Walk in, America.

You'll have a hard time finding a wagon as easy to get into as a 1970 Chevrolet.

Try it sometime. Climb into any other wagon, then climb into one of ours.

With a rubbered stair built right into the bumper.

Chvrolet wins in a walk: With a dual-action door that swings open without any jutting hinges.

With a roof that slants thoughtfully forward so you won't hit your head.

Look into a walk-in at your Chevrolet dealer's. Putting you first, keeps us first.

LOCAL JAYCEES RECEIVE TWO AWARDS

The Rockcastle County Jaycees have been presented a Community Development Award by the U.S. Jaycees, and a Connecticut Mutual Life Blue Chip Award.

The Community Development Award cites the local Jaycees for designing action projects to alleviate needs found by analysis of the community.

The Blue Chip Award was presented to the local chapter for excellence in achieving growth and meeting qualifications of chapter management and leadership training.

The two presentations were made to Joe Mullins and Bill Kelsey of Mt. Vernon, members of the local Jaycee chapter who attended the Jaycees State Board Meeting at Owensboro the latter part of August.

IN MEMORY OF
THE 1,700,000 AMERICANS
WHO DIED FOR NOTHING

Here, at a time of remembrance, is our monument to the monumental folly of automobile drivers. Dead in a massacre that has taken 1,700,000 lives since 1900, and continues unabated today.

Think about it: The body count of Americans killed in action in all of America's wars since 1775 stands at 638,000. And in 69 short years, motorists have surpassed that stunning figure by over a million, men, women and children.

All of them dead.

Violently dead.

Agonizingly dead.

And for what?

For the sake of an extra martini?

For the thrill of passing a car on a blind curve at 67 miles an hour?

To save 15 seconds by jumping a light?

Before this year is over, one out of four cars in this country will be involved in an accident.

The lucky occupants will get a scare and go through the infuriating process of filling out all the insurance forms, getting repair estimates, and putting their cars up in a body shop for a few days.

They also won't get to where they were going in such a hurry.

All the other richpooroldyoung people will be dead (or wishing they were dead).

It doesn't have to happen to you.

But your protection won't start until you realize that it can happen to you: That, in less than a second, your car can be turned into a smoking hulk of broken glass and twisted steel.

That men with acetylene torches may have to cut your wife or kids out of it.

That flashing red lights and wailing sirens can come for you. Or yours.

That all you cherish (your life, or theirs; your well-being, or theirs) can be lost in that single instant.

Some people simply don't have the guts to imagine themselves in such anguish. Yet we're asking you to imagine it every time you get into your car. (If that sounds morbid, it's nothing compared to the possible alternative.) Because without a certain amount of healthy fear, there's no reason to do any of the things that can prevent the tragedy.

Like using your seatbelts. (They really do save lives, not to mention eyes, noses, and other personal possessions.)

Like the simple act of keeping a rag in the car for cleaning your windows and headlights. ("I never even saw him, officer.")

And having your brakes checked regularly, and replacing worn tires. And doing all the other little things you know about and don't bother about.

Aren't you worth the bother?

Please drive safely.

Harold D. Rogers Selected Commonwealth Attorney

Attorney Harold D. Rogers, of Somerset has been elected by the Republican State Central Committee to serve as Commonwealth Attorney of Rockcastle and Pulaski Counties.

The post was vacated recently by Homer Neikirk, who was appointed to the Court of Appeals by Governor Nunn on the death of Judge Morris C. Montgomery. Neikirk had won re-election in the May primary by defeating Pleaz Mobley. There was no Democratic opposition.

Upon Neikirk's appointment to the Court of Appeals, Rogers was chosen by Gov. Nunn to fill the two-county Commonwealth Attorney post for the next six years; however, in a vote by the Republican chairman and chairman of each county, there was a split between Mr. Rogers and Rockcastle Attorney James W. Lambert. Under the rules of the Republican party, it was then up to the State Central Committee to elect Neikirk's successor. The Democratic party cannot put a candidate on the ballot until the six-year term, originally won by Neikirk in May, has expired in 1975.

BIOLOGY FOR THE MODERN MIND, by Hans Joachim Bogen. Over the past few years one of the most rapidly exploding fields of research has been the field of biology. This is an account for the layman in an area of research important in his life and well-being.

BLACK HEROES IN OUR NATION'S HISTORY, by Phillip T. Dorman. Arriving with the conquistadores, black men have participated in every important event in America's growth, from

Bunker Hill to Vietnam. This volume brings to light some of the unsung but nevertheless vitally important heroes in American history.

HORSE AND BUGGY WEST, by Jack O'Conner. Jack O'Conner chronicles his early years in the Territory of Arizona, a part of the emerging West. Although it was the early Twentieth Century, the town still retained the flavor of the Old West and O'Conner's recollections bring memories of that exciting time of growth in the Nation's history.

IT'S A LONG WAY FROM CHESTER COUNTY, by

Eddy Arnold. One of the most popular of today's vocalists in the field of country music is Eddy Arnold. This is his autobiography, the story of his struggle to the top, the people he finds there, and the work involved in maintaining success.

J. EDGAR HOOVER ON COMMUNISM, by J. Edgar Hoover. Communism has been proven one of the strongest movements in the world today and has long been one of the most feared by the Americans. One of the foremost opponents in the United States for almost half a century has been J. Edgar Hoover and this volume is the result of his long study of the matter, containing quotes from his speeches and writings.

MORE HOMES FOR GOOD LIVING, by Royal Berry Wiley Associates. A useful guide to contemporary use of the New England house concept in modern building.

THE MUSIC HUNTER, by Laura Boulton. Believing

that music is an universal language, Laura Boulton has searched throughout the world to discover and record the music of peoples in little known parts of the world. This volume not only records some of her findings, but is also a record of the search itself.

THE PLACE OF SAPHIRES, by Florence Engel Randall. Three women inhabit the hours - two living and one dead, but seeking to live again. This is a suspenseful novel of horror and of haunting.

VIETNAM, LAND OF MANY DRAGONS, by Hal Buell. The average man in the United States finds it hard to understand the reasons behind America's involvement in Vietnam. This work is an excellent effort at explaining both the history of our involvement and how Vietnam's history affects it present day problems.

THE WORLD OF THE GRIZZLY BEAR, by W.J. Schoonmaker. One of the animals close to extinction in America is the Grizzly, a mammal which usually weighs 1,200 pounds or more and stands 10 feet tall. This volume follows the life cycle of the Grizzly and explains his life and the part he plays in the world around him.

CHANTICLEER, by Henry Chofetz. Chanticleer believes that his crowing brings the sunrise and is well loved by everyone. However, he is not so popular among the animals of the night. It takes a series of adventures, some quite dangerous, to prove his actual worth. Grades 2-4.

ELECTRICITY, by Edward Victor. A Beginning Science Book, this is a simplified handbook for young people on electricity, one of the most vital devices of the modern world.

Vocational School News

Radio & Television Inst.

The radio and television repair class at our school is well into their work of the basic fundamentals of electronics. We are well pleased that the shop is equipped with some of the latest and most modern electronic equipment. We also are fortunate to have a good number of students enrolled. At the beginning of the school year, it looked as if the interest in Radio and T.V. Repair was not what we had hoped for. However, as the school opened and more people learned of the program, students started to enroll in our class. We now have high school students from all the local schools for one-half day and adult students for one-half day along with some full time adult students.

Our main objective is to offer a complete course in Radio & T.V. Repair so that the student upon completion of the course, could go out and get a job in his

trade or set up his own Radio & T.V. Shop.

At the present time the class is studying the color codes as used in the electronics field. Also they are doing actual work on radios and phonographs. Later they will progress to the television repair to include color t.v.

In general, the students are showing interest in the class and are progressing in their work with remarkable improvement. Since there is a great demand for skilled technicians, we feel that this school has much to offer and can serve a very worth while purpose.

"We were afraid converting to electric heat would lead to high operating costs," say the Reynolds of Rte. 2, Madisonville. "But it's only \$106.00 a year!"

We expected to pay well for the peace-of-mind comfort you get with flameless electric heat, says Kenneth Reynolds. But it was sure a nice surprise to find the cost much less than we imagined - with some real savings in our freedom from service and repairs.

The wonderful cleanliness of our electric heat was no surprise to me, says Mrs. Reynolds. After using electric appliances for years I know that flameless electricity just doesn't make soot, film and dust.

In the early twenties, the automobile dealers began to dress up their cars with accessories and shiny gadgets to make their products more attractive and inspiring. Headlights and radiators were nickel plated, ordinary black tires were replaced with white-wall tires, and some cars were equipped with mirrors on the fenders and spotlights through the windshield.

Accessories are still present on our modern automobiles today. Some are practical, some are just ornamental and some are even essential but most are new variations of the old styles.

The wonderful thing about a mobile home is, that it is beauty in itself. Every modern feature of the mobile home, while being the ultimate in eye appealing beauty is also practical and essential. The Star mobile home is available, in three distinctive styles.

Paw Paws Ripening Down On The Farm

Paw Paws, like peaches, do not happen every year, but this happens to be one of those years. Right now in many rural localities around the state, this fragrant member of the custard apple family is beginning to ripen and from now until October will be avidly sought by many gourmets acquainted with the better things of life. Just as assiduously too, it will be searched out by possums, foxes, and racoons who likewise have a taste for this wonderful wild fruit of sentiment and history.

North American Indians called the paw paw "assimin" from which comes the botanical name, "Asimina triloba," a handle credited to early botanist Michel Adanson. It was cultivated by the Creeks and Catawba Indians who used its pleasurable inner bark for weaving a kind of coarse cloth. They also used the crushed seed which contains a powerful alkaloid for stupefying fish.

Then history records that in 1541, when Hernando DeSoto was exploring the Mississippi Valley, his expedition, running short of food, was saved from starvation by the paw paw.

The paw paw prefers to grow on fertile hillside benches and alluvial bottomlands along secluded streams. It is characterized by a smooth grayish-green bark and tropical-looking dark green leaves which, in autumn, turn to a brilliant yellow. It blooms in early spring with flowers green like the leaves. Then these cupshaped flowers

year-happy recollections to because no one who loves paw paws can eat one without being happy.

Like the glorious persimmon and the wild grape, the paw paw is distinctly plebian and was once called the "poor man's banana." But even though the fruit is of lowly origin, a lot of people in high places have a taste for it, and never an autumn goes by when they do not wish they could again wander over the hills of home in search of it.

There are many other fruits good as the paw paw but probably none is more enshrined in sentiment, especially here in Kentucky.

Beef Cattle Check-List for September

1. Keep salt, calcium and phosphorus available free choice for all cattle.
2. Continue to use back-runners, sprays and systemics for external and internal parasite control.
3. If you have not yet treated for grubs, get it done. Regardless of method used (spray, dipping, feeding, or pour-on), follow directions. Additional information may be obtained by contacting your area beef specialist.

4. Heifer calves born in March and April should be moved from the cow herd if the herd sire is running with the herd.

5. Many calves will be weaned during September and this is a good time for treating for grubs, vaccinating for blackleg and malignant edema, dehorning, and if calves haven't been cast-nated, get it done.

6. If you plan to buy stocker cattle this fall you should be up-to-date on cattle prices according to weight, grade, breed, and sex. When you get them home give them plenty of fresh water, then make salt, calcium and phosphorus available, free choice. Watch your cattle closely for a couple of weeks, then implant all steers with 24 milligrams (two pellets) of silbestrol, dehorn if necessary, vaccinate for blackleg and malignant edema (if needed), and rotate pastures each 21 days. About 15 pounds of medium quality hay or 20 pounds of good corn silage will allow them to gain about one pound per day. One-half pound of soy bean oilmeal or cottonseed meal with the silage will give a good balanced winter growing ration.

Barley Will Be Included in 1970 Feed Grain Program

Barley will be included in the 1970 feed grain program, it was announced by the U.S. Dept. of Agriculture. The decision to include barley in the program follows the September 10 crop report which indicates a record new national average yield of 44.4 bushels per acre.

Until 1960, annual barley yields since 1866 had averaged less than 30 bushels per acre. In 1960, the crop average was 30.9; in 1965, it was 35.1; in 1967, 40.6; and this year, 44.4. Although harvested acreage has been declining, the larger yields have resulted in production increases.

Currently, the 1969 crop of barley in indicated to be 416 million bushels. Carry-over as of July 1 this year was 198 million bushels—up about 60 million bushels over a year earlier. The total supply would be 624 million bushels for 1969-70. Total utilization in 1968 was 368 million bushels. It appears a further increase in carryover is probably as of July 1, 1970. Other provisions of the 1970 feed grain program will be announced in the near future.

BOURBON IRON WORKS—The remains of the old iron foundry evoke a picture of past days in Bath County when six foundries there provided most of the iron for Kentucky and the settlements west of the Alleghenies in the early part of the Nineteenth Century.

Engagement Announced

Mr. and Mrs. Earl B. Payne of Cordele, Georgia announce the engagement of their daughter, Carol Ann, to Private Denny Labron Cox, son of Dr. and Mrs. Arthur Lee Cox, also of Cordele.

Pvt. Cox, also a Crisp County High School graduate, is presently serving on the U.S. Marines. The wedding will be an event of October 10 at the Antioch Baptist Church. Miss Payne is the granddaughter of Mrs. Fatha Overbay and the late Mr. and Mrs. W. T. Payne, all of Pine Hill.

Social Security

An estimated 30,000 disabled widows throughout the country, age 50 and over, are now collecting social security benefits under a 1967 change in the law.

James Mustian, social security manager in Somerset, said today that before this change in the law, these widows could not have received payments until they were at least 60 years old.

In general, Mustian said, a widow age 50 or older, whose husband was insured under social security, may receive these benefits if her disability started before her husband's death or within 7 years afterward. If, however, she received benefits as a widow with children of the worker in the disability benefits if she becomes disabled while receiving the other benefits or within 7 years after those benefits ended.

The benefits are lower than the amount that would otherwise have been payable to them at age 60 or later, Mustian said, to take account of the longer period over which they will be receiving payments.

Many of those now receiving the disabled widows benefits did not think they

would qualify for them when the change in the law became effective last year. Some did not apply until urged to do so by family or friends, Mustian said. Only the last 100,000 beneficiaries can be retroactive for up to 12 months prevented them from losing some benefits, he added.

There may be disabled widows living right here in Bath County, who could qualify for these payments if they applied. He urged anyone in doubt to check with the social security office. If the person is too disabled to pay a visit to the social security office, someone from the office can be sent to the home.
