### IS IT WORTH IT?

Milk has long been the "whipping boy" when it comes to higher food prices. Some people can even remember when a quart of milk sold for 10 cents, and more can remember when the price was 15 cents per quart. They fail to remember that their wages weren't as high in those days either.

In terms of minutes of work, or "real wages", milk is cheaper today than at time on record. The average working man worked only 6.8 minutes to earn a quart of milk in 1959. This was the year a quart cost an average of 25.3 cents. In 1947, right after World War II, the same wage earner worked 10 minutes for a quart of milk, although this quart cost slightly less than 20 cents. To carry the comparison further: During the "boom" days of 1929, milk cost less than 15 cents per quart, but a wage earner worked 15

minutes for his bottle of milk. All other dairy foods are priced in about the same relationship. To make this bargain even better, the wage earner buys large portions of his food needs in dairy products. Although only 19 percent of the consumer's food dollar goes for dairy products, he receives 25 percent of his protein, 22 percent of his fat, 16 percent of his energy and 77 percent of his calcium need from this source. All this the consumer is buying at the lowest real prices in history.

A quart of milk is truly a bargain when it takes less time than a 10-minute coffee break to earn it.

(Contributed by A. W. Rudnick, Jr., Department of Dairy Science, College of Agriculture and Home Economics, University of Kentucky.)

**DON'T DISCONNECT THE MILK COOLER DURING WINTER MONTHS**

The milk cooler plays an important part in protecting the quality of milk in winter as well as in summer.

Too often when the temperature begins to drop the dairyman disconnects his milk cooler and depends on cold air to cool the milk. This often results in a poor quality product. Water will cool milk twenty-one times faster than the air. Water at a temperature of 35 degrees to 40 degrees will cool milk more rapidly than air at zero to 5 degrees F.

Besides protecting milk quality by keeping down bacteria content, the use of the milk cooler in the fall and winter will prevent the milk from freezing. Frozen milk has poor quality and is also a loss to the farmer in weight since frozen milk sticks to the can. It is almost impossible to sample since frozen milk sticks to the can. It is almost impossible to sample since and test frozen milk accurately.

**INSECT CONTROL NEEDED IN TOBACCO PLANT BEDS**

Fall is a good time to knock out certain insects that plague tobacco beds in the spring say Russell Hunt and Ira Massie, UK Cooperative Extension Service Specialists.

One such insect is the green June beetle—grubs of which can be easily killed by spraying or dusting tobacco beds with Aldrin, Dieldrin or Heptachlor. Applications now will kill these pests and keep them from over-wintering.

Old bed sites, now overgrown with second-growth tobacco, weeds, etc. harbor many insects over winter. One such pest is the flea beetle, particularly destructive pest. If it can be done with safety and without endangering nearby fields or buildings, old bed sites can be burned this fall to destroy the pest insects.

Autumn insect-spraying or dusting and even burning will clear the site of many insects that like to live through cold winters in such locations. However, most treatments now will not control pests that fly in from other locations next spring.

Hunt noted that new materials and recommendations will be made next spring on flea-beetle control.

### DON'T LET FOOD POISONING SPOIL YOUR THANKSGIVING

Lots of people get sick after Thanksgiving and overeating is not the only reason, many get food poisoning. More persons get food poisoning at Thanksgiving than at any other time of the year, yet there's no danger if you follow a few simple rules.

Stuffing for the turkey causes most of the trouble. The bacteria that cause food poisoning develop very fast in stuffing that is not handled properly. Do not stuff your turkey ahead of time and freeze it.

If you want to start making Thanksgiving, prepare the broth and refrigerate it. Then prepare the dry ingredients, but do not mix them with the broth until just before you stuff the turkey.

Wait until almost time to put the turkey in the oven to mix the broth and dry ingredients and put the stuffing in the turkey. Never stuff the turkey several hours ahead of time. And be sure to cook the turkey until it is completely done; to be safe, use a meat thermometer.

Finally, do not leave the cooked turkey at room temperature for more than four hours. Bacteria develop rapidly at room temperature and the leftover turkey or stuffing may cause food poisoning if left out of the refrigerator for more than four hours. So put the turkey back in the refrigerator before you sit down to drink your coffee and talk to your family after Thanksgiving dinner.

You would be wise to take the stuffing out of the turkey before refrigerating. Many homemakers prefer to cook stuffing inside a bird takes a long time to reach freezing temperature; during this time, bacteria develop.

their turkey without stuffing and cook dressing separately. Although dressing also needs proper handling for safety's sake, not stuffing the turkey saves time and labor in both cooking and serving.

## SCS Contest To Concern Fish, Wildlife

The subject for the Soil Conservation essay contest for 1960 is "How Fish and Wildlife Conservation Benefits My Community."

Any Rockcastle County grade of high school boy or girl may enter an essay. It should be written in ink or typed and should not exceed 1,000 words. All essays must be turned in to the office of the County Superintendent of Schools not later than Dec. 1.

The Rockcastle County Conservation District Supervisors are making the following prizes available: first - a \$25 United States Savings Bond; second - \$10; third - \$7.50.

Essays submitted by a grade student (eighth grade or below) will be eligible for first prize of \$5 and a prize of \$2.50. Essays from grade students are eligible for the larger prizes, too.

Information for the essays may be gathered from any source. Suggested sources are: school library references, Soil Conservation Service Technicians, Vocational Agriculture Teachers, County Agents, United States Department of Agriculture, United States of Kentucky or experience of local farmers and leaders.

Detailed rules may be obtained at the SCS office at Mt. Vernon.

This essay contest is sponsored by radio station WHAS, The Courier-Journal, The Louisville Times, The Department of Education and the Rockcastle Soil Conservation District.

### FHA Director Lists Good Credit Rules

Robert Wynn, local supervisor for the Farmers Home Administration, this week named four points that successful farmers follow in making good use of credit.

First, he borrows only as much as he needs.

Second, he borrows only when the price and quality when buying gives several cost estimates, and compares the relative value of new and second hand equipment.

Third, he borrows only to finance money making enterprises.

Fourth, he builds up a good credit rating. He plans his payments to come due when income will be available for debt service. He takes proper care of security property. He makes his payments when due.

Wynn said these credit principles gain yearly in importance as farming becomes more complex and farm costs increase.

## PERSONS AND PRODUCTS for the assistance of needy persons in Rockcastle County. This is part of the household furnishing, clothing and food which recently arrived at Renfro Valley. Pictured are, left to right, Mrs. Willetta Owens, Mrs. Pansy McCay, Mrs. M. G. Wood, Mrs. Grace Southard of Hamilton, Ohio, Bob Mason of Yarn Creek, Mrs. Charles Duncan, Ruffy Reiser, Mrs. Rusty Reiser, Mr. and Mrs. H. B. Wood, all of Jeffersonton, Ky.

## 3 Loads Furniture, Food, Clothing Sent To Renfro

Three truckloads of household furnishings, clothing and food arrived recently at Renfro Valley in response to the appeal made by Mrs. Pansy McCay on her radio program.

One couple who have been taken to Rockcastle County with six or eight truck loads of items for needy persons since last Christmas are Mr. and Mrs. H. B. Wood of Jeffersonton, Ky.

This couple reportedly first heard of Mrs. McCay and her work for the needy families through an article in the newspaper. They started gathering items of food, clothing and household furnishings in their basement. They bring truck loads as they are able to collect.

Mrs. McCay reports that persons request her assistance and then she investigates the circumstances to determine if there is a real need.

In one case Mrs. McCay reports investigating recently revealed a family of nine who had only two beds and no crib for a year-old infant. The baby, she said, was almost starved. It was lying on the floor on a dirty quilt when she visited the home.

This situation was broadcast and two girls in a nearby town came to Mt. Vernon and got the baby. They took it to a doctor who said the child would have to remain in the hospital some three months. It was suffering from rickets.

The family was given two beds, a living room suite and a baby bed besides food.

The father of this family was employed by a local farmer to work in hay. After working two weeks he collapsed.

When they were informed that the children could all be taken from them, two sisters came after the family and rented them a house. The sisters themselves are poor.

Another family assisted last week was one in which all members were sick. The father was hemorrhaging, according to Mrs. McCay. They were given food and coal.

Two women, one 87 the other 85, were given orders who had never owned one before.

A suit was given in one case to bury a man in.

The day before school started 16 children were waiting on the street to buy their paper, pencils and supplies, she said.

God always comes to my rescue, she stated. One woman called and said she had no coal, her family was cold and they all were sick. Mrs. McCay said, "I will pay for the coal."

All needy people are told to seek ye first the Kingdom of God and his righteousness and all these things will be added unto you," she reported.

The first package Mrs. McCay received from the Wood couple was filled with shoes. Some 200 pairs of shoes were distributed before school started this year and another load is expected sometime in January.

Other persons who have assisted Mrs. McCay are: Mrs. Willetta Owens of Mt. Vernon. She helps distribute articles. Mrs. Grace Southard of Hamilton, Ohio. She sends shoes, clothes and has formed a club for the underprivileged children of Kentucky. Members buy the dust and clothing, toys and articles for needy children. Mrs. Charles Duncan and Mr. and Mrs. Rusty Reiser all of Jeffersonton, Ky.

**IS "BANK TIME" TOO!**

There is no time of the year when bank service and protection are more needed than right after the harvest.

The farmer's funds must be safeguarded. He has many obligations to meet which can best be settled by check. There is a budget to figure for the period of winter inactivity. Banking counsel and co-operation can be most helpful. We wish to place our complete banking facilities at the disposal of our farmer friends, who know from experience of our sincere interest in their welfare.

**AUTO - LIFE - FIRE AND CASUALTY**

Kentucky motorists who have a hard time getting auto insurance-including many forced to apply for minimum coverage through the "Assigned Risk" plan-may qualify for full coverage protection under a new plan being introduced here by the State Farm Insurance Group.

Single male drivers under 25, men and women drivers over 65, and drivers of all ages with minor driving infractions on their records are targets of State Farm's new "Standard Risk" program.

In addition to making full coverage available to these groups, State Farm will offer comprehensive and collision insurance to many motorists now in the assigned risk plan. George W. Murphy, local Agent for State Farm, said the plan "will enable us to provide a far greater portion of the state's drivers with adequate protection on a voluntary basis."

The insurance may cost more than the amount most drivers pay, but there's a provision for lowering the cost through accident-free driving.

Mr. Murphy said he knew of no other way for many drivers to get full insurance protection. Only limited amounts of bodily injury and property damage liability insurance are now available to assigned risks. Those who have records of traffic convictions and accidents pay surcharges for their insurance.

Mr. Murphy said the State Farm plan "does not include the irresponsible few who should not be licensed to drive."

Mr. Murphy's office is at Mt. Vernon, Kentucky, in the Courthouse. Phone-258-2581

## Let's Give Thanks

Be thankful. Everyone has something for which to be thankful. Remember the adage, I was sorrowful that I had no shoes until I met a man who had no feet.  
Thanksgiving has remained the preeminent time of the year to count our blessings. The Pilgrim Fathers started the custom in 1621 despite the lean harvest of the summer.  
The day celebrated has been changed several times but the means of celebration has remained pretty much the same - feast on fabulous foods for a change.  
Perhaps we should be thankful if we have the will power and forbearance to resist the temptation to stuff ourselves until we greatly resemble the bird on the table. If we have ham, the likeness is even worse.  
Some of the negative things we have to be thankful for might include: Our lack of race problems - in our community, our government isn't a dictatorship, our news media aren't censored.

The past, few, beautiful days we have all been able to enjoy have served to prepare us for the long winter months which are almost upon us. Probably, most of us remember the snows we had last winter with small degrees of pleasure, if any at all. The small amount of snow has filled the air for several days now and rain has apparently had difficulty in overcoming the sunny weather. A few fires have been reported, which were caused by fires getting out of hand when fields or refuse the burning of debris in Kentucky. We refer you to C. G. Stewart, fire guard in Rockcastle County for complete details. The Signal ran an article on this subject last year.  
To bring the winter months more rapidly to mind, to us at least, is the fact that the Christmas lights and decorations installed on the city streets of Mt. Vernon, Wednesday, by employees of the Kentucky Utilities Company.

## Assistance Rises For Local Needy

Commissioner of Economic Security Jo M. Ferguson announced this week that October payments to persons on public assistance in Rockcastle County totaled more than \$40,200.  
The county's aged received \$21,279; dependent children received \$14,600; the needy blind received \$609; and the permanently and totally disabled received \$3,719.  
The Commissioner said this is the fourth month in a row that payments have exceeded the 1959 level. He said the increase is due to new money appropriated from sales tax revenue and matching federal funds for public assistance.  
Ferguson pointed out that since the sales tax went into effect in July, the state has paid needy persons a total of \$20,900 - an increase of more than 2.5 million dollars for the same four month period in 1959. At the same time, the number of people who are receiving public assistance has decreased by 2,145.  
Statewide public assistance payments totaled \$57,121,933 in October.

### UNION PUPIL

Dorothy Tyree (Continued from page 1)  
eryone for "everything you have done for me".  
She reported that she is taking spelling and accounting now. The family with whom she boards in exchange for doing household tasks are very nice, she says. She earns a small amount in addition to her room and board. They have two girls and a boy. She likes where she lives, she reports.  
A letter from Dorothy to the business college aroused the curiosity of student counciler H. L. Casada. He came to Mt. Vernon to investigate the case. He found that Dorothy was almost a straight A student in high school. Casada was sent to Ed Hunt for assistance. Hunt took this problem to John Lair.

## Cancer Film To Be Shown Dec. 2

A new film that explains how the second leading cancer killer among women - uterine cancer - can be virtually wiped out when the women's simple detection examination will be shown in the Vernon theatre at Mt. Vernon for the first time, Friday, Dec. 2, at 10:30 a.m., according to Mrs. Jack Craig, chairman of the Rockcastle County Chapter of the American Cancer Society and entitled "Time and Two Women", the film is part of a broad ASC program to speed the attack on uterine cancer. The ASC launched the attack on this site of the disease in 1936.  
Mortality from uterine cancer has dropped more than 40 percent in the 25 year period of 1930-1955. But uterine cancer still claims the lives of some 15,000 women annually, the ACS reports.  
Mrs. Craig said the film would spearhead a community-wide drive to reach all women over 21 to have a annual check-ups that include the cell examination for uterine cancer. This examination involves microscopic study by a pathologist of cells cast off in body secretions.  
This detection method for uterine cancer was evolved from the relatively new science of cytology, or study of cells. "National medical spokesmen for the Society emphasize that the cytologic approach to uterine cancer has all the potentialities of becoming one of the most effective programs the American Cancer Society has ever supported," Mrs. Craig declared.  
The ASC leader said that uterine cancer is believed nearly 100 per cent curable when it is detected in its earliest beginnings, although only 55 per cent of uterine cancers are now being cured.

After the story was published in the Bugle contributions started coming in for the fund and individuals and clubs in Mt. Vernon started helping in many ways.  
The Mt. Vernon Homemakers collected items of clothing and completely outfitted Dorothy with what one person called "as good as better clothing than any girl has left Mt. Vernon with to enter college." Many items of clothing were new and some were used. The club also contributed money.  
Councillor Casada drove to Mt. Vernon and took Dorothy back to Louisville to get her settled in school and in the home in which she is living.  
Members of the Lions Club have made individual contributions to swell the fund at the bank. The college gave special permission to allow the expenses of some \$450 to be paid by the month. To date approximately \$175 has been deposited in the Bank of Mt. Vernon for this fund.  
Dorothy's father, James H. Tyree, who is blind, has stretched a number of wires from the front door to the various places around in the yard that he wants to visit during the course of the day and by following along these wires he gets around very well. He is also afflicted with a crippling disorder of the leg.  
A member of a family of eight children, Dorothy graduated from Mt. Vernon High School in May.

Many job offers have already come in for Dorothy effective upon her graduation from the business college.  
This fund, originally begun

for Dorothy, is to be continued for other worthy boys and girls who may not be able to gain an education any other way. Persons wishing to contribute to this fund may mail their gifts to John Lair at Renfro Valley or N. M. Smock, president of The Bank of Mt. Vernon. Checks should be made payable to the Tyree College Fund.

## Census Data Helps Prove You Were Born

Last year, 4,338 residents of Kentucky turned to the U. S. Bureau of the Census for help in proving they were born. These persons were among an estimated 30 million United States residents who are without proof of age or birth. The historical records of the Census Bureau provide the only source of this information for most of these 30 million people.  
Proof of age or birth is needed today to collect social security and other retirement benefits. It is needed to obtain passports. It is needed to qualify for jobs carrying certain age or citizenship requirements. It is needed for some forms of insurance.  
Since 1920, the Census Bureau has provided more than three and one-half million persons with copies of their Census records on age, place of birth, citizenship, or kinship. Persons seeking such records of facts about themselves should write to the Personal Census Service Branch, Bureau of the Census, Pittsburgh, Kansas, for a Census Records Search Application Form. A fee of \$3 is charged for a search of not more than two censuses for one person and for one copy of the information found. Additional copies cost \$1 each. An expedited search costs \$4. Expedited searches are usually completed within a few days while the routine \$3 search may take up to 30 days, depending upon the backlog of requests and the ease or difficulty in locating the information.  
The personal information in the records of the 1900 and later Censuses is confidential by law and may be furnished only upon the written request of the person to whom it relates or, for a proper purpose, a legal representative such as guardian or administrator of an estate. Information regarding a child who has not reached legal age may be obtained upon the written request of either parent.

## Wool Growers, Keep Lamb Sales Records

Chairman William C. Bertram of the Kentucky State Agricultural Stabilization and Conservation Committee today reminded wool growers who marketed lambs this fall of the importance of keeping adequate records of their sales. These records are needed next spring for use in applying for payments under the wool program.

"I want to urge strongly," Bertram said, "that growers get these fall sales records together now and either keep them in a safe place at home or file them at the county ASAC office. Applications for payments on 1960-61 marketings must be filed by the end of next April, and may be filed any time before then."

The Chairman added that lamb feeders particularly should keep accurate records on the length of time they have owned a specific lot of lambs. Lamb payments are made only to producers who have owned lambs 30 days or more, and the amount of payment is based on weight gain on the lambs during the seller's ownership.

The sales record for lambs sold must include the name of the buyer, his signature, and the number of liveweight lambs sold, plus the description "unshorn". To encourage the customary practice of selling lambs with the wool on, lamb payments are made only on lambs that have never been shorn.

In addition to a legal hunting license the hunter must also have

a deer permit tag which may be obtained from the county clerk. The stocking of deer in Rockcastle county was completed in 1956 and the herd has progressed to 67,975 against the annual goal of \$60,700,000.

Congratulations to the following six counties and their Chairmen achieving their goals with this report: Graves, Acton, Anderson, Hardin, R. E. Gentry and Mrs. Roscoe Murray, Letcher, Herman Hale; Logan, H. O. Price; Rockcastle, James W. Lambert and Washington, Oscar Boldrick.

"The struggle to maintain the integrity of the dollar as a basis for a healthy, growing economy is a never-ending one," William H. Neal, Assistant to the Secretary of the Treasury, told members of the Kentucky Bankers Association at their Annual Convention held here in Louisville.

## Local Bond Sales Exceed 1960 Goal

The citizens of Rockcastle County purchased \$4,643 in Series E and H Savings Bonds during September, bringing the county's cumulative sales for the year to \$88,087. The County's goal is \$84,950.

In Kentucky, sales during September amounted to \$4,100, 653, which brings the cumulative figure to \$41,260,320, or 67.9% against the annual goal of \$60,700,000.

Congratulations to the following six counties and their Chairmen achieving their goals with this report: Graves, Acton, Anderson, Hardin, R. E. Gentry and Mrs. Roscoe Murray, Letcher, Herman Hale; Logan, H. O. Price; Rockcastle, James W. Lambert and Washington, Oscar Boldrick.

"The struggle to maintain the integrity of the dollar as a basis for a healthy, growing economy is a never-ending one," William H. Neal, Assistant to the Secretary of the Treasury, told members of the Kentucky Bankers Association at their Annual Convention held here in Louisville.

Mr. Neal went on to say, "Millions of people today are helping provide more savings through the purchase of United

States Savings Bonds, of which there are \$42.9 billion now outstanding."

"The Savings Bond statistics have shown a remarkable consistency for the past five months, with increasing sales and decreasing redemptions as compared with the corresponding months of 1959. This indicates a positive trend in the right direction on the part of savers and investors."

"We can only conclude that the advantages of the new Savings Bond are becoming more apparent to the American people as time goes on."
