

THE SUNNY SIDE OF LIFE

Clean Comics That Will Amuse Both Old and Young

PRIVATE BUCK
By Clyde Lewis

"Be a little careful getting in, Captain. I've been collecting birds' eggs!"

CROSS TOWN
By Roland Coe

"Do you deliver? I have some other shopping to do, and I don't want to wake him up."

SPARKY WATTS

"I'M ALREADY THE STRONGEST GUY IN THE WORLD... BUT MY MANAGER THINKS I OUGHTA TRAIN FOR MY COMING PRIZEFIGHT... OH WELL!"

"WHAT'S WRONG, SPARKY? YOU LOOK WORRIED!"

"I AM, MISTER—MY DOGSIE HAS STARTED BITING PEOPLE... I'M AFRAID SOMEONE WILL SHOOT HIM!"

"HERE—LET HIM BITE ME—NOTHING CAN SCARE MY SKIN!"

By BOODY ROGERS

"THERE! Y'VEE—HE HURT HIS TEETH—THAT'L TEACH HIM A LESSON!"

LALA PALOOZA — Stumped

"I DIDN'T UNDERSTAND A WORD THAT LITTLE MAN SAID."

"LALA, WHY DON'T YOU SPEAK TO BIG LOOSE EARS—HE LOOKS IGNORANT ENOUGH TO EXPLAIN THINGS IN ONE-SYLLABLE WORDS."

"HE HANST OPENED HIS MOUTH YET—I HOPE HE CAN TALK."

By RUBE GOLDBERG

"NOW, LOOK HERE, YOUNG MAN, YOU WANT US TO KNOW WHO YOU ARE AND WHY YOU'RE HERE—DON'T YOU?"

REG'LAR FELLERS — Good Customer Lost

"IT IS A PATRIOTIC DUTY TO KEEP YOUR CAR IN GOOD RUNNING ORDER. WE WILL CHECK AND OVERHAUL YOUR CAR SO THAT IT WILL RUN LIKE NEW EACH TIME YOU VISIT MACE'S GARAGE."

"ARE YA BUYIN' MACE?"

"I GOT A COMPLETE OVERHAUL JOB FOR YA, CAN YOU SPARE A SECUNDT?"

By GENE BYRNES

"FIFTH COLUMNIST! I KNOW TH' TYPE!"

RAISING KANE — The Stranger

"BOY! WATTL BEGARD SEES LIP IN THIS NEW OUTFIT? AND WHEN I TELL HER ABOUT MY NEW JOB, SHE LAUGH!"

"(MY BOORRY SOUNG, MANY BUT I DON'T NEED ANYTHING TO DO)"

"SLAM"

By FRANK WEBB

"HEY SUGAR, (IN YOUR HUSBAND'S RECIPE BOOK)"

"HUM... DO... SEE COFFEE CAKE? MOLLIE, I DON'T SEE HOW YOU MANAGE TO GIVE US TREATS LIKE THIS SO OFTEN WHEN YOU'RE ALLIED UP WITH WAS WOKS."

"I HAVE A WONDERFUL NEW RECIPE FOR COFFEE CAKE, AND WHAT DO YOU THINK? THERE ARE EXTRA VITAMINS IN IT!"

"THEY'RE IN THE DELICIOUS, TOO! BUT THOSE EXTRA VITAMINS TAKE SOME EXPLAINING. MOLLIE, NEVER HEARD OF 'EM IN COFFEE CAKE?"

"WELL, YOU SEE, DEAR... ALL THESE VITAMINS IN FLEISCHMANN'S YEAST GO RIGHT INTO WHAT EVER YOU BAKE WITH 'EM. NO GREAT LOSS IN THE OVEN!"

"WHEN I WRITE MOTHER TONIGHT, REMIND ME, BOTH OF YOU, TO TELL HER ABOUT THE NEW FLEISCHMANN'S RECIPE BOOK. SHE'LL WANT TO TRY EVERY RECIPE IN IT! AND SHE MUST SEND FOR A FREE COPY... IMMEDIATELY!"

Bluebird Towels Make Kitchen Gay

7492

A FEW cheer-up notes make housework more fun! Take, for instance, these busy little bluebirds to embroider on towels. They are quick to do—and how they brighten up the kitchen—match them to the general color scheme.

Pattn. #34 contains a transfer pattern of 6 motifs averaging 3 1/2 by 7 1/2 inches; list of materials needed.

Due to an unusually large demand and current war conditions, slightly more than the most popular pattern numbers.

To obtain this pattern send 5 cents in coin to:

To relieve distress of MONTHLY
Female Weakness
WHICH MAKES YOU CRANKY, NERVOUS!

Lydia E. Pinkham's Vegetable Compound has helped thousands to relieve periodic pain, headache, backache with weak, nervous, cranky, bilious feelings—due to functional monthly disturbance. This is due to its soothing effect on one of woman's most important organs.

Take regularly—Pinkham's Compound helps build up resistance against such annoying symptoms. Follow label directions. Worth trying!

MEDICATED POWDER FOR FAMILY USE

Spotless skin with Meppan, formerly Melesan. Diaper rash, heat rash.

SNAPPY FACTS ABOUT RUBBER

When our present synthetic rubber has materialized, a B.F. Goodrich official predicts the results will be surprising. It will cause one of the most serious stocks of synthetic and natural rubber will test the ingenuity of manufacturers and sales executives.

A substitute for rubber adhesive tape is being made. Thousands of pounds of this tape are being used to protect and reinforce airplane glass in transit to airplane factories.

Seventy-three percent of the 240,000 workers of 94 war plants is being trained to work by private automobiles. Nearly three-quarters of the cars used by these workers have Goodrich tires. Half wore out, many of them unfit for re-capping.

WEEKLY NEWS ANALYSIS

U. S. Invasion of Attu Is Second Step In Drive to Oust Japs From Aleutians; Discourt Rumors of Nazi-Italian Rift As Allies Plan Heavy Knockout Blows

PHOTO NEWS: When plans are expressed in these columns, they are those of Western Newspaper. Released by Western Newspaper Union.

Members of the delegation of the United States to the United Nations conference on food and agriculture at Hot Springs, Va. Left to right, seated: Murray D. Lincoln, executive secretary of the Ohio Farm Bureau Federation; Miss Josephine Schain; Judge Marvin...

ATTU: Second Step in Aleutians

Firmly established on Attu, westmost of the Aleutian Islands, American forces pushed forward against bitter opposition by the enemy. First to admit the American landing, the Japs also were first to confess that heavy U.S. aerial and naval bombardments provided an irresistible cover for a continuing stream of reinforcements.

RECIPROCAL TRADE: Renewal Fought

Renewal of President Roosevelt's authority to negotiate reciprocal trade agreements with foreign countries was the subject of heated debate in congress, with successful efforts to limit the life of the President's power to two years.

FOOD CONFERENCE: Post-War Agriculture

Reconstruction of agriculture in the post-war world was the principal subject of discussion among the representatives attending the international food conference in Hot Springs, Va.

WHEAT: May Increase Claiming

With some officials claiming current consumption of wheat will run 500 million bushels over the 1943 crop of 690,000,000 bushels, the War Food Administration has been debating the possibility of increasing acreage allotment next year by 20 or 25 per cent.

ITALY: No Setup

After a sudden welter of rumor, it appeared as though the Allies would have to take Italy the hard way. The Italians and Nazis gave King Victor Emmanuel a silver platter.

HOSPITAL SHIP: Sink by Japs

With a red cross sign brightly lighted and the whole vessel fully illuminated, the Australian hospital ship Centaur was silently plunged through placid waters to New Guinea.

CASUALTIES: 80,000 Lost

In 17 months of warfare, U. S. losses have approximated 80,000 men. Army casualties include 6,076 killed; 12,277 wounded; 24,345 prisoners, and 12,244 reported missing.

COAL TRUCE: Still Friends

Continuing to act in union, Secretaries of the Interior Harold Ickes and United Mine Workers' chief John Lewis arranged for a 15-day truce in the tangled mine situation.

RUMIL PLAN: In Again, Out Again

Passed by the senate, the Rumil plan was rejected by the house for the third time, in the wake of an earlier letter from President Roosevelt indicating he would veto such a bill.

PRODUCTION: On Schedule

With these words, War Production Board Chairman Donald Nelson declared the nation's booming industrial effort. Only in the matter of airplanes did he speak with reservation.

GERMANY: Ruhr Flooded

Flying at an altitude of 100 feet, four -engine British Lancasters dropped incendiary bombs in the huge reservoirs of the Eder and Mollme dams in northwestern Germany.

BOX OF CANDY AND BUREAUCRACY

A SMALL CHILD with whom I have established a friendship likes candy in a box. The mother objects to the child having more than a half-pound box.

DEHYDRATION

Scientists invented dehydration and the result got as far as Sedan, Louisiana, or rare occasions, New York.

BRIEFS

A German seamstress was sentenced to six months imprisonment when she answered an advertisement and demanded her pay in eggs and dairy products instead of money.

Washington Digest. Aliea Food Conference Envisions World Council International Group Would Be Empowered to Oversee Production, Distribution of 'Bread, And Beef' to Feed Society of Nations.

FEDERAL GOVERNMENT AND INDUSTRY CONTROL

SO FAR during the war the federal government has invested between 13 and 15 billion dollars in the creation and equipment of war industry plants. These plants have been operated by private concerns.

By BAUKHAGE

News Analyst and Commentator.

The National Planning board proposes as a post-war measure that these plants be retooled for the manufacture of peacetime products and be operated by the government as a means of surmounting the after-war unemployment problem.

In the end we would all be working for the government if we worked at all, and there would be no more jobs than would be provided by our present system of free enterprise.

HUMAN RIGHTS AND PROPERTY RIGHTS

IN THE 1930's, Leonard Wood was a candidate for the Republican nomination for President, and frequently ate lunch together at the Waldorf-Astoria in Chicago.

DEHYDRATION

Scientists invented dehydration and the result got as far as Sedan, Louisiana, or rare occasions, New York.

BRIEFS

A German seamstress was sentenced to six months imprisonment when she answered an advertisement and demanded her pay in eggs and dairy products instead of money.

HIGHLIGHTS . . . in the week's news

CASUALTIES: British losses in the Middle East and Africa have totaled 220,000 since Italy entered the war. GOOD REASON: Love-sickness was accepted as a reason for allowing an essential woman employee to leave her job in the States and take another in Pearl Harbor—beside her sweetheart.

OPAs: President Roosevelt has authorized the Office of Production Administration during the fiscal year 1944.

BOOKS: Some 35 million pocket-size editions of popular books will be published on order for the army, navy and marine corps for service men.

FOOD RATIONING

CANADA is at war, as is the United States. We are fighting the same enemies. Canada is a food-producing nation.

BRIEFS . . . by Baukhage

Victory gardeners planning to cultivate plots away from their homes will be eligible for extra rations of gasoline this summer, if they can show need for extra mileage, the OPA has announced.

HOUSEHOLD HINTS

Children Need Good, Wholesome Foods At Their Parties

Children at their parties, do a lot for their parents. They enjoy playing host and hostess as this little party is doing.

How do you rate with your younger generation? Are you content when you keep them clean, get them off to school, and give them some extra tutoring when they need it in English or math?

Yes, that in itself is a big job, and you are doing a big job if you have the part in smooth, running order. Notice, I didn't say whole job, because unless you provide for healthy recreation and play, the child is not getting his rightful share and start in life.

Future Americans must be a social as well as business success and happy. To prepare the child for this, you must provide him with a social and recreational outlet—and that means an occasional party to which to invite younger friends so the child can exercise in his role as host or hostess.

There's a certain excitement at children's parties which easily upsets their tummies, and the best way to handle them is to have nourishing, wholesome food, rather than "barfied" dishes which will upset them even more. You'll find cooperation from other mothers if you let them know you will do everything to make her children as comfortable as possible.

Let your decoration be a bit fuss and party-ish, of course, but keep to the sensible on the food. Have a few favors, of course, for the children and the children adore it. It stimulates conversation and keeps things going smoothly.

Fresh salmon steaks may be used in making the flaked salmon called for in this recipe. Serve it on small toast rounds and the children will adore it.

- *Salmon Timbales (Serves 6)
- 4 eggs, slightly beaten
- 2 cups milk
- 1 cup bread crumbs
- 1/2 teaspoon salt
- 2 tablespoons chopped pimento
- 1 pound salmon, flaked
- 1/2 teaspoon paprika
- 2 tablespoons shortening
- 1 teaspoon onion juice
- 6 toast rounds

Add butter and bread crumbs to hot milk, then stir until all soaked, add enriched white bread, cut in eggs, flaked salmon (steam fresh salmon 8 to 10 minutes, then flake), pimento, salt, paprika and onion juice. Pour into buttered tin.

Mashed liverwurst, chaf sauce, mayonnaise on whole wheat rye bread.

Mincéd corned beef or sliced tongue with horseradish on rye bread.

Comfort food, celery and mayonnaise on white bread or on celery as a garnish for salad.

Watercress on thinly sliced white bread, rolled and kept in refrigerator in damp cloth for 15 to 20 minutes.

Finely chopped eggs or brains with nutmeat, mayonnaise and lemon juice, on white or brown bread.

Hard-boiled eggs, celery and mayonnaise on whole wheat bread.

Watercress on thinly sliced white bread, rolled and kept in refrigerator in damp cloth for 15 to 20 minutes.

Finely chopped eggs or brains with nutmeat, mayonnaise and lemon juice, on white or brown bread.

Hard-boiled eggs, celery and mayonnaise on whole wheat bread.

Children's Party Menu

- *Salmon Timbales on Toast Rounds
- Celery Hearts
- Carrot Strips
- *Orange Juice with Orange Sherbet
- *Peppermint Bitter Cookies
- *Reclays Given

custard cups. Bake in a pan of hot water in a moderate oven (350 degrees) for 15 to 20 minutes. Unmold on toast rounds, garnish with parsley and serve.

Few children would pass up this delicious cheese 'n' bread dish—it's delicious and good for them, too!

- Cheese Fondue (Serves 6)
- 3 eggs, separated
- 1 cup grated cheese
- 1 cup bread crumbs
- 1 cup milk
- 1/2 teaspoon butter
- 1/2 teaspoon salt

Beat egg yolks until lemon colored. Cook cheese, bread crumbs, milk, butter and salt over low heat, stirring constantly. Add beaten egg yolks. Fold in stiffly beaten whites. Pour into a well-greased casserole. Bake at 350 degrees for 35 minutes or until inserted knife comes out clean.

An afternoon party menu may consist of assorted sandwiches.

- Deviled Egg and Cheese Sandwiches
- 3 hard-cooked eggs
- 1 tablespoon dry mustard
- 1/2 teaspoon salt
- 1 teaspoon Worcestershire sauce
- 5 slices buttered whole wheat bread
- 3 water-thin slices of Swiss-type cheese

Cut eggs, crosswise and into halves. Mash yolks and blend with mustard, salt and Worcestershire sauce, mixing well. Fill the whites. Cut eggs into thin slices and arrange on three slices of bread. Top with slices of cheese and a second piece of bread. Cut in halves and garnish with watercress and dill pickles.

Citrus fruit drink is refreshing, fine for keeping up young spirits busy at play during party time. Keep all the flavor in the orange juice.

Use a plastic vitamin C preservative when you are juicing citrus fruit. To have chilled, refrigerate before extracting juice.

Wholesome drink with a party air is this cool glass of orange juice topped prettily with orange sherbet, decorated sprigs of mint and whole raspberries. Orange float will keep you cool and full of pep, for vitamin C helps mitigate effects of heat.

- *Orange Sherbet
- 1 1/2 cups sugar
- 2 cups water
- 2 egg whites stiffly beaten
- 2 cups orange juice
- 3 tablespoons lemon juice

Boil sugar and water together for 5 minutes. Beat egg whites slowly and add to fruit juices. Mix all ingredients and pour into freezing tray of mechanical refrigerator. Freeze stiff, then beat thoroughly. Return to freezing compartment and freeze until stiff.

- *Peanut Butter Cookies (Makes 2 dozen)
- 1 1/2 cups flour
- 1/2 teaspoon salt
- 1/2 cup honey
- 3 tablespoons corn syrup
- 1/4 cup peanut butter
- 1/4 cup shortening
- 1 Apple Butter

Sift all dry ingredients together. Cream shortening and to peanut butter, honey and corn syrup. Add flour and roll dough into size you prefer for finishing. Chill for 15 minutes. Cut into thin slices and top half of them with apple butter. Cover with a second slice of dough and seal as for a tart and bake in a slow oven (325 degrees) for 25 minutes.

Are you having difficulties planning meals with points? Stretching your meals? Lynn Chambers can help you. Write her, enclosing a stamped, self-addressed envelope for your reply, in care of her, at Western Newspaper Union, 210 South Desplains Street, Chicago, Illinois. Soil Chemists Study Farm-Crop Diet Needs

Determine Extent to Which Plants Use Food

If farm crops are provided with a more substantial diet by the addition of nitrogen, phosphorus, potassium to the soil, the plants will do their part by utilizing the increased nutrients and passing them on to their human or livestock consumers in the form of needed minerals.

This was the conclusion of a special study to determine the extent which crops will use plant food when given the opportunity, conducted by Dr. George D. Scarsch, soil chemist of the Purdue University agricultural experiment station. He was assisted by Dr. D. H. Sieling, assistant professor of agronomy, and R. S. Lucas, graduate assistant.

These soil chemists used test plots on which various fertilizer treatments had been applied and plots which received no treatment whatever. Then they compared the rate of plant food used by the crop grown on these plots.

Three different locations were used for the tests. These included Crosby soil loam plots at Lafayette, Indiana, and plots at Bedford and Clermont soil loam at North Vernon. The crops studied for three consecutive years included corn, wheat, oats, alfalfa and red clover, soybeans, timothy and lespedeza.

In general, the tests revealed that crops produced on fertilized plots utilized about twice as much nitrogen, nearly three times as much phosphorus and about one and one-half times as much potassium per acre as those grown on unfertilized plots.

At Bedford, for example, a corn, wheat, soybean and hay rotation grown on a plot treated with a 3-18-9 analysis, utilized 43 pounds of nitrogen, 16 pounds of phosphorus and 29 pounds of potassium per acre. An unfertilized plot amounted to only 22 pounds of nitrogen, 4.5 pounds of phosphorus and 12 pounds of potassium per acre. On another plot where lime was added to the 3-18-9 analysis, the crops utilized 53 pounds of nitrogen, 15 pounds of phosphorus and 31 pounds of potassium. When both lime and manure were added, the plant food utilization increased to 71, 21 and 32 pounds respectively.

On Clermont soil loam plots at North Vernon, corn, soybean and hay rotation treated with a 3-20-12 fertilizer utilized 39 pounds of nitrogen, 14 pounds of phosphorus and 39 pounds of potassium per acre. Where lime was added, the utilization increased to 57, 19 and 38 pounds, respectively. The same crops used up only 18 pounds of nitrogen, 6 pounds of phosphorus and 15 pounds of potassium when grown on an unfertilized plot.

Agriculture in Industry

By FLORENCE C. WEED

Pecans

Nuts usually are thought of as delicious additions to pastries and ice cream, but the Georgia school of technology views the pecan as raw material for industry.

Charcoal has been produced from the pecan hulls. When pulverized, it has a great power in decolorizing green and other vegetable dyes. Charcoal now being used industrially. Oil has been obtained from pecan meats which has a pleasant bland taste and odor. It becomes transparent when refined by the same process used for cotton seed oil. The oil can be used as salad oil or as a substitute for fats in baking. It has been used experimentally as a basis for cold cream which commercial grades.

Ground nut shells may also have possibilities as abrasives or as a dusting powder for cleaning certain kinds of furs. They may also be useful for combining with dusting powders to kill insects.

Pecans are native to the southern states where the output is annually 20,000 to 30,000 tons. Improved varieties have been developed by selection and propagated by budding, but more than 50 per cent of the mature market are wild and seedling pecans which are native to the warm climate. Texas produces the greatest crop followed by Oklahoma, Georgia, Mississippi, Alabama and Arkansas.

Crop Protectors

Manufacturers of materials used to combat plant diseases and insects claim there will be adequate supplies of most insecticides and fungicides to protect field and fruit crops in 1943. They also say that there is a better supply of containers than last year, but dealers and farmers are asked to return to factories all usable empty containers.

A substantial increase in production of calcium arsenite has been requested by the government.

PATTERNS SEWING CIRCLE

Pattern No. 837 is in sizes 34, 36, 40, 42, 44, 46 and 48. Size 36 takes, with short sleeves, 4 yards 5/8-inch material; 8 yards broad trimming.

County Agent's Notes

FARM LABOR
Farmers who wish to secure farm labor next time, all time, or during seasonal periods such as tobacco setting, harvesting, etc., should first make plans for it in the neighborhood or community. If it can't be found there then apply for it at the County Agent's Office.

Boys and men who would like to do farm work by the hour, day, month or season or seasonal periods for emergency crops such as tobacco setting, hay harvesting, etc., should register at the County Agent's Office.

If the farmers who want work done and the boys or men who want a job get together the work may be done. This service at the County Agent's Office is all for the purpose of helping the farmers find farm labor.

A County Farm Labor Committee has been set up for the purpose of handling the farm labor problem in the county. The Executive Committee of the County-Labor Committee consists of Jesse Fish, Mt. Vernon, chairman; W. S. Stewart, Wildie, Vice Chairman; Dewey Bingham, Secretary; Livingston; The other members are: J. H. Wolfe, Disputanta; Nath Mallins, Climax; Roy Brown, Quail; S. E. Bullock, Boss; R. S. Shivel, Brookland. The County Agent's Office is open all day on Saturdays for the purpose of the farmers to make contact for information on any problem.

ally needed in the whole war efforts that farmers need to conserve their supply and use it effectively. Many farmers are of the opinion that each worker can accomplish more than normal production by changing plans, methods and practices. To this end a few suggestions are given.

1. Planning Pays
Whenever a farm operator neglects to direct, plan and supervise other farm workers he must be expending energy. Many farmers can make full hands at work and also give careful supervision to others. If the job is too big for this, much gain results from delegating certain responsibilities to other members of the family or to outside help. It may be easier for one to do some task than to train another to do it, but if the task is to be repeated many times then it is better to take time to train others as helpers. It is the total accomplishment that counts; not just that work by the farm operator.

2. Keeping experienced hands
Well experienced farm laborers are very limited. Care is needed to see that such workers are employed under conditions so satisfactory that frequent losses are necessary. One farmer bidding against another for help does not increase the number of such workers and may result in decreased wages. A bonus of some kind may be offered for those workers who stay through the year or a definite period. For a worker to have an interest in the crops of livestock which frequently increases production and reduces the number of moves.

3. Using untrained help
Much of the success of using untrained farm workers, especially youths will depend upon the attitude of employers toward them. Such workers will be living in a new situation and working with strange tools and materials. They need a chance to get accustomed to the work and should not be expected to start right off with a full schedule. Anyone learns better when he knows his efforts are appreciated. Most young people will do good work if given a chance to learn. Help them. It pays to try to understand their difficulties and let them know that they can count on you for help when they need it. Encourage them. If their honest efforts are praised, they will likely do even better next time.

4. Machinery-a substitute for manpower
Machinery can be more fully used by exchanging labor for custom machine work; exchanging one machine job for another; or by pooling labor and machinery for crew efficiency. Pooling machinery is limited. Every community will do well to get its power machinery into the fullest use practical.

MR. AND MRS. PROSPECTIVE BUYER

You have been working hard and planning for years to buy a farm home where you could live with your family free from want, free from the hustle and bustle and uncertainty of public works and public life. Now of all times is the time to act. Don't wait until the war is over and all your neighbors come home from the war jobs with their pockets full of money; all looking for the farm you have a chance to buy today at your own price. Farms will then be hard to buy and the prices will be much higher. Don't wait any longer but meet us at this sale to buy as the prices will be much higher.

Don't wait any longer, but meet us at this SALE to BUY.

TERMS ANNOUNCED

Don't forget the day and hour, Thursday, June 10 at 10 A. M. at Farm No. 1

We Honor The
Heroes of 1943

This
MEMORIAL
DAY

Memorial Day comes closer home this year. For our Nation is at War. Perhaps that neighbor boy you knew so well has just given his life, or has been seriously wounded on some far-away front. Perhaps he has been reported missing in action on land or sea.

While we pause to honor the memory of the heroes of all our Wars, past and present, let's resolve to make whatever sacrifices are required to bring about the downfall of today's would-be dictators, so that we may move forward in a better world... a world of peace.

...not if you take good care of your

Electric Iron

- TIMELY TIPS ON IRON CARE**
- Keep bottom of iron clean. Wipe with damp cloth when cool. If necessary, use mild scouring powder to remove sticking starch, but never scrape sole plate with a knife. Burned rayon may be removed with lacquer-thinner or paint remover.
 - Clean top of iron with damp cloth or mild powder like Bon Ami or Bab-O. Never immerse iron in water.
 - Avoid ironing over buttons, buckles, zippers and other hard objects that may scratch sole plate.
 - Be careful not to drop your iron. Dropping puts more iron out of commission than any other one thing.
 - In disconnecting iron pull plug at wall outlet instead of iron socket. Constant plugging in and out at iron socket wears out the terminal points.
 - Never let iron cord touch hot iron or rub continuously against edge of the board. Either will hasten cord wear.
 - If iron sticks, run it over a little salt sprinkled on a piece of old waxed brown wrapper.
 - Keep iron handle tight. A rickety handle causes cord plug to rock on terminals in socket and eventually wears out terminal points.
 - Rub the sole plate of your iron about once a month with paraffin or bees-wax. Wipe off on paper or cloth.
 - Always disconnect iron when not in use. Use heel stand or iron-rest when pausing momentarily to fold or arrange ironing.
 - Be sure iron is perfectly cold before wrapping cord around it and putting it away.

INFORMATION

SOLDIERS ON THE TRANSPORTATION FRONT

MANY men and women of Greyhound's family are performing an essential service for our country. Count among these, Greyhound Information Clerks, Telephone Operators and Baggage Men. They've taken over a big share of a big job—and are going about it with a zeal that makes us proud. Day in and day out these fellow workers demonstrate the real spirit of our forces—the spirit that nothing is so important as keeping essential wartime travelers correctly informed and on the move—keeping service at the peak with no let-down on courtesy or cooperation.

Greyhound, along with numbers of our patrons, know and appreciate the quality of their efforts. They deserve and receive full credit for a major part in Greyhound's contribution to vital wartime transportation.
