CATARRH CANNOT BE CURED

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken internally and acts through the blood on the mucous surfaces of the system. Hall's Catarrh Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best tonics known, combined with some of the best blood-purifiers. The perfect combination of the ingredients in Hall's Catarrh Medicine is what produces the wonderful results in catarrh conditions. Send for testimonials, free. F. J. CHENEY & CO., Props., Toledo, O. November almost gone and December 31, drawing near which will close our Junior Agriculture Club Campaign.

Have you a Junior Club in your school district or community? Is it as big as it can be made this year?

All the assistance furnished these boys and girls will be free. Why not have a Junior club and get what is coming to you and our boys and girls. New application cards with 33 projects, or things for boys and girls to do, can be gotten from County Agent, Berea.

The following are some of the things they can do with the aid and backing of State College of Agriculture and United States Department of Agriculture.

Grain: Cereals, potatoes, soy beans, sweet clover, fruits, garden, tomatoes, tobacco, pigs, and ligger, sheep, poultry, bees. Study: Sewing, home arts, foods, canning, butter making. There should be a Junior club in every school district, directed by Local Leader, Trustee and

MORE RICH, RED BLOOD NEEDED

Pepto-Mangan Gives You the Health To Tackle Your Daily Work With Vigor

If you sit at a desk all day in an office, whether you are perched on a high stool or seated in an upholstered chair, your body is inactive. You can't get much fresh air and outdoor exercise. Your blood becomes poor. You look pale and feel weak.

The great-energetic, Pepto-Mangan, is what you need for awhile. It makes rich, red blood. It restores your energy. Your color comes back.

When your blood is good, full of red corpuscles, you are better able to "resist" disease. You get more out of your daily work with the optimism of good health.

Try Pepto-Mangan and notice how you improve. Pepto-Mangan is sold in both liquid and tablet form. Take either kind, you prefer. Both have the same medicinal value. Be sure you get the genuine Pepto-Mangan "Gude's." The full name, "Gude's Pepto-Mangan" should be in the package. Advertisement.

Teacher: All assistance and help necessary for the development and success of each club will be furnished by State College of Agriculture and U. S. Department of Agriculture through the County Agent.

Write for County Agent, Berea, today for club application card and start your club.

THIS MEANS YOU

When you get up with a bad taste in your mouth, a bad tired feeling, no relish for food and are constipated, you may know that you need a dose of Chamberlain's Tablets. They not only cause an agreeable movement of the bowels but cleanse and invigorate the stomach and improve the digestion.

On last Monday night, Ashland Lodge, G. O. F. & A. M. held another enthusiastic meeting. The Master Mason's degree was conferred upon the following: R. F. To the Farmers

In this day of complicated machinery most farmers probably give little thought to the care of so simple an implement as a plow. But more effort has been expended in the slow progress of developing this seemingly simple tool than in that of any other implement used on the farm. It is the basic tillage tool, the fundamental farm implement, and it is richly entitled to be properly cared for when not in use.

SHOULD BE STORED IN DRY PLACE

When laid by, says the implement experts, the plow should, if possible, be stored in a dry place, away from contact with the ground. In any case, the bright parts should always be coated with grease to prevent rust. Once the plow has been stored, it should be kept with rust on an efficient job of plowing can not be done until the corroded parts again have acquired a polish by use.

The United States Department of Agriculture, of course, does not stop with the plow in its admonition in this regard. Harrows also receive simple but tremendously important instructions, next to plows, most generally neglected. Many farmers who would not neglect an expensive harvesting machine, say the experts, are careless as to harrows and other implements of this type.

But these, also, represent capital investments, and longer service is possible if they are properly cared for at the end of the season. If harrows are stored under a shed, the teeth should be supported by blocks or bars, so that they will not become embedded in the ground. All accumulations of earth and trash should be removed. This is especially applicable to wooden harrows. The earthly accumulations retain moisture and accelerate decay. When the wooden parts have dried out sufficiently they should be painted, to prevent season checking and splitting. As the harrow works in wet earth and close to the ground, deterioration is rapid even checking has started.

If the disk harrow, is stored in a shed or other fireproof building the disk gangs should be run upon boards so the disks will not become embedded in the ground. When stored or on the implement should be carefully cleaned of all accumulations of soil, and the disk should be greased with a heavy grease to prevent rust. The paint, particularly on the wooden parts should be renewed frequently.

GET THE MOWER UNDER SHELTER

Mowers, more generally than plows and harrows, are put under shelter, but many of them spend the winter at the edge of the meadow where the last cutting of hay is made, or in most cases they are not properly greased, even when sheltered. Get the mower under shelter, if possible. In any case, clean the knife bar, wipe it with a greasy rag, and store it in a dry place. Place a block of wood or other support under the midpoint of the tongue, so that it will not require permanent sagging. If the mower is stored with the cutter bar in a vertical position, place a block of wood under the shoe to take the weight off the frame. All accumulations of vegetable matter and dirt should be removed and all bearings and other bright parts of the mower should be oiled. Much the same also applies to reapers and binders.

The time to care for each implement is when its work is finished.

Attention! Mr. Car owner

Big 4 Engineer Out With Facts

Says Tanlac Quickly Brought Back His Old Time Health And Energy—Feels Fine Now.

One of the most noteworthy features in connection with the introduction and sale of Tanlac throughout America is the very large number of railroad men who have been benefited by its use.

Prominent department officials, conductors, engineers, office clerks and, in fact, men representing practically every branch of the service, have reported that they have used Tanlac with the most surprising and gratifying results.

One of the latest to testify is E. H. Bowley, Eighth and Elberne Apartments, in Prince Hill, Cincinnati. Mr. Bowley has been in the service of the Big Four Railroad as engineer for forty years and has been on his present route—pulling passengers—between Cincinnati and Chicago for the past several years. He is also Commandary Mason and an ac-

The Right Direction

If you are going anywhere, the natural thing to do is to travel in the direction of the place you desire to reach. The speed you make merely regulates the time of your arrival—you are headed right.

It is not the amount of money you save, but the fact that you have begun to save, that invests the act with a certain moral influence which, properly encouraged, becomes stronger and stronger all the time. That's why we urge you to open an account with us and get started on the right road, where the going is easy. Start an account today and watch it grow.

LEXINGTON NOTES

A three days drive was put on last week to raise \$5,000 in the interest of the Boy Scouts of Lexington. "Over the top" was the result. The movement was in charge of Board of Commerce. A boys brass band of forty pieces is one of the objects. The Mayville Boy's Band turned music at the inauguration of the drive.

Beginning on Sunday, November 25th the Lexington Leader will begin the publication of a series of articles on the early history of Kentucky, compiled by the "Boys Who Stayed." The opening chapters will cover the subject of FIRST THINGS IN KENTUCKY. Following chapters will cover other interesting facts and occurrences, including some things up to present days. Most of the matter covered will be in brief form which will be

worth preserving in your scrapbook for future reference.

In company of Dr. Wm. Allen Pusey, of Chicago, the writer will spend Thanksgiving week touring the localities of Berea, Boone's Gap, Bristol and Gate City, Va., Kingsport, Long Island and the Block House (site), Tennessee; Cumberland Gap and points between there and London, in their further search for data covering Boone's Trail, the Wilderness Road, and other matters, which is to be used in a history and map of that noted path thru the Cumberlandis.

"For some time past my appetite has been very poor and I have suffered a great deal from indigestion. I was in a badly run-down condition and had tired feeling all the time. "Well, what I needed was just an all-round building up and Tanlac has done that very thing. My appetite is so good that I can hardly eat enough to satisfy me and I can eat what I want without feeling a touch of indigestion. I no longer have that tired worn-out feeling and an enjoying my usual good health and energy. I have found Tanlac usually due and am glad to give it my hearty endorsement."

Tanlac is sold in Mt. Vernon by Orlawa, C. Davis; in Brodhead by the Brodhead Pharmacy, and in Livingston by R. G. Webb; in Burr by W. M. Owens.

has postponed beginning operation until Spring.

The prices of tobacco when the market opens here in January is a subject of more interest to the raisers of the weed and its discussion is widely prevalent among individuals and the tobacco organizations in the tobacco regions.

The invaluable services of County Agent Spence during past few years have been amply and fully demonstrated. His work has added many thousands of dollars to Rockcastle's income, besides giving the boys and girls a chance to accomplish more and better things in life.

The state Prison road crew in Rockcastle is credited with doing more and better work than any other prison road crew in our state. Captain Tackett and his outfit are getting splendid results.

Rockcastle will be right up in front in Federal aid and State aid appropriations for the year 1921 and a large amount of road construction will be done.

GOOD COUGH-MEDICINE FOR CHILDREN.

Mrs. J. W. Phillips, Redon, Ga. phoned to J. M. Floyd, the merchant there, for a bottle of Chamberlain's Cough Remedy and said she had bought a bottle of it at his store recently and that it was doing her children so much good that she wanted to keep up the treatment. You will find nothing better for coughs and colds in children or for yourself. It keeps the cough loose, expectation easy and soon frees the system from the cold.

THE "OLD RELIABLE" THEDFORD'S BLACK-DRAUGHT

White Haired Alabama Lady Says She Has Seen Medicines Come and Go But The "Old Reliable" Thedford's Black-Draught Came and Stayed.

Dutton, Ala.—In recommending Thedford's Black-Draught to her friends and neighbors here, Mrs. T. F. Parks, a well-known Jackson County lady, said: "I am getting up in years; my head is pretty white. I have seen medicines and remedies come and go but the old reliable came and stayed. I am talking of Black-Draught, a liver medicine we have used for years—one that can be depended upon and one that will do the work."

Thedford's Black-Draught is a standard household remedy with a record of over seventy years of successful use. Every one occasionally needs something to help cleanse the system of impurities. Try Black-Draught. Insist upon Thedford's. It is the best thing I have ever found for the full, uncomfortable

man crop is successful, sowing master. Mrs. Dovee Billings and Mrs. Ivory Anglin of Hamilton and E. Dayton, Ohio are visiting their parents, Mr. and Mrs. J. R. McFarlan this week. Johnny Allen, a young man of Colesburg,

has moved on his father, Larkin Allen's farm. Robert Baker is moving to the Dr. J. P. Baker place. Dr. Baker has gone to Mt. Vernon—Dave Hines is busy supplying the people with coal. Henry McCracken is at home from Clark County this week. J. F. Shell went to Hartin to spend the winter in the mines. J. P. Isaacs is a track man. Uncle H. P. Allen is very sick at this writing. The farmers around here are very busy trying to make grown up folks of children. Some one said it can't be done, but that is the teachers' job. Yours with best wishes to the Signal, J. R. Miller.

"I Got Real Mad When I Lost My Setting Hen," Mrs. Hannan.

"I went into the hen house one morning and found my favorite setter dead. I got real mad. Went to the store, bought some RAT SNAP and in a week I got six dead rats. Everybody who raises poultry should keep RAT-SNAP. Three sizes, 35¢, 65¢ and 25¢. Sold and guaranteed by Days Drug Store, and C. C. Cox Mt. Vernon, Ky."

KENTUCKY CROP REPORT.

Kentucky's 1929 crop is estimated at 475,000,000 pounds. Corn 96,624,000 bushels, and potatoes 6,732,000 bushels, in the November crop report for Kentucky issued recently at Louisville and Frankfort by the U. S. Bureau of Crop Estimates in cooperation with State Commissioners of Agriculture, W. C. Hanna. Other crops reported for Kentucky are: Sweet potatoes, 1,782,000 bush.; apples 5,792,000 bush.; pears 395,000 bush.; clover seed 2,500 bush.; and sorghum 2,288,000 gallons. Last year's crop of tobacco 456,000,000 lbs., corn 87,500,000 bush.,

Every Drop an Asset

As a dairy farmer you can figure out to the penny what your cream is worth. You know that every particle of butter fat has a distinct value to you. You cannot afford to use a separator that misses any cream.

The Primrose Cream Separator gets every drop of cream. The principle on which it operates is as simple as the mechanism. The frame is open and sanitary—the supply can be large and low. Every bearing and quiet gear is well oiled by a splash system.

In Primrose separators, good workmanship and materials, close skimming and durable qualities are the distinguishing points. These are points that vitally concern your profit. No matter what the size of your herd, the Primrose is a money-maker. Two-or-three-cow farmers use them with profit. The Primrose is the only cream separator that automatically drains out the used oil from the gear case when new oil is added. Let us demonstrate this and other points. If it is not convenient for you to call, phone us and we will bring a machine out and show you how it operates and what its financial advantages are to you.

potatoes 1,680,000 bush., apples 1,480,000 bush., pears 128,000 bush., cover seed 88,000 bush., and sorghum syrup 2,542,000 gallons. The decrease in tobacco production in Kentucky from 1919 is 100,000,000 lbs. Kentucky which was not left off set by the increased bur-

ley burrage. The drainage by rust and mildew also helped slightly to reduce the average yield per acre—Quality of tobacco is reported as 80 per cent, compared to 81 per cent last year. The United States tobacco crop this season is estimated at 7,476,460,000 pounds compared to 7,689,488,000 pounds last year. It is estimated that approximately 5 per cent of Kentucky's acreage of corn was put into silos this season; its average yield per acre being about 7 tons. There was comparatively little frost damage to corn in this State that some, it is now well matured. The average yield per acre this year in Kentucky is 90 1/2 bush., compared to 25 bushels last year and a 10 year average of 27 1/2 bushels.

He father the proposal—My salary is \$1,500 a year. Now, dearest, what is the least you can live on? Well, how much credit can you get.

SHE WAS WISE.

ONLY A COLD. Are you ill? It is often answered "Oh! it's only a cold," as if a cold was a matter of little consequence but people are beginning to learn that a common cold is a matter not to be trifled with, that some of the most serious diseases start with a cold. As soon as the first indication of a cold appears take Chamberlain's Cough Remedy. Remember that the sooner you get rid of your cold the less the danger, and this remedy will help you to throw it off.
