ART ROBERTS, President & General Manager

She's one of your best customers!
She buys \$84,000,000 worth of food and services from you every year!
There are approximately 560,000 dairy cows on Kentucky's farms now and each one of them spends \$150 per year on feed and services.
And what has made the dairy cow such an important customer? Many things, but chiefly... low cost rural electricity. Rural electricity made possible automatic milking machines, separators and huge milk cooling tanks. These, in turn, made possible today's big, high-profit dairy farms and herds.
As the farmer's herds increase in size his need for off-the-farm purchases increases too. As his profit from his bigger, better farming increases, his ability to buy more things for his family, his farm and himself increases also. And when the farmer and his cow-go shopping, where do they go? To the towns and cities of Kentucky.
Kentucky's farmers originally built their rural cooperatives for one purpose only... to get the electric power they could not buy elsewhere! Out of their cooperation has grown a force powerful enough to keep Kentucky's prosperity growing.
Jackson County Rural Electric Co-op.

Vernon Cummins has been employed at Baker Buick - Rambler Sales for the past 12 years.

It is hard to say whether Vernon's immaculate appearance or charming personality has contributed most to his success.

Lester Anderson, a brother-in-law of Vernon, has been added to the staff of Baker Buick - Rambler Sales.

Lester recently moved from Aberdeen, Md., where he was employed. From all appearances he will be a happy addition to the Baker Buick - Rambler staff.
