### Service Station, Hotel Pay Telephones Robbed

A thief who left a note that he'd be back broke into G. H. Highway Station, across from the Mt. Vernon Hotel, Saturday night and robbed the pay phone and cigarette machine, after first robbing the pay phone at the hotel.

The break-in at the service station occurred after midnight Saturday, while the pay station was robbed during broad daylight Saturday. Mr. Griffin also manages the hotel, recently purchased by Jesse Commins.

Patrons of the hotel report that the coin box attached to the hotel phone was still there at 9:00 A. M. Saturday, but missing at 3:00 P. M. No suspicious-looking persons were seen down the basement steps in the hotel lobby, but Mr. Griffin reports that a strange Negro hung around the service station all day Saturday. The Negro did not state his business in town, Mr. Griffin said.

The break-in at the service station was made through a window in the great room. One pane of the window had been broken, permitting the person or persons desiring entry to the phone booth. Mr. Griffin reported that he was in the room at the time.

Between ten and twelve dollars in money was taken from the pay phone, and Mr. Griffin reported that the same amount, Mr. Griffin said. The cigarette machine had been pried open, probably with a key, as he is unable to report his prize screw driver missing.

The coin boxes were pried off the telephones at both the service station and hotel, Mr. J. Dees, owner of the Mt. Vernon Telephone Company has offered \$100 reward for information leading to the arrest and conviction of the person or persons who stole his property. Mr. Griffin has taken precautionary measures to prevent another break-in at the service station.

The following article was written by Betty E. Holtzclaw, for her Literature class at Crab Orchard High School. We thought it a very appropriate tribute to Lincoln's Birthday, February 12.

### ONE NATION

"Four score and seven years ago, our Fathers brought forth on this continent, a New Nation, conceived in liberty, and dedicated to the proposition that all men are created equal."

lives died to give—our freedom. This enemy cannot be shot with bullets, it cannot be stabbed with a sword, nor can it even be destroyed by the powerful Atomic Bomb. What is this deadly being that is so destructive? Communism!

These questions and many more can only be answered by our actions in the future months and years. We cannot sit down and expect it to leave. We must fight. Fight until it shows itself, then smother it by the truth of honest men like Abraham Lincoln, George Washington, Theodore Roosevelt, Franklin Roosevelt and many others that dedicated their lives to strengthen our freedom—Our Nation.

By Alfred Sparks, Jr.

"The lowest ebb is the turn of the tide." There are so many variations of the observations made above everybody knows at least one of them. For instance, I bet you've said "It's always darkest before dawn" or "Every cloud has a silver lining" or something equally encouraging.

There's no trick to recalling these words of hope in good times—their true test is to remember them, and ride by when the tide is dark and when the tide is out.

Harriet Beecher Stowe said, "When you get into a tight place and everything goes against you till it seems you could not hold on a minute longer, never give up then, for that is just the place and time that the tide will turn." We should bear in mind there is no disgrace in finding ourselves in such a position. It can't be helped. It's never is giving up trying. If a barrier is unassailable it can always be attributed to our weakness. Once we overcome that anything is possible!

## A Sign Your Life is in DANGER

You're driving on a dark-surfaced highway. The sky becomes overcast. It begins to rain. Traffic bunches up. You strain to see. "Slippery" warnings keep you tense. Then—suddenly you pass onto light-colored concrete. What a relief! Traffic moves out. No "slippery" signs. You know you're on a safer pavement.

Yes, the difference between a sickening swerve and a safe, quick stop often is the pavement. Concrete grips tires—helps you avoid accidents. Wet or dry, its gritty texture provides uniformly high skid resistance.

Remember, no driver expects trouble but if it comes your chances are much better on concrete pavement.
