Why the swing to Methy!

It's an important gasoline discovery! Methy* steps up octane performance so effectively that it stops power-wasting knock better than any other antiknock compound. Methy spreads more evenly throughout all cylinders of your engine, stands up under extreme temperatures. And it's in Standard gasolines (Crown and Crown Extra) . . . at no increase in price! Another important way that we take better care of your car.

Fitness starts here

Yes, fitness and health start with nature's own protein foods — refreshing milk, tangy chesses, and country-fresh butter. And the men who start it all are our own dairy farmers. They're nature's partners in bringing us nature's most perfect foods. Without them, eating wouldn't be half the fun... or half as healthy, either!

To All Of You Thank's

We at Armour Creameries take this occasion — JUNE DAIRY MONTH — to thank each and everyone of our milk patrons for their confidence and loyalty. We also want to include our business associates and our friends in the state and federal agencies serving agriculture. Their cooperation is greatly appreciated.

On our part, we pledge our best efforts to the manufacture of dairy products that meet the highest quality standards and provide a profitable and enduring market for milk producers of this area. We will strive to expand these markets. With all of us working together, dairying can become a still greater factor in the economic and social life of Central Kentucky. Let's make every month DAIRY MONTH.
