IMPROVED EYESIGHT

Would you like your eyesight improved, diseased glasses? Send 2c for full instructions. L. Frank Near, Lake Worth, Fla.

There is really nothing more pleasant than the warm glow you get when you know your gift is well received. For assurance of that this Christmas, send those smokers on your list Camel cigarettes or Prince Albert Smoking Tobacco. They're favorites both, especially with men in the service. You have your choice of three distinctive gift packages. **Camel's Christmas Carton**, 10 packages of 20—also the gay Holiday House containing 25 gift boxes of "fat flies." Either you give 200 mild, flavorful Camels. Prince Albert Smoking Tobacco comes in the pound canister all wrapped and ready to give. The packages even include space for your "Merry Christmas" message. You'll find them featured by your local dealer as gifts sure to please.—Adv.

Peace at Home—Regardless of what the happliest man in his home finds peace in his home.

Relief At Last For Your Cough

Cremolun relieves promptly because it goes right to the root of the trouble to help loosen and expel mucus, loosen phlegm, and soothe and heal raw, tender, inflamed bronchial mucous membranes. All you require to get relief is a bottle of Cremolun with the understanding you must like the way it quickly relieves the cough. Write to have your money back.

CREMOLUN FOR COUGHS, Chest Colds, Bronchitis

Town is Man's Work—God made the country and man made the town.—Cowper.

RHEUMATIC PAIN

Don't put off getting C-2225 to relieve your rheumatic pain, rheumatoid and other rheumatic pains. Buy C-2225 today. It's \$1. everywhere. Use only as directed. The purchase price refunded if you're not satisfied.

To relieve distress of MONTHLY

Female Weakness

AND HELP BUILD UP RED BLOOD! Pinkbath Tablets (with added iron) have been shown to be the most effective remedy for menstrual pain, backache, headache with weakness, dizziness, and other symptoms. Taken regularly, Pinkbath Tablets help to build up red blood. Pinkbath Tablets are especially for women. Follow label directions. Works trying!

SNAPPY FACTS ABOUT RUBBER

Rubber is not the sap of a tree but is the latex found in tubes that run throughout the inner part of the bark. Individual car owners can conserve rubber. Reuse tires. Check inflation pressure once a week. Check valves for air leaks. Use six months, rotate tires every 5,000 miles. Use a tire repair kit to acquire and it will keep you rolling. The Army is supplied by hundreds of thousands of rubber-tired trucks, but one which has a 20-ton axle, takes more than 7 tons of rubber to make its tires.

WEEKLY NEWS ANALYSIS

Solomons Battle Cost Mounts Steadily; WPB Slashes 1943 Farm Machine Output But Provides Adequate Parts Supply; Winter Helps Russ Defenders of Volga

(EDITOR'S NOTE: Where opinions are expressed in these columns, they are those of Western Newspaper Union members and not necessarily of this newspaper. Released by Western Newspaper Union)

While a patrol plane was on a backstop, U. S. marines are shown taking bombs from a "bomb garage" concealed in the palm grove of Guadalcanal Island. As operational flights against Japanese forces in the Solomon Islands have been stepped up, U. S. air forces have been increasingly employed.

FARM IMPLEMENTS: 20 Per Cent Slash

Farmers would not have new tractors new plows to hitch them this year, 1943, but they would have plenty of repair parts to keep their present machinery operating.

That was clear when the War Production Board issued its drastic order slashing the production of 1943 farm equipment to 20 per cent of the 1942 total, but permitting repair parts production to be 100 per cent of 1942 operations.

Forecasting industrial readjustments in other fields, the WPB order concentrates on new farm equipment output in the hands of small manufacturers in labor-short areas.

Repair parts manufacture was left to the big producers. This decision represented a victory for these companies which had held out for retention in their own plants of all the repair parts production, thus preserving the identity of their specialized, trade-name implements. It likewise represented a concession to the department of agriculture which had strenuously urged a heavy program for repair parts manufacture, while opposing any new machinery output below 50 per cent of the 1940 output.

RUSSIAN FRONT: Ally Winter Comes

Winter was one ally that could give the hard-pressed Russians immediate help. For days past the engagements burling around the front in the north and toward further south in the Caucasus had been a race against time. Thus when snow swirled across the Don, Volga steppes the Russian knew their reinforcements had arrived.

Significant was the German high command's communique that the Nazi drive in the Caucasus had been halted by continued bad weather, and that the Russians had undertaken against the north flank of the Nazi thrust into Stalingrad.

The strength of Marshal Timoshenko's relief assault from the north was indicated in the communique which said the Russian onslaughts had been undertaken with strong infantry and tank forces.

SUBMARINE MENACE: HWB Get W Orders

Rear Admiral Emory S. Land, chairman of the War Production Commission, warned the nation that "the submarine menace is going to be progressively worse this winter." Speaking before the Investment Bankers association, he said the menace would grow because of winter's bad weather and because of giving U-boats a better opportunity for concealment.

HIGHLIGHTS in the week's news

BALTIMORE: American plane production stands in great need of "man with a stick" who will speed production and prevent war costs from becoming a "pretext" for a "war economy" program. Gen. Harold G. Berry, former chief of army aircraft training and operations, has advised the army to "bring in" hardy, bird-like men who should have a separate air command.

SOLOMONS: Battle Cost Mounts

Guadalcanal with the only good airfield within hundreds of miles controls the southern Solomons, plus a sizeable air in the South Pacific. Whoever holds and uses that airfield rules that area.

The efforts of the Japs to regain the Guadalcanal airfield from its American defenders thus had strategic implications affecting the entire southwest Pacific. If the Americans held, they could protect Allied supply lines, keep the Japs checkmated and prepare to expand their offensive.

The cost of the battle was high to both sides. As planes, ships and base forces jockeyed for favorable position, the United States reported the loss of two destroyers, the USS Brien and the USS Meredith. American bombers blasted enemy ships in New Britain's harbor of Rabaul.

LABOR DRAFT: 62,500,000 Needed

Drafting of men and women for work to meet the employment armed service demand of 62,500,000 persons is "inevitable," Paul V. McNolt, war manpower director, declared in testifying before a senate military affairs committee.

McNolt listed three essentials which forthcoming manpower legislation must embrace: (1) Employers in any area must be required to hire all workers through a central draft; (2) Methods of labor utilization must be called to prevent employees from "hoarding workers"; (3) Individuals must remain on the job until they are no longer important to the war effort.

FEDERAL TAXES: 43,000,000 Will Pay

More than 43,000,000 Americans become subject to direct federal taxation when President Roosevelt signed the new war-time tax bill which congress has spent 10 months in formulating.

Designed to spend revenues of over \$25 billion dollars yearly, the new tax law is the tax load to all Americans making more than \$200 a year. Through the President's prompt action in signing the bill, the nation's new tax burden is being spread over the next 12 months by telephone service, cigarettes, telegrams and other items went into effect.

Payable next March 15 are record-breaking normal and surtax levies on 1942 individual and corporate income.

A special 1 per cent Victory tax will be deducted from pay envelopes after January 1, 1943.

FRANCE: 'Hour for Revolt'

French workers seething at the Vichy government's attempts to draft labor for the German war factories, heard three vocal soundings of revolt.

The first was the voice of Pierre Laval, who appealed for a "revolt" of French workers to cooperate with the Nazis so that "France won't be the victim of German victory."

The second was the voice of Gen. Charles De Gaulle, fighting French leader, who declared that "the hour of revolt has come." De Gaulle had urged French resistance to German rule and to bid their time until the Allies invade the Continent.

Third voice was that of American Secretary of State Cordell Hull, who said it was "gratifying to see signs cropping out increasingly through France that the people are awakening to the conditions which Laval is attempting to impose on them."

Meanwhile as Hitler had extended the time for Laval to deliver the workers, the German government's abandonment of job security promised by workers who hid out to avoid being taken to Germany.

FORTS VS. MUSTANGS: Prove U. S. Air Power

Axis air commands learned long ago to respect U. S. army flying Fortresses because of their uncanny ability to bomb strategic points at high altitude. More recently did the Axis learn to fear American-built Mustang fighter planes.

Both these aircraft scored spectacular success in a single day when Flying Fortresses struck a knockout blow at the German submarine base at Lorient, on the coast of France, while Mustang planes made history by flying all the way west to blast the Dortmund-Ems canal area.

The destructive forces of the Lorient raid were reported by Vichy dispatches which reported 100 killed and 450 wounded and considerable damage. Lorient is Germany's chief Atlantic U-boat base. Here huge concrete shelters had provided a haven for raiders of Allied shipping.

The Mustangs performed a feat no British-based single-motored fighter planes have been able to achieve, by penetrating into Germany proper.

SMUTS: Predicts Nazi Doom

Silver-pated Jan C. Smuts, prime minister of South Africa, who helped Kaiser Wilhelm flee to Germany into the lap of defeat in World War I, predicted a similar doom for Hitler's Nazi regime in World War II.

So surviving member of the war cabinet of the last conflict still in office, the venerable Smuts told a group of commoners in London.

"This is now possible because we have the advantage of three things: a terrific engine of precision destruction in our mammoth bombers; provide those bombers with such accuracy that it makes up for their lack of maneuverability and thus offers in a single unit the ability to carry out precision bombing of individual targets at the same time the ability to fight the enemy defense in the air, a combination perfected for the first time in this war."

A Comparison

To reduce this achievement to lay terms: Heretofore the big bomber which could drop tons of destruction on the earth below, was so cumbersome in the air that it was a prey to fast moving acrobatic fighter planes. Like the buffalo which could not be brought to bay by the agile wolves — the agile wolf's terrific effectiveness of the guns our bombers carry, those fighters can't bring it down to bay to damage them. The rapid pace of the planes before their fangs can seize the monster.

In addition to giving our heavy bombers the ability to give us the best of both worlds we have built pursuit planes — the agile wolves — which are sinned with some of the might of their bigger brothers.

Our pursuit planes are able to carry bombs, too, and perform some of the functions of the dive bomber — the added advantage of maneuverability.

With this equipment we have been able to make the Japanese hold on the Aleutians untenable. We have already destroyed the food stocks (and to Agattu Islands) and will probably force the Japs out of the third island, before the winter sets in.

But the Japanese did not anticipate we could bring about.

In the southwest Pacific there has been a change of plan. In conjunction with Australia, American forces have completely broken one offensive, the one directed at Port Moresby, by

EVICTIORS: Curbed by OPA

Cracking down on landlords attempting to control rent, Federal Administrator Leon Henderson ordered that no tenant in a rent control area could be evicted except under special circumstances, without three months' notice.

Mr. Henderson explained that some landlords attempting to evade rent control had tried to buy the house or had sold it to someone else willing to pay month's installments in excess of the legal rate.

Washington Digest Axis Nations Face to Face With Strong U. S. Air Power

America's Theoretical Aerial Strength Translated Into Actuality; Japanese Revise Three Major Campaigns.

By BAUKHAUSE News Analyst and Commentator.

WNU Service, 1348 E. Street, N.W., Washington, D. C.

As this is written Washington is discussing a pitched battle in the Solomon Islands and the sharp rise in American air activity over Europe. Exaggerated stories are coming in from all quarters of the globe about the activities of our planes and our planes but few civilians realize the significance of these separate enterprises. The enemy does. And the opinion of air force officials in Washington the Axis partner.

What has been brought face to face with the Axis partner is the war, that the theoretical striking power of the United States has been translated into a practical impact on the Axis partner, which is now being felt on every front.

Since the smashing victory of Midway, the Japanese have been forced to change their whole campaigns in three different sectors in the Aleutians, in New Guinea, in the Solomons.

And, as Rommel grids for another attack on Egypt, it is conceded that what might have been a victory in the drive on Alexandria was turned defeat in a not unimportant measure by American bombers and fighters.

And lastly, with the great raid on Lillie early this month, the Germans were themselves faced with the prospect of terrific destruction of their cities or the revision of their whole program of air defense.

From the beginning, the Germans knew the American has the men, the money, the resources to build the most powerful war machine in the world. But they never thought of the parts of the machine assembled in time. Now as we approach the anniversary of Pearl Harbor, they are still unable to furnish the Kaiser with the material required to make any single front, of the many we are fed, strong enough for an offensive in which there is no chance of air, land and sea. But in one arm we have developed the beginning of a superiority and for the first time we are emerging on many fronts as the growing giant of the air.

This is now possible because we have the advantage of three things: a terrific engine of precision destruction in our mammoth bombers; provide those bombers with such accuracy that it makes up for their lack of maneuverability and thus offers in a single unit the ability to carry out precision bombing of individual targets at the same time the ability to fight the enemy defense in the air, a combination perfected for the first time in this war.

Aircraft Carrier—Not Spearhead

The career of Admiral Chester W. Nimitz, Admiral Carl Sherman, naval hero of World War I, and commander of the Lexington, is the spearhead of the battle of the sea, the navy, the slugging in offensive and defensive warfare.

The admiral may be a bit prejudiced in his opinion, but after you have read "Queen of the Flaming Top" which is the story of the Lexington's epic adventures, you may agree with him. Let it be carried away by my own enthusiasm, I asked a long time of the sea what he thought about it. He pored over my copy and refused to return it. So I am going to quote his words.

"This is a fine book," he told me after he had read it. "The author, Commander Johnston, sums up my opinion on the 'fast-top' Lexington in a new era in naval warfare which will mark with the name in the Civil War. And he makes you believe it."

Johnston was in the highly enviable position of being the only reader of the time she was sent to the bottom by American torpedoes after withstanding Jap "tin fish" and direct bomb hits.

Johnston saw it all from the cockpit, as she was affectionately known.

All of our new group of naval air hero appear as a modest young run-of-mine men, in Johnston's record. He was struck by the complete lack of heroics, as he was struck during the last terrible hours aboard the carrier, with the complete lack of confusion and the outstanding bravery of the crew. It was a day when the gallant ship was a blazing inferno. This is all the more remarkable when it is known that a great many of the ship's complements were making their first trip to sea. No naval or military man is going to miss reading and studying this volume, and the civilian outsider who has any interest in the methods of modern sea battling.

BRIEFS by Baukhage

Almost 10,000 rural fire-fighting companies have been organized this year by the American Farm Bureau against destructive fires, with 100,000 men enrolled.

Marketing, processing, and distribution facilities are operating at capacity this fall, preparing the record 1942 farm production for military, lease-lend, and civilian use.

Prices are responding to rising demand, and latest estimates of the U. S. department of agriculture are that the cash farm income this year will exceed \$1 billion dollars.

The huge production of soybeans, this year on American farms has greatly relieved the fats and oils situation.

NATIONAL AFFAIRS

Reviewed by CARTER FIELD

Coming Election Has Political Insiders Guessing Again... Effect of Bus Speed Restrictions Debated...

WASHINGTON. — Though there are always upsets in nationwide elections, the political insiders are able here will not be as many missing faces as an actual result of the election. The Democrats are hoping to convene, as there will be due to primaries and conventions.

In the senate, for instance, there are very few seats open in prospect. The Democrats are hoping to retire Henry Cabot Lodge of Massachusetts, and C. Wayland Brooks of Texas, on private bills. Privately they admit little hope of any other gain. The GOP is going to track off Prentiss M. Brown of Michigan, Thomas G. Dewey of New York, and Clyde L. Herring of Iowa.

But it is very difficult to find a Democrat who is willing to bet against the rise of either Lodge or Brooks. Similarly it is difficult to find Republicans willing to lay even money against the rise of either Dewey or Herring.

Yet these are really the doubtful seats. True, there is the case of Senator George W. Norris of Nebraska, promising independent again, but with the rise of either Roosevelt and no serious Democratic opposition. There might be a change in the House, but it is all about due, on the old doctrine of the pitcher which went to the well once too often.

Politics Always Perplexing

Massachusetts politics is always perplexing and dubious. The administration is most anxious to beat young Lodge. He is too often embroiled in the mud of the mud. He is too much about the war, no since his service in North Africa, and also about domestic issues, but he has some of the smartest political advisers extant.

That is the reason the administration leaders prefer Joe Casey, for his is a pure Democratic district for his own sake, to make the try against Lodge.

Again the habits of voters over a lifetime will help Lodge. The Bay State has a long history of voting to having a Lodge and a Walsh in the senate. It is the same thing.

In Illinois the administration has been anxious to beat "Curly" Brooks, and the Chicago Tribune, FBI's pet, has just announced that he is anxious to re-elect him.

Brook's pre-Pearl Harbor record did not hurt him, apparently, in the primary. He is a strong contender for the six year term seem better than Fair. Of all the senators who have survived the primaries and conventions the one in most danger from the election season is the late Senator of Michigan, but the independent candidate of Gerald Smith, old Huey P. Long's former lieutenant, gives even him a sporting chance.

Problem: How Will Bus Schedules Fare?

Time was when any governmental activity was a matter of delay. In many cities would have been halted with loud cries of joy by the railroad executives.

But the railroad men are worried about the effect of the recent order which will hold the speed of all rubber-tired vehicles to 25 miles an hour. No one in either railroad or bus circles has figured out how to maintain present bus schedules at this reduced speed.

But the railroad men are worried about the effect of the recent order which will hold the speed of all rubber-tired vehicles to 25 miles an hour. No one in either railroad or bus circles has figured out how to maintain present bus schedules at this reduced speed.

Despite this high rate of speed on the road, the schedule of most bus lines is not particularly attractive when compared to the time of better trains between the same points.

Inter-city bus runs as fast as a train on the good stretches of road, but it loses a lot of time going through city streets to its downtown terminals.

The competing train, running on its own right of way, with tunnels in many of those cities, and few grade crossings, gains an enormous time advantage.

As every passenger on a long cross country bus ride knows, the big loss of time is not in the stops. Where a train would stay in a station only a few minutes, the bus generally stops 15 minutes or longer. It is not so much the stops on long trips for the passengers to get food. Few trains make any stops today for the convenience of its passengers. All this adds up to a situation which, beginning on October 15, will put a heavy time penalty on the bus passenger.

TO YOUR Convulsions

By DR. JAMES W. BARTON

CONVULSIONS

When a youngster has a convulsion, the first thing that usually happens is to get blood away from the head by putting the child's feet in hot water...

Dr. Barton writes that other than nervous or hysterical convulsions, convulsions is now known, one of the latest being a lack of sugar in the body blood.

In the Virginia Medical Monthly, Dr. W. W. Waddell, Jr. and T. J. Humphries, University of Virginia, Charlottesville, suggest that physicians test the value of blood sugar in children with unexplained convulsions, unconsciousness, or irritable or unreasonable behavior.

What is the treatment of these cases where testing the blood sugar reveals that a low amount of sugar is present?

Dr. Waddell and Humphries state that treatment consists of the prompt administration of glucose (sugar) in any available form; sugar, candy, orange juice, syrup by mouth or up into the lower bowel by injection into a vein.

While this is a simple method of bringing the patient back to consciousness, parents are naturally anxious to learn ways of preventing attacks. As it is known that growth or tumor of the pancreas can cause convulsions, the removal of the tumor by operation is considered. However, before operation is performed, these physicians advise tests to make sure the pancreas is at fault.

Our Mounting Life Span—And Why

The life span today is 68 years—18 years more than in 1842. When we realize that in about 1,800 years the life span was lengthened only 18 years and in less than half a century it has been lengthened 18 years, there must be some explanation for it.

The explanation is simple. It is that throughout the civilized world have passed their knowledge to practicing physicians and thus any disease that relieves a patient and prolongs life is made known. It is now known that mosquitoes cause malaria, lice cause typhus; smallpox, diphtheria, cholera and other diseases can be prevented; patients with diabetes and pernicious anemia can be kept alive for many years; the average life span of a child is about 70 years in every 200 years dies at birth or during the first year; it used to be three in every ten.

Tuberculosis does not stand high in the list as a cause of death because of the persistent and determined fight that has been waged against it. Patients with heart disease are kept alive for many years.

What has been the result of all this saving of life? This saving of life has enabled so many to realize middle age and old age that today the number of old people outnumber the number of those who are young. A recent illustration shows that in 1900 the number of individuals over 45 years of age was 47 percent of the population; in 1930 it was 47, and in 1940 it was about 51 percent. In other words, the number of individuals over 45 years of age makes up more than half the population. These figures apply to the people of the United States and Canada.

Just a few weeks ago when it was found that infant feeding was saving the lives of many infants and children, many young men and women in medicine became child specialists—pediatricians. Today and hereafter, more graduates will be trained to specialize in the care of the old—geriatricians.

QUESTION BOX

Q.—What is a cause of epilepsy? What, if any, is the cure? What is the proper and most effective treatment?

A.—Cause of epilepsy is unknown. Some cases are due to injury. Treatment is to cut down on starch foods and to eat bread and rice foods. Phenobarbital, a quieting drug, is now in general use, with good results. Dilantin Sodium is more effective, but has a reaction in some cases.

Conan Doyle Find Excites Interest Of Holmes Fans

Unpublished Mystery Yarn Is Unearthed Among Author's Documents in London.

LONDON—"Most astounding, my dear Holmes!" "That probably would have been the reaction of faithful Dr. Watson to the revelation from the family of the late Sir Arthur Conan Doyle that an unpublished Sherlock Holmes story had been discovered among some of the dusty old papers left by the noted writer which date 12 years ago.

The comment of the millions of devotees who have devoured every one of the Sherlock Holmes stories will probably be "How more wonderful, however, when they learn of the decision of Conan Doyle's son not to publish the new discovery."

The story, "The Man Who Was Wanted," was found by the author's son, Adrian Conan Doyle, in an old chest among ancient family papers of which, of recent, pre-dated Sir Arthur.

On the envelope in which the manuscript was discovered, was a note in the writing of the author, saying that he did not intend to have the story published because he did not consider it up to the standard set by the others in the Sherlock Holmes series.

Son Opposes Release. "It's not up to scratch," said his son, "and my father, who is now in the risk of disappointing his admirers by putting out a story that did not come up to the standard set by the others in the Sherlock Holmes series."

Heath Pearson, biographer of Thomas Hardy, who is preparing a life of Sir Arthur, agreed that a poorly nourished body isn't receptive to learning exposure; it is incapable of meeting the intensive requirements of physical or mental work.

"Intelligence squanders for good, well balanced food makes both child and adult fit for whatever the day may bring. A poorly nourished body isn't receptive to learning exposure; it is incapable of meeting the intensive requirements of physical or mental work."

"The opening scenes of the story 'Holmes' quarters, said Mr. Pearson, are 'quite as good as anything that Conan Doyle did, but the plot is weak.' The story, which runs six to seven thousand words, concerns the problem of finding a business executive who disappeared when he got into financial difficulties.

With Dr. Watson in amazed attendance, Holmes solves the case by a simple expedient of showing the photograph of the man to his neighbors and enemies and making those "remarkable, my dear Sir," deductions from the fact.

To Be Preserved. Mr. Pearson, for the past year has been studying Sir Arthur's writings, visiting his acquaintances and studying his ancestry and heredity in preparation for writing the new biography. It was while Sir Arthur's son was working with him sorting out and studying his father's papers that the unpublished manuscript was discovered.

The existence of the story had not even been suspected prior to its discovery. Adrian has "very definitely" said he has been lengthened 18 years, there must be some explanation for it. The explanation is simple. It is that throughout the civilized world have passed their knowledge to practicing physicians and thus any disease that relieves a patient and prolongs life is made known.

Blind Judge Decides Deaf Mute Is Innocent BUTTE, MONT.—A deaf mute is innocent, a blind judge has decided, in the case of Peace D. F. Shon on a burglary charge.

"The defendant wrote out his 'not guilty plea, and the town constable read it to the sightless judge. The judge questioned the deaf mute by asking his questions of the jury, who wrote out the questions and read the written answers to the jurist."

After a straggled crowd of city-hall onlookers had gathered around the unusual proceeding, the jurist decided the deaf mute was not guilty and released him.

Ice Cream Goes Off Menu Of U. S. Army in Britain

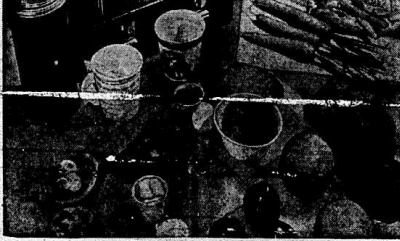

LONDON—Ice cream was taken off the menu at United States Army camps in the British Isles because of the Ministry of Health ruling that ice cream manufacturing is an essential industry.

The ministry estimated the ban would save 30,000 tons of transport and 1,000 tons of paper a year. The United States Army agreed to do without ice cream after the manufacturers, appealing the ministry's ruling, said they had to continue in operation to fill the needs of the United States forces.

Gives Mate Army Oath AUSTIN, TEXAS.—Mrs. Verda Bennett had only one husband to give to the army, but she gave him to the service. When her husband, First Lieut. Fred T. Bennett, joined the Army, Mrs. Bennett, a notary public, gave him the oath of office.

How to Hold Your Lunch

by Lynn Chambers

Pack a Lunch That Gives Them a Lift (See Recipes Below.)

Victory Lunch Box This week's menu includes Vegetable Soup, 2 quarts cold water, 1 cup chopped onion, 1 cup diced carrots, 1 cup sliced mushrooms, 1 cup green beans, cut, 2 cups diced potatoes, 2 cups tomatoes.

Do you ever realize how much the family raves over your good homemade vegetable soup? Yes, they do, and it will be especially come in the lunch box: 1 soup bone, 2 quarts cold water, 1 cup chopped onion, 1 cup diced carrots, 1 cup sliced mushrooms, 1 cup green beans, cut, 2 cups diced potatoes, 2 cups tomatoes.

Wash bone and remove all loose, small pieces of bone. Cover with water and let simmer for two hours. Remove bone from broth and cook all vegetables until tender. Season. Salads make a complete meal of lunch besides providing the day's quota of vitamins. Neatly packed in small waxed containers, salads will retain their original freshness and appeal.

Vitamin Salad. 1 1/2 cups sliced beets, raw, 2 tablespoons chopped, mixed pickles, 1/2 cup diced celery, 1 teaspoon chopped onion, 1/4 teaspoon salt, 4 tablespoons mayonnaise, 1 cup cottage cheese.

Add cottage cheese, chopped onion and salt to spinach and mix well. Chill overnight in covered waxed paper container in refrigerator. Pack cottage cheese and mayonnaise in separate small paper containers to serve with spinach mixture.

Apple Cakes. (Serves 6) 4 egg yolks, 1/2 cup sugar, 1/2 cup rind of 1 lemon, 2 tablespoons hot water, 1/2 cup strained apricot pulp, 1 egg whites, 2 tablespoons powdered sugar.

Beat egg yolks, add sugar, lemon juice, water and apricot pulp. Cook over hot water until thick. Beat egg whites and add powdered sugar. Fold into cooled, cooked mixture. Place in refrigerator until thick and cold.

Cookies with fruit or puddings folded in of the dessert course, and child or youngster is ready for a favorite cookie made with honey to keep in tune with the times are: Honey Brownies, 1 package semi-sweet chocolate chips, 1/2 cup shortening, 2 eggs beaten, 6 tablespoons strained honey, 1/2 cup sifted flour, 1/2 teaspoon baking powder, 1 egg, 1 cup chopped nuts.

Melt chocolate and shortening over hot water. Cool. Beat eggs until light colored and add honey gradually. Add sifted dry ingredients. Mix in chocolate, add vanilla and nuts. Pour into greased, waxed-paper lined 8 inch square pan. Bake 35 minutes in a moderate (375 degree) oven.

Cake Making. Bread Making? Cookie Baking? Book Your First Housekeeping You name the problem and explain it. Miss Lynn Chambers will glad to give you a special office call. Write to her enclosing a self-addressed, stamped envelope for your reply, at Western Newspaper Union, 210 South Des Moines Street, Chicago, Ill.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. Revised Newspaper Column.

Lesson for November 1

Lesson subjects and Scripture texts selected and copyrighted by International Religious Education; used by permission.

THE CHRISTIAN VIEW OF MARRIAGE

LESSON TEXT—Genesis 1:26-24; Matthew 19:3-6; 1 Corinthians 13:4-7. Marriage is honorable in all—Hebrews 13:4.

The home is not just one of the institutions of God's social order, it is a part of God's plan for man. It is thus a position of greater importance in the institutions of society, and should take first place in our thinking.

Home and the life which centers in it has lost much of its meaning and value in recent decades. It is appropriate and timely to study for a week in our Sunday-school classes the foundation principles of the home and to learn how we may hinder or help in its influence. Teachers will wish to make much of this vital series.

We begin right when we inquire what the Bible teaches about marriage, and we find the instruction plentiful and to the point. Concerning marriage we learn of 1. Its Origin—Ordained by God (Gen. 1:26-28).

Nations and states have marriage laws, and certain civil requirements must be met. But true marriage comes from the Christian viewpoint, far more than a civil contract. It is an ordinance which God Himself ordained from the beginning for the welfare of His people.

As Adam gave names to the animals (which, incidentally, tells of his intelligence and ability) they were given names by God. It became known to him that there was no true fellowship between man and beast, and that man must be a "help meet" for man, one of his own kind, with his capacities of personal being.

God quickly and adequately meets every real need of man, so He created out of Adam's own flesh one who was to be his companion. "If man is the head, she is the crown," said the apostle Paul. "The man was first defined, but the woman was first doubly refined, one move further from the earth. She was not created out of the earth, but out of his side to be equal with him, but out of his arm to be protected and near his heart to be beloved."

So God ordained marriage, but down through the ages man has failed out of Adam's own flesh one who was to be his companion. "If man is the head, she is the crown," said the apostle Paul. "The man was first defined, but the woman was first doubly refined, one move further from the earth. She was not created out of the earth, but out of his side to be equal with him, but out of his arm to be protected and near his heart to be beloved."

So God ordained marriage, but down through the ages man has failed out of Adam's own flesh one who was to be his companion. "If man is the head, she is the crown," said the apostle Paul. "The man was first defined, but the woman was first doubly refined, one move further from the earth. She was not created out of the earth, but out of his side to be equal with him, but out of his arm to be protected and near his heart to be beloved."

Because of the hardness of man's heart Moses permitted divorce (Mark 10:2-5). But God did not intend it from the beginning. The Jewish rabbis had so stretched the interpretation of that act of Moses that divorce had become almost a custom. The man was true among heathen nations.

Our Lord makes it very clear that man has no authority to divorce a partner in marriage at all, that the union of life in true marriage is by the act of God, and that no man has power to alter such a relationship. The whole trend of thought on marriage has been away from its sacredness as a divine institution, and has needed to return to the proper appreciation of it as such. It is too often, marriages are mere civil agreements, hastily made before a justice's place. We should encourage our young people to recognize

III. Its Dignity—Sanctioned by Christ (John 2:1-5). The wedding ceremony tells us that marriage "is an honorable estate, instituted by God in the time of man's innocence, confirmed by the teaching and hallowed by the presence of our blessed Lord, and likened by St. Paul to the holy union that exists between Christ and the Church; and therefore is not by any to be entered into undivorced, but reverently, discreetly and in the fear of God."

At the very beginning of His public ministry Jesus performed His first miracle as His share of a wedding. It is true that His disciples were every occasion of joy and sorrow of His people, but it seems to be significant that this first occasion for His miraculous power was a wedding.

He was there to rejoice with and to bless those who had exchanged their vows in marriage. He was not to be the unseen guest at an estate wedding? Whether in the home or in the church; whether the occasion for a happy or an estate one; whether a host of friends attend or only the witnesses—always and everywhere Jesus Christ should be recognized as the One who sanctifies by to bless, and to unite the two lives for His own glory.

It is true that the ceremony should be a Christian one, and will prayer a vital part of it, and the will of God paramount. Then, in the presence of God and man, let that which no man can put asunder.

THINGS for YOU TO MAKE

GAY little motifs—intriguing little motifs for guest level embroideries are given on pattern Z9464. Every one of these is de-

Mr. Burgess McGuire is visiting in Ohio.

Chief of Police Gains Strength On Retonga

He Felt So Bad He Could Hardly Stay On The Job, Says Chief Stratton. Eats Anything Now; Feels Stronger Than In A Long Time.

CHIEF T. M. STRATTON

Among the thousands of grateful men and women happily praising Retonga are scores of widely known public officials. For instance, no man in Pike County, Ky., enjoys more respect and confidence than Mr. T. M. (Marvin) Stratton, Chief of Police at Pikeville, who declares:
"For several months it seemed to me that everything I ate would ferment in my stomach and give such a full stuffy feeling from gases that I hardly felt like going to work. Every thing I ate seemed to have the same effect. I felt so badly most of the time that it was an effort for me to stay on the job."
"My druggist said they have more favorable comment on Retonga than any other medicine in the store, and the first bottle I took gave me lots of relief. I have taken two bottles now, and I feel fine. I eat what I want, and I feel better, and stronger."

than I have in a long time. I am glad to pass this good word on to others."
Chief Stratton's word is his bond with all who know him: Retonga is a purely herbal gastric tonic compounded from extracts of nature's own roots, herbs, and barks, and combined with liberal amounts of Vitamin B1. Accept no substitute. Retonga now, and I feel fine. I eat what I want, and I feel better, and stronger. Drug Store in Mt. Vernon, Ky.—Adv.

Sunday guests of Mr. and Mrs. Jona Stevens, were Mr. and Mrs. Ondes Stevens and children, Robert, Whitaker and son, Robert, Jr., Mr. and Mrs. Jim Steveng and children, Mr. and Mrs. Harve Stevens and children, Mrs. Jim McKinney and sons.

Melvin Genry left for camp Saturday.

Tidbits Of Kentucky Folklore

By Gordon Wilson, Ph. D.

When I was a little boy, we used to go some miles up country to pick blackberries in a large area that had formerly been farmed but had been restored to gullies, blackberry briars, and persimmon bushes.

There is a prettier side to this rather depressing picture, though it is much less common. A few farmers learned early that soil could be conserved by rotating crops. Some of the best farms I know of in Fidelity

neighborhood have been built up by careful planting and plowing, so that the fertility that I knew as a child is unimpaired and even increased. The cutting down of the acreage of tobacco has helped, too, for the intense cultivation of tobacco, in addition to the requirements for the growth of the plant, made erosions much more likely and destructive. Cover crops are now much commoner, too. It is possible that the retirement of hundreds of acres to promote growing for the future will cause individual farmers to increase their help to nature in staving a comeback, so that we may, even in my lifetime, reverse the process and have a return to trees as another staple.

When I was a little boy, we used to go some miles up country to pick blackberries in a large area that had formerly been farmed but had been restored to gullies, blackberry briars, and persimmon bushes. There are many of these areas in our immediate neighborhood, too many, but somehow they did not so impress me as this large area that had been deserted. I think I first became conscious of man's cruelty to nature on these trips, for there was no reason why those same areas should not have been farmed sensibly for years and years, with no diminution of fertility.

My very large large part of the Fidelity country was still in timber when I was a child. The sawmill was one of the commonest institutions. To it came only the best logs, for we still, in our short-sightedness, rolled ordinary logs together in the new-growth, and set fire to them. But even in my childhood I sometimes saw the tragedy of the sawmill in destroying all sorts of timber, increasing the fire hazards, and taking right out from under our nose sources of future wealth and maintenance.

After the smooth white timber had been hauled to the mill, the culled timber was disposed of in the quickest possible way to clear the land for cultivation. Many trees were girdled and left to die, every spring bringing a time when we had to clean up such trees as had fallen during the winter.

Brush was burned, the couler did its work, bumper crops were raised for a few years, and then the inevitable happened: the soil was depleted, or washed away; after a few years of poor crops, the farmer abandoned the field for another new-growth. The soil, too poor "to sprout peas," as we said, tried to cover itself with vegetation. Only persimmon and sassafras bushes seemed to be able to grow in such

thin places. The long, slow process of building back what man had so ruthlessly destroyed seemed endless to us. Often the gullies widened year by year and left the fields a menace to those further down the slope, because the soil was gone, and only infertile dirt drifted down, often to make useless other acres and to fill up ponds and not streams. Many an old swimminghole is now a bank of sand trickled of the former bass stream.

There is a prettier side to this rather depressing picture, though it is much less common. A few farmers learned early that soil could be conserved by rotating crops. Some of the best farms I know of in Fidelity

neighborhood have been built up by careful planting and plowing, so that the fertility that I knew as a child is unimpaired and even increased. The cutting down of the acreage of tobacco has helped, too, for the intense cultivation of tobacco, in addition to the requirements for the growth of the plant, made erosions much more likely and destructive. Cover crops are now much commoner, too. It is possible that the retirement of hundreds of acres to promote growing for the future will cause individual farmers to increase their help to nature in staving a comeback, so that we may, even in my lifetime, reverse the process and have a return to trees as another staple.

EYES AT WORK NEED BETTER LIGHT

In the production line or on the home front, you're working harder these busy wartime days and your eyes are working harder, too. They need all the help that better light can give them.

Time and again it has been proved in war plants that better light increases production, reduces errors, improves morale and lessens fatigue. And in the home, better light makes reading and sewing easier, speeds housework, saves needless waste of energy due to eyestrain.

Does the lighting in your home give your eyes the help they need for safe, easy seeing? We'll gladly measure it and show you how it can be improved at small cost. Ask for a free home lighting check-up today!

SEE OUR STOCK OF I. E. S. LAMPS
Especially Designed for Safe Seeing

I. E. S. Better Sight Lamps are equipped with a white glass diffusing bowl that provides an abundant, even, soft direct and indirect light without glare. Ask for a free trial in your home. See what a difference good light makes.
