of 1913 why will you insist upon a school that was planned in 1850?

If your children are to live and earn a living in 1913 would you be better to give them a 1913 education?

BY ALL MEANS.

Superintendent Barker has the right idea. He proposes to establish an agricultural course in the West Liberty high school, that should have been done at the outset. Wonder if there be any who are so shortsighted as to oppose? We hope not as a rural law would be raised if some one should propose to take history, grammar or trig out of the curriculum. Agriculture is just as important as either of these.—Editorial Licking Valley Courier.

\$500 IN GOLD FOR PRIZES IN CORN AND TOMATO GROWING.

TWO CAPITAL PRIZES OF \$250 IN GOLD EACH ARE OFFERED BY MR. J. B. O'BRYEN FOR BOYS AND GIRLS WHO ARE MEMBERS OF CLUBS WORKING IN KENTUCKY. IT IS HOPED THAT THESE TWO HUGE PRIZES WILL CAUSE THE AGRICULTURAL STEPS TO PUSH THEIR CROPS TO THE LIMIT.

THE BOY CORN CLUB BOY WHO IS CHAMPION FOR THE STATE AND GIRLS WHO MAKE HIGHER BUSHELS OF CORN ON HIS ACRE WILL RECEIVE \$250 IN GOLD.

THE GIRL WHO EXCELS IN HER TOMATO CANNING OVER ALL THE OTHER GIRLS IN THE CLUB WORK IN THE STATE AND CAN THESE 500 GILBERTS WILL RECEIVE \$250 IN GOLD.

GOOD REASON FOR HIS ENTHUSIASM

When a man has suffered for several days with colic, diarrhea or other form of bowel complaint and is in a wretched condition and by one or two doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy, as it often the case, it is natural that he should give it a trial in the privacy of his home. It is especially in such cases of a severe attack when it is not safe to take a remedy. It is sold by Chamberlain, Dr. J. C. Davis.

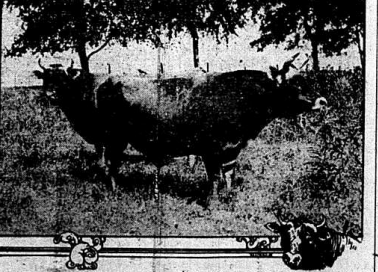

SOME HAMPSHIRE DOWNS.

co-operative demonstration work. Dr. Bradford Knapp, will explain the plans and the hopes of his department in "Farm Extension Work" which Dr. Fred M. Miller, in charge of the work in Kentucky, will tell something of the "Boys and Girls' Demonstration Work." Our own commissioner of agriculture, Hon. J. W. Newman, is to talk on "State Aid."

Several other speakers are being considered, besides those for the farmers' wives, so that two speakers' stands may be used at a time and accommodate any number who may come to the barbecue.

Every part of the Camden farm will be open for inspection on the day of the barbecue—everything from the sixty acre field that has been in alfalfa for the past fifteen years to the thoroughbreds in the paddock or the bunch of Shetland ponies, with their foals by their sides. There will be no effort at a display of the stock of any character, but the people are expected to go about, inspect and question as if they were attending a one day session of a great farmers' school. If, in the afternoon, after all, to be a great place of instruction and "getting together" and breaking bread together.

In Warren county in the past few weeks the farmers, their wives and sons and daughters, have been "getting together" in a series of farmers' banquets.

KINGS OF THE DAIRY HERD.

Each race has been a district affair. The barbecue at Versailles is being developed in exactly this same spirit. It is the same feeling showing in a different manner. The barbecue is not a "getting together" of a neighborhood or a county of farmers and their friends, but of the whole state. And that it may be something more than the hearing of good talks, bees and sheep will be slaughtered and burgers made so that it may be a picnic, a social gathering, a smacking of the older days of Kentucky hospitality.

Things are happening in Kentucky. Every day things are happening in the dairy old state. It seems that after her long nap she is rousing herself, and she may never doze again. Night schools, Chautauques, farmers' night schools, boys and girls' clubs and barbecues are being launched here and there. Let each and every one of us can put everything aside and come to Versailles to pledge his or her faith in a Greater Kentucky through better farming; pledge his or her faith in the old state to a steaming royal mug of burgeois.

A TEXAS WONDER.

The Texas wonder, curing kidney and bladder troubles, removing gravel, curing diabetes, weak and lame backs, rheumatism and all irregularities of the kidneys and in both men and women. Regulates bladder troubles in children. (Do not sold for your druggist, will be sent by mail on receipt of \$1. One small bottle is two months' treatment, and seldom fails to effect a cure. Send for testimonials from this and other states. Dr. E. W. Hall, 2535 Olive street, St. Louis, Mo., Sold by druggist.

Some men talk as if they sleep because that is the only chance they get.
