

Total hay production in the United States in 1969 was 127 million tons, according to New Holland, the farm equipment division of Sperry Rand.

American agriculture's assets now total \$307 billion dollars.

## 35th Observance of June Dairy Month

By: H. Lee Durham

June Dairy Month celebrates its 35th consecutive observance this year in Kentucky and as a nationwide promotion with a salute to the dairy industry. June Dairy Month is a time of recognition by the nation of the dairy industry's vital contribution to the health and welfare of America.

With major dairy groups spearheading the observance, it has grown into the largest single dairy food sales and information campaign of the year, with increasing support from associated businesses. June Dairy Month is a time, on the local level, to point out the importance of dairying to Rockcastle County.

Farming is the principal industry in this county with some 66% of the people employed in agriculture. The agricultural income in Rockcastle County exceeds five million dollars with approximately \$5.00 coming from tobacco. Dairying is second only to tobacco with an annual income of approximately \$1,000,000.

The county dairy industry follows the state and national trends with declining milk cow numbers and higher producing cows. However about as much milk is being produced now as when more people were in the dairy industry, and when cow numbers were larger.

The traditional observance of Dairy Month will take place again this year in Rockcastle County with special emphasis

on dairy day scheduled for June 15 on Main Street in Mt. Vernon. The annual event, since 1961, will be highlighted by a parade, appearance of Miss Mary Lois Kephlinger, State Dairy Princess, crowning of county dairy princess, recognition of outstanding dairy leadership and drawing for dairy haffer donated by The Bank of Mt. Vernon.

June Dairy Month is a coordinated effort to awaken people to the need for proper nutrition and diet habits, including consumption of milk and milk products as recommended by leading authorities. June is Dairy Month, a perfect time for our community to "speak up" for dairy foods. It should be a time to build food habits that will last year by year for a lifetime.

Prosperity follows the dairy cow. Walt Whitman once wrote: "The dairy cow's a thing of charm. She lifts the mortgage from the farm..."

\*\*\*\*\*

(Cont. From Front)

The graduate courses will be offered in all of Eastern's master's degree programs toward the specialist degree in technology and education, and in several fifth and sixth year programs in education. These groups are eligible to enroll for summer school at Eastern: graduates of standard high schools, students in good standing from other colleges, graduate students, and mature students who are not applicants for degree.

## Cumberland Grads Include 2 from Here

Saturday evening, 238 Cumberland College seniors marched through commencement exercises at Gatiff Gymnasium. Included in this number were two students from Mt. Vernon, they are David Lee Hansel and Clarence Wayne Vansant. Reverend John R. Claypool, president of the Kentucky Baptist Convention, challenged the students to leadership at a Baccalaureate service at the First Baptist Church in Williamsburg.

Cumberland's graduating class of 238 is the largest of Kentucky's private colleges this year.

## Local DAR To Honor Rev. Soldier

On Sunday, June 13, the Rockcastle Chapter DAR will honor a Revolutionary War soldier of this area in a special commemorative service. A bronze marker will be placed on the grave of Pvt. David Moore, who served in the company of Captain Kirk of Virginia during the American Revolution. His descendants include the Crawford families of Rockcastle County.

The ceremony will begin at 2 p.m. in the Moore family cemetery, located on the Charles B. Mays farm near the Kingston-Boltown Road in Madison County. All DAR members and guests are asked to meet in the Depot parking lot and be ready to leave Mt. Vernon by 1 p.m. on Sunday, June 13th.

## Carter Announces E.D.A. Designation

Congressman Tim Lee Carter today announced that the Economic Development Administration has designated an eight county area of Kentucky as the Cumberland Valley Economic Development District. The counties in this district are Bell, Clay, Harlan, Jackson, Knox, Laurel, Rockcastle, and Whitley. They are now eligible for federal assistance in planning and carrying out programs to create job opportunities.

# Ohio Co-Ed Represents Nation's Dairy Farmers

Representing the nation's dairy farmers is quite a responsibility, but 20-year-old Jane Logan has proved that a pretty college co-ed can handle the job with confidence. Jane, a student at Ohio State University, was crowned American Dairy Princess in Boston last July at the 16th Annual American Dairy Princess Contest.

In addition to her sparkling tiara and the traditional long-stemmed red roses, Princess Jane received a \$2,000 cash scholarship to continue her education in food and nutrition at OSU. The blue-eyed brunette was selected on the basis of appearance, poise and knowledge of the dairy industry from candidates representing 30 states.

Jane has a thorough background in dairy farming—her parents, Mr. and Mrs. Jack Logan, are dairy farmers who own a 390-acre farm near Mount Gilead, Ohio. Their herd of 80 Holstein cows produces 950,000 pounds of milk annually.

The coronation festivities sparked a year of activities for the First Lady of the dairy industry as official representative of American Dairy Association's more than 200,000 members. While continuing college, Jane appeared on "The Mike Douglas Show" where she took part in a milking contest with Jane Wyman and Martha Mitchell; graced International Milk Day in Buffalo, N.Y.; addressed the Associated Milk Producers, Inc. meeting at Texas A & M College and the 16th Annual 4-H Dairy Conference in Madison, Wis.; and participated in numerous other dairy and farm organization functions.

A busy June Dairy Month schedule, including the crowning of her successor, will conclude Jane's reign as American Dairy Princess, leaving her with fond memories of her year as representative of America's dairy farmers.

## "HENRY HOSKINS" (Cont. From Front)

of Brodhead; one daughter, Mrs. Florence Winstead of Brodhead; two sons, Mattison Hoskins of Brodhead and Floyd Lee Hoskins of Indianapolis, Indiana; six sisters, Mrs. Lettie Fortuno of New York, New York, Mrs. Roxie Saylor of Cincinnati, Ohio, Mrs. Maggie Saylor of Paoli, Indiana Mrs. Daisy Little of Fairborn, Ohio, Mrs. Naomi Brummett of Ohio and Mrs. June Genton of Crab Orchard; three brothers, Sam Hoskins of Mt. Vernon, Edd Hoskins of Crab Orchard and Beav Hoskins of Greensburg, Indiana and nine grandchildren.

Funeral services were held Monday, June 7, at the Brodhead Baptist Church by Bro. John Zapanic.

Burial was in the Piney Grove Cemetery.

Watson Funeral Home in Brodhead is in charge of arrangements.

**Party Garnishes**  
For special party touches, garnish milk coolers with mint or citrus slices dipped in sugar. Make fruit kabobs for stirrers. Just thread pineapple chunks, cherries and pieces of your other favorite fruits on wooden skewers. If your milk drinks are minty, add a peppermint stick for fun. Add a dollop of whipped cream and a dash of cinnamon or nutmeg or a sprinkle of colored sugar. Top with fresh berries or grated chocolate or lemon peel. Use your imagination.

The average American family of four eats more than 2 1/2 tons of food per year.

## Patio Party with a Dairy Flair

Celebrate national dairy month in June with a patio party featuring all-American dairy foods.

What's more all-American than steak and corn-on-the-cob, both brushed with lots of melty butter? And what's more suitable for a cook-out these warm, sunny days? Steak takes on a new twist in this all-American menu with the help of golden Cheddar cheese. Cube steaks are rolled around Cheddar cheese sticks and dill pickles, placed on a grill, brushed with real butter and grilled 4-5 minutes on each side.

### STEAK ROLL-UPS

8 cube steaks, 3 1/2 x 5 inches (about 2 1/2 lbs.)  
1 teaspoon seasoned instant meat tenderizer  
8 Cheddar cheese sticks, 4 x 1/2 inch  
8 dill pickles  
Melted butter  
Moisten both sides of meat with water and sprinkle tenderizer evenly over entire surface. Place a cheese stick and pickle on each steak. Roll and fasten with metal skewers. Place on grill, skewered side down, 4-5 inches from coals. Brushing occasionally with butter, grill 4-5 minutes; turn and grill 4-5 additional minutes or until desired degree of doneness. Makes 8 servings.

### CHARCOAL ROASTED CORN ON THE COB

Pull husks back, remove silk, brush corn generously with melted butter seasoned with garlic or your favorite herbs. Replace husks and place ears on grill. Either roast 15 to 20 minutes, turning three or four times to expose all surfaces to heat, or steam by placing a damp burlap sack over the corn. Let ears grill 10 minutes on one side, remove burlap, turn

ears, recover with redampened sack and grill another 5 or 10 minutes. Serve with plenty of butter, salt and pepper.

### HERB BUTTER SAUCE

In a small saucepan melt 1/4 cup (1 stick) butter. Add 1/4 teaspoon salt, 1/4 teaspoon paprika, 1/4 teaspoon leaf thyme and 1/4 teaspoon leaf marjoram and mix well. Pour or brush over ears of corn before or after cooking. Makes 1/2 cup of sauce.

A cool, delicately-flavored salad mold is the perfect contrast to the more robust foods fresh off the fire. Surrounded by relishes and cold vegetables, this cottage cheese mold becomes an elegant centerpiece for your cookout tableau. The tang of dairy sour cream and lemon make this salad a most refreshing addition to any summer meal.

### COTTAGE CHEESE MOLD

1/2 cup water  
2 tablespoons unflavored gelatin (2 envelopes)  
2 cups cottage cheese  
1/2 cup dairy sour cream  
3 tablespoons lemon juice

1 teaspoon grated onion  
1/2 teaspoon salt  
1/2 teaspoon paprika  
1 1/2 cups milk  
Sprinkle gelatin over water to soften. Over low heat dissolve gelatin, stirring constantly. Beat cottage cheese until fairly smooth; add sour cream. Blend in lemon juice, onion, salt and paprika. Gradually add milk; then gelatin. Pour into a 5-cup mold; chill until firm. Unmold; garnish top with chopped parsley. Makes 8 servings.

For dessert at your patio party, give guests their choice of something light or something rich. The something light? Fresh fruit served with sour cream. Layer available fresh fruits, washed and sliced, into an interesting container. A giant brandy snifter, for example. If you use peaches or pears, brush slices with lemon juice to prevent darkening.

Serve your fresh fruit medley topped with sour cream, plain or flavored. Add 1 tablespoon light brown sugar and 1/4 teaspoon cinnamon to one cup of dairy sour cream. Or, if you prefer, add 1/4 cup confectioners sugar and 2 teaspoons vanilla to 2 cups dairy sour cream. This same recipe takes a different twist if you substitute 1/4 cup orange juice and 1 teaspoon rind for the vanilla.

## Good Pasture Land Dairy Requirements

Roy G. Brown, Field Representative Cumberland Production Credit Ass'n. and President of the Rockcastle Co. Livestock Improvement Association.

Again our annual June Dairy Month is here. We can look back through the year and find that Rockcastle County has been a very prosperous dairy county.

During the month of June, Nature is the most beautiful. "Mother Nature" has waved her "magic wand" and turned everything green spreading a most enjoyable fragrance throughout the atmosphere. The green fields are dotted with cattle grazing the pastures, which reminds us of the care and management of the forage crops.

and expense to develop them. One of the first requirements in order to acquire such pastures would be to have a soil test. This tells us the chemicals involved in the make up of a rich soil, which are lime, potash, phosphate, and nitrogen. The next step we need to take is to consider whether we are establishing new pasture or renovation of old pasture. New establishment needs a good seed bed prepared early in the spring. Then we need to acquire the lime and fertilizer and proper mixture of grasses and legumes that will give the most return. One way that is often neglected in improvement, which will more than double the return per acre, is the renovation of pasture land hay. This can be started in the fall or early winter. Again the first step you should take before doing such is to have a

soil test to find the need of right liming and fertilizing application. Renovation can be done with different types of equipment, the main thing is to destroy about 60% of existing grass. This is easier done by close grazing. The seeding needs to be done in early March with the legumes that will produce the most forage for your dairy cows in order for them to produce more milk. Although pasture renovation is very important in making our county more beautiful and enjoyable county, we should begin now to make the month of June a more meaningful month of the year by starting a "Cleanup and Fix-up Campaign" on our farms. All our farms have litter, rubbish, and things that mar the view and beauty of our country side. With a little painting, repairing, fencing, and cleaning we can lead America to a clean and pure environment. We salute the Dairy Farmers in this area for their great contribution to the excellent diet that Americans enjoy with Dairy Products.

MRS. STELLA NEAL DIES IN FLORIDA  
Mrs. Stella Neal, 85, of Fort Lauderdale, Florida died June 3 at the Broward County Hospital in Fort Lauderdale. Mrs. Neal was born in Hyden on October 12, 1904, the daughter of Mr. and Mrs. McDaniel and Mary Bishop Neal. Besides her parents, she is survived by three sons, Charles, Orvel and James Neal; seven daughters, Mrs. Martha Layne, Mrs. Viletha Stevens, Mrs. Geneva McCullum, Mrs. Helen Cooper, Mrs. Betty Correll, Mrs. Juggita Padgett and Bonnie Neal; one brother, John Brummett; 23 grandchildren and 5 great grandchildren. Funeral services were held Sunday, June 6 at the New Hope Church of God with Rev. Stevens officiating. Burial was in the Mt. Zion Cemetery. \*\*\*\*\*

**U.S. MILK CONSUMPTION 16th FINLAND IS FIRST OUT OF 17**

Although the average American housewife consumes about 240 quarts of milk a year and 12 pounds of cheese, U.S. per capita consumption of milk and dairy products ranks only 16th compared to 17 other nations in a 1969 survey.

Per capita consumption of dairy products in the U.S., which has a population of 203,184,772, was 568 pounds.

Finland, with a population of 4,900,000, ranked first with consumption of 1,353 pounds of milk equivalent per person.

Finland's per capita consumption of fresh fluid milk and cream—574 pounds—is greater than the U.S. total for all dairy products.

Finland is followed by second-ranking Ireland and third-ranking New Zealand. Rounding out the top ten milk-drinking nations are France, Norway, Denmark, Switzerland, Australia, the United Kingdom and Sweden.

Milk production is tops in New Zealand where they produced 5,085 pounds of milk per person in 1969. Ireland ranks second followed by Denmark, Finland, the Netherlands, Australia, France, Switzerland, Norway and Austria. U.S. ranks 15, producing 572 pounds of milk per person, followed by the United Kingdom and Italy.

with her sister, Mrs. Betty Jo McKinney and Mr. McKinney.

Dairy desserts are the sweet side of summer. From cream parfaits to ice cream pies, there's a joy to eat. (And a breeze to make.)

A great summer meal can be a sizzling steak topped with fresh, creamy butter... or nothing more than a good cheese sandwich.

You can feast on the natural flavor and wholesome goodness of fresh dairy products. (And isn't it nice? You won't have to cook!)

Milk is nature's own thirst-quencher. Serve it up, fresh and cold and often, it's a refreshing source of lasting energy.

**Carefree summer eating begins with dairy foods.**

Summertime... and the livin' is even better when milk and dairy products are a part of the menu. These versatile energy foods can add sparkle to your cookouts. So, the next time you shop, think dairy... because "carefree summer eating" begins with milk and dairy foods.

**June is dairy month**

**"OUR ENVIRONMENT"**  
(Cont. From Pg. 10)

will get a chance to develop into profitable logs or other wood products such as firewood. You might provide hunting or camping, which could bring in outside income.

5. Improve the total appearance of your place through good conservation practices. Good conservation practices increases productivity of every acre. The same amount of land can carry more livestock, yield more per acre and support more people. If you are in the business where customers stop to use your land, to buy livestock or harvest your crops, your well-kept lands and farmstead will be an attraction.

That's the positive economics of conservation farming. There's a negative side of course. For example, it takes extra money to build a dam, to terrace a sloping field, to plant on the contour or to replace a faulty water system. But some of these costs are already being at least partially subsidized by government cost-sharing under the Rural Environmental Assistance Program (REAP).

And though some conservation practices may cost you money in the short run, they will make money for you over a period of years.

Today, with the ever-increasing demands upon our environment let each of us consider our environment and consider it well!

**1972 FARM WHEAT ALLOWMENT APPLICATIONS**

A new farm wheat allotment may be established for the 1972 crop of wheat for farms that did not have a 1971 allotment if they meet eligibility requirements.

A 1972 wheat allotment will be established automatically for all farms that had a wheat allotment in 1971.

To be eligible for a new farm allotment, the operator must expect to receive 50 percent or more of his income from farming. Neither the owner or the operator may have an interest in any other farm which has a 1972 wheat allotment, and the person making application must have had at least two years experience in the last five years in producing wheat.

Applications for a new farm allotment must be filed in the county office on or before June 30, 1971. Any interested producer who can meet these requirements should contact the county office before the final date for filing an application.

# Dairy Farming is Big Business

## 1971 Cash Receipts Expected To Exceed 1970's \$6.4 Billion

Dairy industry cash receipts will hit \$6.5 billion in 1971 according to leading dairy economists. Income will get a boost from increased milk production, which was 117 billion pounds in 1970; population growth; rising incomes; and higher dairy food prices.

Sales of dairy products will increase less than population and farm use of home-produced dairy products is falling. Therefore per capita consumption of milk in all forms is expected to remain close to the 557 pounds estimated for 1970. Per capita consumption of low fat dairy products will increase as consumption of high fat items declines slightly.

The move in dairy farming in the 1970's will be toward larger, more highly organized dairy operations. Bigger farms, bigger processing plants and larger cooperative marketing organizations will be part of the changing dairy industry.

A major factor in improving the dairy picture is the increase in support prices by the government. More federal support in the government surplus removal program has changed dairying into a money-making business in certain areas, along with other types of farming.

This renewed interest in dairying has slowed the steady decline in the number

dairy farms with sales over \$10,000 will double. • Cow numbers will decline about 30 percent to nine or 10 million with production still over increasing by 30 percent annually. • Number of cows per farm will triple and the average number of dairy farms will be 75. • Larger herds and increased production per cow will quadruple milk production per man from 250,000 pounds at present to around one million pounds.

The dairy industry will launch aggressive advertising, promotions, public relations, merchandising, educational and new product development programs. This will reduce competition, from imitation dairy products and will quadruple per capita consumption of low fat dairy products.

The experts also predict that farmers' marketing of dairy products will become more complex. They note that elements of the dairy industry which produce, process or market dairy products as they did during the sixties will be out of step in the seventies.

Marketing organizations will become fewer and larger. They will be able to improve farm pickup and delivery of milk to plants, thereby reducing farm-to-plant and over-the-road transportation charges. New, larger plants will replace small obsolete dairy plants. These will be located strategically to minimize hauling costs and will allocate milk supplies to manufacture products in line with current market demands.

Such plants will help reduce dairy manufacturing costs and return more retail dollars to the dairy farmer.

Any way you look at it, dairy farming is big business.

In saucpan combine syrup and starch; mix well. Cook over medium heat, stirring constantly, until sauce thickens. Remove from heat; add cherry halves and butter, stirring until butter is melted. Chill before serving.

## Producer Certification

### Proceeding Well

Producer certification is proceeding at a good rate in the set-aside farm programs in Kentucky, reports Paul L. Fuqua, Chairman of the State Agricultural Stabilization and Conservation (ASC) Committee.

"Some counties report as many as 50 percent of feed grain program participants, 100 percent of wheat program participants, and 30 percent of the cotton program participants have designated their set-aside acres and certified compliance with farm program provisions. These producers and others who certify early can expect to receive set-aside payments shortly after the first of July," Fuqua said.

plained State farm program official Fuqua, is required for a producer to receive his set-aside program payment. To certify, a farmer comes to the County ASC Office, designates his set-aside acreage on a photocopy of his farm, certifies his conserving base acreage and compliance with other program provisions.

"After certification, ASCS begins processing the data for that producer's farm program payment. After certification his farm is subject to spotcheck. Farmers should be sure planting operations which are affected by program provisions are completed before they certify, since no

changes can be made after certification," Fuqua said. He pointed out that certification relates only to crops covered by farm program provisions.

"Once his planting operations are completed, it is to a producer's advantage to certify as early as possible, the ASC Committee Chairman explained, since this will help assure

Final certification dates in Kentucky are: Wheat - June 1, Feed Grain, Cotton, and Dark Types Tobacco - July 15.

State farm program officials Fuqua said that instructions have recently been received in ASCS county offices to take all necessary steps to assure that farmers participating in the feed grain, wheat, and cotton set-aside programs do not receive payments in accordance with the Agricultural Act of 1970 which provides for them to be made as soon as practicable after July 1.

The instruction also emphasized that the decision on early certification and certifying early payment rests with each farmer. Those who are still undecided regarding crop dispositions, and location and acreage, should average have until July 15 to certify.

## Dr. Laswell Elected Sec. - Treas.

Dr. Troy J. Laswell, son of Mr. and Mrs. John Laswell of Brodhead, head of the Department of Geology and Geography at Mississippi State University in Starkville, Mississippi, has been elected secretary-treasurer of the Southern Section of the Geological Society of America.

The GSA is the largest society of geologists connected with academic aspects of the department. The Southern Section has a membership approximately 875.

Dr. Laswell, head of the department since 1962, received his A.B. Degree from Berea College, his A.M. Degree from Oberlin College and his Ph.D. from the University of Missouri.

He has previously taught at the University of Missouri, Washington and Lee University, and the University of Tennessee. He is a consulting geologist with South River Mining Co., Virginia Minerals and Humble Oil and Refining Co.

## At Ease In The Wonderful World Of Cheese

Q. When cheese is served with a spoon or fork?

A. Cheese rarbit is either served over toast, or with toast on the side which you put into the cheese bit by bit. In either case it is eaten with a fork using the toast to sop up the running cheese.

Q. When cheese is eaten with a salad, is it cut up with a knife or the salad fork?

A. It is cut up with the edge of your fork. It may be spread on crackers as a salad accompaniment.

Q. In a restaurant, when you are served assorted cheeses in their wrappers, do you open all of them or just one or two?

A. Because the cheese packages you open and do not finish must be thrown away, it is correct to open only those which you especially like.

Q. When you take a piece of bread dipped in cheese fondue, do you sit it directly from the fondue fork or after transferring it to your plate and using a regular fork?

A. You sit it from the fondue fork with your front teeth, being careful not to touch the hot fork with your lips.

## Dairy Day Is Saturday, June 12

A full-day of activities are scheduled for Saturday, June 12, the 11th consecutive Dairy Day in Mt. Vernon. The day will begin at 10 a.m. when the dairy princess candidates will be interviewed in the Cumberland Production Credit office. Then at 11 a.m., crackers and cheese will be served to the crowd by members of a 4-H Club. At 11:15 there will be a luncheon for dairy princess candidates, the state dairy princess, Miss Mary Lois Kiplinger, and local dairy month officials; at 12:30 there will be a welcome by County Attorney Bill Gregory and Mayor Ed Westgate; the parade begins at 1 p.m.; at 2:30 the dairy princess candidates will be interviewed on stage by Russell Cornelius, extension agent from Stanford; the State Dairy Princess will speak at 3 p.m.

At 3:15 will be the recognition of persons providing most in dairy leadership in the county; the crowning of the county dairy princess will be at 3:45 and at 4 p.m., as in years past, N.M. Smock, president of the Bank of Mt. Vernon, will make the presentation to the lucky winner of the dairy heifer given by the bank.

One of the features of the day will be the appearance, about mid-way of the activities, of an Indian scalping party led by chief Little Deer riding Appaloosa Indian ponies which should, to say the least, liven things up a bit. And beginning at 11 a.m., country music will be provided by the Baker Bros. and Old Joe Clark.

All-in-all it should be an exciting fun-packed day and to make things more interesting, many merchants in Mt. Vernon will be featuring dairy day specials. So, load up the kids, and come to Mt. Vernon and participate in the 11th Annual Dairy Day.

The above photo depicts what June Dairy Month is all about. The Dairy Industry in Rockcastle County is second only to the tobacco industry and June is the time when dairy farmers are recognized locally and state-wide for their contribution of fine dairy products for our health and enjoyment. The above photo was taken on the farm of W.S. and Kenneth Stewart, who currently milk about 90 head of Holstein. Their best producer last year gave 18,500 pounds of milk.

## Bullock Property Brings \$30,100

A 117-acre parcel of commercial property on Richmond Street in Mt. Vernon was sold at public auction Saturday, June 5 for \$30,100. The land and improvements, which belonged to the heirs of the late Ernest and S.E. Bullock, was purchased by Christian Appalachia, Inc.

The sale was handled by Ford Realty and Auction Co. of Mt. Vernon.

## Pool Party

There will be an adult pool party and pot luck supper Saturday, June 19 at 7 p.m. at the Cedar Rapids Country Club for members only.

Admission is 50c per person. All adult members are invited to come and bring a dish.

## Danny Price Named Hospital Administrator

Danny Price of Mt. Vernon has been hired as administrator of the Rockcastle County Baptist Hospital and has assumed his duties there.

The position as Administrator was vacant due to the

recent resignation of Bennett Hiatt.

Mr. Price is a 1959 graduate of Berea College where he received his degree in business administration. He taught school one year at Livingston and just prior to coming to Rockcastle had been a cost accountant with the American Standard Corporation in Paintsville.

He is married to the former JoAnn Adams of Broaddus and they have one son, Shannon Ray.

## Johnny K. Franks Dies From Injuries

Johnny Ray Franks, 18, of Louisville and formerly of Mt. Vernon, passed away Saturday, June 5 in Lexington as the result of an automobile accident.

He was born in Madison County on February 21, 1953 the son of George and Fieda Chaffin Franks of Livingston. He had been an employee of Manley Automotive in Louisville.

Besides his parents, he is survived by two sisters, Mrs. Linda Mullins of Mt. Vernon and Mrs. Gloria Faye Wilson of Livingston; five brothers, Harold R. Franks of Orting, Washington, Carl Edward Franks of Dayton, Ohio, George H. Franks of Miami, Fla., and two half-brothers, Edward Franks of Louisville and Joe Michael Franks of Livingston, and his paternal grandmother, Mrs. Myrtle Franks of Mt. Vernon.

Funeral services were held Monday, June 7 at the Cox Funeral Home Chapel by Bro. Bill Hiatt and Bro. Carr. Burial was in Elmwood Cemetery.

## Claude Overbay Dies in Ohio

Claude Overbay, 52, of Cincinnati, Ohio and formerly of Livingston died May 24 at the Veterans Hospital in Cincinnati.

Survivors include his wife, Mary Elizabeth Noe Overbay; three daughters, Mrs. Karen Hamman, Mrs. Phyllis Delaney and Mrs. Juanita Schleichler, all of Cincinnati; Ohio; two sisters, Mrs. Ernest Hampton and Mrs. Nellie Richmond of Indiana; seven grandchildren and many friends and relatives.

Burial was in the Baltimore Cemetery in Cincinnati, Ohio.

Mrs. Jerry Hayes, secretary of the Housing Authority of Mt. Vernon, will begin taking applications Monday, June 14 from persons wishing an apartment in the two municipal housing projects now nearing completion in Mt. Vernon. Mrs. Hayes' office is located on the second floor of the courthouse and from June 14 through June 18, applications will be taken from 2:30 p.m. until 4:30 p.m. The ten units in the top photo, located on Lovell Street, have been designated for the elderly while the twenty units on Town Hill are for anyone who qualify, whether the head-of-household is working or not. The eligibility for these apartments is determined mainly on income and number of dependents in a family. Also during next week, Mrs. Hayes will accept applications for maintenance man for the two projects.

**CANDIDATES**— Karen Jean Adams, 17, (left) daughter of Mrs. Gladys Adams of Route 1, Broaddus and the late Ray Adams, and Janet Lew Hunt, 17, daughter of Mr. and Mrs. Lew Hunt of Route 1, Mt. Vernon, will vie for the title of Rockcastle County Dairy Princess on Dairy Day, Saturday, June 12. Miss Adams is a 1971 graduate of Broaddus High School and plans to attend Somerset Community College in the fall. Miss Hunt is also a 1971 graduate of Broaddus High School and will be a Freshman at Somerset Community College in the fall.

## Registration Is June 14 For EKV Summer Session

Monday, June 14 is registration day for the summer session at Eastern Kentucky University.

Dormitories will open at 9 a.m. Sunday.

At 7:30 a.m. on registration day, freshmen and sophomores who were not enrolled in the spring session and transfer students are asked to report to Hiram Brock Auditorium in the Administration Building.

Classes will begin Tuesday, June 15, which is the last day to register for a full load.

The summer session closes August 6. Commencement exercises are set for August 5.

The summer session will offer a broad range of courses in all EKV colleges and the graduate school. A complete listing of these classes may be obtained by writing the vice president for academic affairs.

## Robert W. Clark Dies Suddenly

Robert Wheeler Clark, 59, of Mt. Vernon passed away suddenly Wednesday, June 2 at his home.

He was born in Rockcastle County on December 16, 1911 the son of the late Taylor and Lucinda Abrams Clark, was a retired employee of the L&N Railroad and a member of the Hummel Baptist Church.

Survivors are one daughter, Mrs. Wanda Jean Bell of Covington; one son, Charles Clark of Richmond, Indiana; three sisters, Mrs. Mary Watson of Paris, Mrs. Della Bellamy of Gate City, Va., and Mrs. Stella Mason of Mt. Vernon; four brothers, John Clark and Bill Clark both of Mt. Vernon, Tom Clark of London and Hayes Clark of Beres; five grandchildren and two great grandchildren.

He was preceded in death by one sister and one brother.

Funeral services were held Friday, June 4 at the Cox Funeral Home Chapel by Bro. Harvey Penso. Burial was in Elmwood Cemetery.

## School Board Suspends Title I Post For One Year

The Rockcastle County Board of Education voted at its regular monthly meeting Monday night to suspend the post of Title I Coordinator and to allow Superintendent Charles B. Parsons to assume the responsibilities for that office for one year. The position of coordinator has been vacant for several months since the resignation of Clyde Livittile, who assumed a position with the Mental Health-Mental Retardation Center at Corbin.

In other business, the board employed J. Courtney Horton, Jr., CPA, of Mr. Sterling to audit the records of the general fund, construction account and bond sale, Title I account and summer homebound program at a total cost of \$950.00.

The board also authorized the advertisement for bids for school bus insurance, paper and school supplies, gasoline, oil, lubricants, coal, fuel oil, tires, antifreeze, a small school bus and miscellaneous

improvements requiring bids. The pay scale for 1971-72 for substitute teachers was also approved by the board. The scale ranges from \$35 a day for a teacher with a degree plus 10 of more years experience down to \$11 a day for a teacher with an emergency rank VII, zero to 31 hours of college.

Five weeks of summer school was also approved by the board. From June 14 to July 16, the homebound program will be held and from June 7 to July 9, the program for vocational disadvantaged and vocational handicapped will be in session.

Nine persons were employed to work in the summer program. They are: Elizabeth Mullins, Patsy J. Cornelius, Bige Towler, Garland Cummins, Tom Payne and Buford Parkerson, all as teachers; Mrs. Naomi Mink and Mrs. Joyce Remer as aides and Douglas Hamm as supervisor.

The tick leave policy for non-certified twelve-month employees was altered by the board to allow the accumulation of up to 60 days in sick leave. These employees are granted 10 days annual sick leave.

Five additional teachers were employed by the board, subject to certification. They are: Mary B. Hamm, Katherine Payne, Ronald DeLoach, Linda Owsley, Gerald Cummins and Charles E. Napier.

## Land Sold

One of the largest tracts of land to be sold in many years in Rockcastle County was sold last week to J.J. and Junior French, of the locally owned French Bros. Lumber Co.

The land, consisting of 904 acres, belonged to the Trumbo heirs and was also known as the Boner Tract and the Marek Tract.

Located in the Sand Hill area of Rockcastle County, the land was all in timber and sold for \$47,000.00.

The sale was handled by Floyd Owens and Benton Stokes of the Floyd Owens Real Estate Agency of Mt. Vernon.

## \$4.6 Million Project Announced

Kentucky hopes to receive \$4.68 million from regional and federal sources to finance a unified child development program for 16 southeastern counties.

Governor Munn, in announcing the project, said the state awaits final approval of \$1,170,000 from the Appalachian Regional Commission and expects \$3,510,000 through the Social Security Act.

The governor said the program will focus on prevention in physical and mental child health care "rather than spending tax dollars after the fact to correct them."

It will be called the Kentucky Infant and Preschool Program and will serve these counties: Wolfe, Breathitt, Letcher, Walthey, Jackson, Lee, Knott, Harlan, Knox, Clay, Owsley, Leslie, Bell, Perry, Laurel and Rockcastle.

The program will concentrate on prenatal and postnatal nutrition, child care, child learning services and health and mental health services.

## Frank Helmer Dies After Short Illness

Frank Edward Helmer, 75, of Mt. Vernon, passed away Sunday, June 6 at the Rockcastle County Baptist Hospital after a short illness.

He was born in Clockville, New York on March 21, 1896, the son of the late Royal and Lola VanDusen Helmer. He was a member of the First Baptist Church of Mt. Vernon and owned and operated Helmer's Gift Shop near Renfro Valley.

Survivors include two daughters, Mrs. Ruth Southwick of Cassanova, New York and Mrs. Helen Boddy of Milton, New Mexico; 11 grandchildren and 15 great grandchildren.

Funeral services will be conducted Thursday, June 10 (today) at 2 p.m. at the Dowell Martin Funeral Home Chapel by Bro. Harvey Penso. Burial will be in the Clockville Cemetery, Clockville, N.Y.

## Henry C. Hoskins Dies June 5

Henry Clay Hoskins, 72, of Broaddus, passed away Saturday, June 5 at the Rockcastle County Baptist Hospital.

He was born in Clay County on December 19, 1898 the son of the late Matt and Verline Shelton Hoskins and was retired from the U.S. Navy, a veteran of World War II, a member of the Broaddus Masonic Lodge #566 F&AM and a member of the Broaddus Baptist Church.

Survivors are his wife, Mrs. Ollie Ponder Hoskins

For the fifth consecutive year, the Bank of Mt. Vernon will once again give away a registered dairy heifer to some lucky member of a dairy family. This year's heifer cost \$250 and was purchased from Eastern Kentucky University's Dairy Farm. The six-month-old heifer is out of one of the most outstanding cows in the University's herd and anyone who is a member of a family selling milk commercially may register.

## Capital Digest

### GOVERNOR NUNN OPPOSES SEVERANCE TAX ON COAL IN KY. ALONE

Governor Nunn has reiterated his opposition to imposing a severance tax on coal in Kentucky, in the absence of a similar levy in other coal-producing states.

His statement came in reply to a question raised by a delegate to the two-day Environmental Conference at Natural Bridge.

He said that while a severance tax could probably be borne by the coal industry during the present period of high prices for coal, it could be harmful when the price declines, as it does in the normal ebb and flow of that industry.

The governor said he felt the revenue from such a tax would not be adequate to offset the money needed for unemployment and welfare benefits during the low periods in the coal industry.

He compared the issue with the production tax put years ago on whiskey which caused

a distiller to store his whiskey out of the state, thus creating Kentucky jobs which never have been recovered.

### SANDY BEADS MAY CONTAIN TOXIC METAL

The state Department of Health has requested local health departments to check food and novelty distributors and stores for a national brand of imported candy beads that may contain cadmium, a toxic metal.

The U.S. Food and Drug Administration (FDA) warned recently that certain lots of the candy, sold under the name "Love Beads" or "Luv Beads," present a health hazard. The FDA's analysis showed that an edible medalion attached to the beads contained high levels of the toxic metal.

Dr. Ewell P. Conyers, of the Division of Environmental Services, said that there have been no cases of illness from the beads reported in Kentucky.

He said all packets of the

candy, other than those known not to contain cadmium, are to be voluntarily destroyed or placed under Health Department quarantine.

### FARMERS NOT GETTING ECONOMIC SHARE

Governor Nunn said agricultural opportunities in Kentucky far outweigh problems in the field in an address officially opening June Dairy Month, but acknowledged that farmers are not getting their fair share of economic growth.

The governor addressed about 150 representatives from all phases of the dairy industry at a Salute to Dairying luncheon in Glasgow. The affair was sponsored by the American Dairy Assn. of Kentucky.

The governor cited Kentucky's proximity to major market outlets, its favorable climate, the adaptability of its soil and the know-how of its people as factors in the farmers' favor.

But he noted statistics showing that while industrial workers' productivity has increased 150 per cent in the past 20 years, farmers' productivity has risen more than 300 per cent.

"The rule that those who produce more, get more, doesn't seem to apply to agriculture," he said. "While the future of tobacco is uncertain, efforts should be doubled in livestock and dairying so that Kentucky's farm income can be protected."

### OUTSTANDING TEENAGER AWARDED TROPHY

Rogers Keith Johnson, an 18-year-old June graduate of Louisville Male High School, was presented a trophy by Governor Nunn for his selection as the commonwealth's most outstanding teenager.

Rogers was chosen Kentucky's most outstanding teen by the Outstanding Teenagers of America Assn., Chicago. A nationwide contest, the selection of outstanding teenagers in each state is based on leadership, scholarship and service displayed by teenagers at their high schools.

State winners, like Rogers, were chosen from nominees

(Cont. To 3)

TOM DUNCANS

## Frankfort Carter Comments

### Watchline

"He is the greatest man I've ever known."

That statement about Dr. C.C. Howard some years ago by one who knew him only in his later years jarred some thoughts.

What Kentuckian could name one greater? One who had really helped more people, one who had given more of himself, one who had more to give.

The answer has to be— you'll have to name someone greater.

Every Kentuckian who cares knows he was the father of the T-B Hospital system. But that's just the evident part.

The hospital—years—spent in the medical and surgical care of people are the real monument. Plus a list of civic activities that would do honor to a dozen men.

And he never shunned a fight. He took on most of his own profession in endorsing medical care. His simple reason was: "Care the people first and the money will take care of itself."

Kentuckians who don't know their loss in the passing of Dr. Carl C. Howard didn't know him. And that's their loss too. \*\*\*\*\*

The report of the National Education Association's Commission on Professional Rights and Responsibilities was meant to impart a sense of urgency on the need for state action on school funding.

His simple reason was: "Care the people first and the money will take care of itself."

That has nothing to do with the merits of course. But any way you look at it, the report is a mixture of sound thinking and wishful thinking, of insight and blindness.

It underscores what most of us know—Kentucky schools need help, many of them desperately. And the NEA may be in step with the public in feeling the severance tax is an idea whose time has come. But it may have tossed in a kicker by suggesting a 5 per cent tax.

Major elements of the coal industry had been asked to accept a 3 percent tax with little whimpering. But the 5 percent idea drew some blood and put blood in some eyes.

The NEA found some other soft spots—loopholes in property assessing practices, breakdowns in tax collecting and inequities from tax generated by the rollback law. But an indication of the wishful thinking is the statement that if the courts knock out the rollback law school boards may be allowed to set tax rates up to \$1.50.

Wanna bet? Or race the Legislature back to Frankfort? \*\*\*\*\*

Aside from questions of a severance tax, perhaps the best case can be made for eliminating deductibility of federal income taxes on state returns as a revenue-raiser. The way the setup is now, with those in high brackets able to deduct on state returns what they pay the federal government, the state income tax rates often hit the little man hardest.

But the NEA—although for this type revision—simply can't bring itself to go for real tax reform.

After battering Kentuckians for years about that mythical national average, it admits but almost brushes aside the fact that if per capita income is taken into account Kentucky's real tax effort ranks 16th in the nation.

And it uses the argument that "the fact that Kentucky has exceeded the average effort in general sales and income taxation does not mean that the Commonwealth has overextended itself or that it should consider tax reductions in these areas."

Mercy, no, why might get to be No. 1 there, if—where else.

### VanWinkle Graduates

Glen VanWinkle, son of Mr. and Mrs. Aster VanWinkle of Route 3, Berea, was one of two hundred and twenty six candidates for Berea College degrees presented at commencement exercises Sunday, May 23, at Indian Fort Theatre. VanWinkle is a biology major.

The unemployment rate in the United States has risen significantly in recent months. Employees in all sectors of the economy and in a wide range of jobs have been affected by this trend.

Kentucky's Fifth District Congressman, Tim Lee Carter, explained that among those who have been hardest hit are the workers who lack specific skills to make them valuable to an employer.

"This includes many of our boys returning from active duty in Vietnam. For them, as well as for many others, more technical training and job counseling are necessary. I submit that a strong system of vocational education will provide much-needed training."

Such training acts as a "bridge" to work for those with limited education, low skills and little job experience.

"It is interesting to note," remarked Rep. Carter, "that men in trades taught by vocational schools throughout our country earn on an average much more than the white collar workers, a factory worker, and even more than those who teach them."

The average wage of a plumber is \$7.00 an hour, and the average wage of an electrician is \$6.00 an hour, as compared with that of a factory worker which is \$3.25 an hour. The Congressman believes that "all worthwhile work with one's hands is honorable. However, with training in special skills, the work will also be remunerative and gratifying."

In an era when the United States is moving from a wartime to a peacetime economy, it is inevitable that unemployment rates will rise until those employed in defense-related industries can be retrained and placed in other jobs. Vocational schools can provide valuable assistance in training persons trying to make the transition from one type of job to another.

Efforts to ease the unemployment problem in our nation today will suffer if essential setbacks as more and more young people leave school for the summer. During the coming months, these young people will be looking for employment, which in many instances, they must find if they are to continue their education.

Hon. "I believe it is essential that we provide employment for high school and college students," affirmed Rep. Carter.

"In an effort to be of assistance to you,"

### JIM AND THE BEANSTALK

by Raymond Briggs. The giant of the beanstalk is back again, only this time it is the son of the giant that Jack met and a new boy, Jim, who climbs the beanstalk. **K-3**.

### THE MASTER OF THE WINDS

EDITED BY Mirra Ginsburg. From her intimate knowledge of Russia, its traditions, history and literature, Miss Ginsburg has carefully selected stories from Siberia not only for children but folk tale collectors of all ages. **K-7**.

### AMENDED WATER AND SEWER RATE ORDINANCE

**ORDINANCE OF THE CITY OF BRODHEAD, KENTUCKY, AMENDING THE EXISTING WATER AND SEWER RATE ORDINANCE OF SAID CITY**

WHEREAS, the Board of Trustees of the City of Brodhead, Kentucky, is in the process of arranging to finance the construction of a new municipal sanitary sewer system and the construction of extensions, additions and improvements to the existing municipally owned waterworks system, which systems are to be operated as a combined and consolidated revenue-producing public project, and

WHEREAS, said City has arranged to provide for the issuance of its Water and Sewer Revenue Bonds for the purpose of defraying the costs, not otherwise provided, of said construction, and

NOW, THEREFORE, THE BOARD OF TRUSTEES OF THE CITY OF BRODHEAD, KENTUCKY DOES ORDAIN AS FOLLOWS:

#### Section 1. AMENDMENT OF RATE ORDINANCE OF DECEMBER 7, 1970.

That the previous Water and Sewer Rate Ordinance of the City, fixing the respective water and sewer rates applicable to water and sewer services furnished by said proposed new municipal sanitary sewerage system and the existing waterworks system, which Water and Sewer Rate Ordinance was adopted on December 7, 1970, is hereby amended to increase such water and sewer rates as hereinafter provided.

#### Section 2. NEW MONTHLY WATER AND SEWER RATES.

That the monthly rates or charges for water service and for sewer service furnished by the City of Brodhead, Kentucky, are hereby fixed and established on a monthly basis as follows:

A. MONTHLY WATER RATES.	
NUMBER OF GALLONS OF WATER PER MONTH	MONTHLY CHARGE
For the first 2,000 gallons or less	\$2.30 per 1,000 gallons (\$4.60 minimum bill)
For the next 8,000 gallons	\$1.35
For the next 40,000 gallons	.95
For the next 50,000 gallons	.80
All over 100,000 gallons	.70

The minimum water bill shall be \$4.60 per month for water service to properties within the City limits and shall be \$6.60 for water service to properties outside the City limits and each water customer shall be entitled to 2,000 gallons (or less) of water in each month for such minimum charge.

#### B. MONTHLY SEWER RATES.

The rates or charges for sewer service shall be based insofar as possible upon the quantity of water supplied each month to the respective premises and shall be Seventy-Five Percent (75%) of the monthly water bill determined by the above rates. The minimum sewer bill shall be \$3.45 per month for sewer service to properties within the City limits and shall be \$4.95 for sewer service to properties outside the City limits.

### Section 3. WATERWORKS AND SEWER CONNECTION CHARGES.

Customers shall pay a total connection charge of Thirty-Seven Dollars and Fifty Cents (\$37.50) for connecting to the City water system, and customers shall pay a total connection charge of Twenty-Five Dollars (\$25.00) for connecting to the City sewer system.

### Section 4. RATES ARE EXCLUSIVE OF SALES TAX.

The foregoing rates are rates to be charged by the City of Brodhead, and any applicable sales tax shall be added to each bill as a separate charge.

### Section 5. REVISION OF RATES.

The schedule of rates and charges prescribed in this Ordinance shall be revised from time to time and whenever required shall be increased so as to produce income and revenues from the municipal waterworks and sewer systems adequate to comply with such covenants and agreements as may be made by the City in connection with any revenue bonds issued by the City.

### Section 6. ALL OTHER PROVISIONS OF PREVIOUS RATE ORDINANCE RATIFIED AND CONFIRMED.

That all provisions of the Water and Sewer Rate Ordinance enacted by the Board of Trustees of the City of Brodhead on December 7, 1970, except to the extent amended herein, are hereby ratified and confirmed; all City Ordinances, Orders, Resolutions, Motions or parts thereof, insofar as same may be in conflict herewith, are hereby repealed; and this Ordinance shall take effect from and after its enactment, approval and publication as provided by law.

Enacted and approved on this 7th day of June, 1971.  
/s/ Bobby A. Proctor  
Chairman, Board of Trustees,  
City of Brodhead, Kentucky

Attest:  
/s/ Frances Whitehead  
City Clerk

A. MONTHLY WATER RATES.		MONTHLY CHARGE PER 1,000 GALLONS TO PROPERTIES WITHIN THE CITY		MONTHLY CHARGE PER 1,000 GALLONS TO PROPERTIES OUTSIDE THE CITY	
For the first 2,000 gallons or less	\$2.30 per 1,000 gallons (\$4.60 minimum bill)	\$4.60	\$6.60	\$3.50	\$5.50
For the next 8,000 gallons	\$1.35	.95	1.38	1.20	1.04
For the next 40,000 gallons	.95	.80	1.20	1.04	
For the next 50,000 gallons	.80				
All over 100,000 gallons	.70				

### CERTIFICATE OF CITY CLERK

I, FRANCES WHITEHEAD, hereby certify that I am the duly qualified and acting City Clerk of the City of Brodhead, Kentucky, that the foregoing Ordinance is a true copy of an Ordinance duly enacted by the Board of Trustees of said City on June 7th, 1971, that said Ordinance has been ordered to be published as required by law, and that said Ordinance appears as a matter of public record in the City Ordinance Book.

IN WITNESS WHEREOF, I have hereto set my hand as City Clerk and the official seal of the City on this 7th day of June, 1971.

/s/ Frances Whitehead  
City Clerk

JUNE IS DAIRY MONTH — AND WE WOULD LIKE TO SAY...

# CONGRATULATIONS TO THE Dairy Industry!

This month is a good time for all of us to take a closer look at our Dairy Industry. One thing is certain, it has become big business and is getting bigger every day. And our dairy farmers have done an excellent job in increasing production to meet growing demands. They are using the most modern, up-to-date equipment in rigidly controlled modern plants. We salute them for a job well done!

## June Dairy Month Has Two-Fold Purpose

By Wallace Campbell  
Dairy Specialist  
Division of Markets  
Ky. Dept. of Agriculture

June Dairy Month is the traditional time when the spotlight is turned on our dairymen and the dairy industry. June Dairy Month is perhaps one of the largest observances of its kind conducted annually by agriculture.

Generally speaking, June Dairy Month has a two-fold purpose: (1) to honor our dairymen and the dairy industry, and (2) to promote greater uses of milk and dairy products. Thus, this observance has a complimentary as well as an economic objective.

In looking at Kentucky's dairy industry, we find many examples of where management has paid dividends and has enabled the industry to continue to progress. For the past several years the average per cow production has continued to increase even though the number of cows in produc-

tion has decreased. The difference between a profitable herd and a non-profitable herd is the production realized per cow. Generally speaking, a low producing cow will require the same amount of feed, handling and management required by a high producing cow.

For those who might not realize the importance of dairymen in Kentucky, it should be noted that Kentucky ranks tenth nationally in the total number of milk cows. While we are known as a major producer of cheese, it should also be pointed out that we rank second in the production of evaporated milk.

Although the statistics are matters of pride with those of us involved in agriculture, the important thing to remember is they represent dollars and cents to our economy. As we look at the present and anticipate the future, I think that we should concern ourselves with those things which will play a major part in determining the future of our dairy industry.

## Sowder Conducts Alfalfa Variety Test

By Smith T. Powell, Jr.

Alfalfa weevil has been a serious deterrent to the production of alfalfa in Rockcastle County for the past several years. Varieties have been developed to try and find some resistance to this insect. In helping to determine how successful these varieties are in their resistance to this insect Junior Sowder, local Rockcastle dairy farmer, in cooperation with the Extension Service, has conducted a variety test using Team and Weevichk, the two resistant varieties, and Naragansett as a check variety.

On April 22, 1970 Mr. Sowder sowed 12 acres of Naragansett, one acre of Team and one acre of Weevichk using 20 pounds of alfalfa and 3 1/2 pounds of orchard grass per acre. Sufficient lime to bring the pH level to 7.0 and 900 pounds of 5-20-20 fertilizer, 100 pounds of ammonium nitrate and 5 pounds of boron was applied per acre.

The first cutting was made July 4, 1970 with the 12 acres yielding 953 bales. September 15 it was cut the second time with 610 bales. This was a total yield of 4.7 tons per acre the first year.

This spring the three varieties were observed closely for weevil damage. The insect appeared two weeks earlier in the Naragansett than in either the Team or the Weevichk. After May 1 there was no appreciable difference in the infestation of the three varieties which will tell the story of milk and dairy products and the role they play in health and nutrition. This involves constant efforts in research, education and advertising.

I realize that these are general comments on dairying and the dairy industry. The thing which we must remember is that dairying is a complex and competitive industry. It is a business and requires strict and efficient management. At the same time, it is an industry that can prove profitable as well as challenging.

In addition to being important from the standpoint of economics, I feel that dairying has a vital role in our country's food supply. In conducting such programs as June Dairy Month, we should concern ourselves with the total program as it relates to dairying and that is production, marketing, and promotion.

While to a great extent the marketing aspects of dairying, that is for Grade A, are determined by health and sanitary requirements, I do feel that dairymen must be concerned with marketing in general. Closely allied with marketing is the matter of product promotion. The American Dairy Association and other dairy groups are doing an outstanding job of promoting milk and dairy products.

Those of us in dairying must remain aware of the competition from non-dairy products. We must keep our products competitive with these non-dairy items. We must have promotional pro-

gramming that is key word in any industry or enterprise. It is perhaps an overworked term, but at the same time it remains important and is the determining factor between success and failure. Also, it is a comprehensive term and covers many areas with which dairymen must be concerned. The costs of feed, supplies and labor will remain as major concerns to dairymen in the years ahead. This means that our dairymen will need to concentrate on labor saving systems plus quality animals which will give maximum production. Dairymen can no longer afford to have low producing animals in their herds.

To achieve maximum production, dairymen who desire to select animals with high production records and breed to plus proven bulls. Once they have developed a high producing herd, they must utilize an efficient system of records in order to maintain production surveillance of each cow.

I feel that the dairymen, perhaps more than any other farmer, must really be on top of his operation. He must be knowledgeable about the performance of each animal in order to adjust feed rations accordingly. In addition, he must be alert to the need for culling low producers from his herd.

Although health and sanitary requirements guide dairymen in many phases of their operations, they should nonetheless be abreast of conditions affecting the operation of their equipment or the quality of their milk. Here again, maintenance is of the utmost importance and efficiency must be maintained. High production per cow is of minor importance if a quality product is not being produced.

MANAGEMENT - PROMOTION

While to a great extent the marketing aspects of dairying, that is for Grade A, are determined by health and sanitary requirements, I do feel that dairymen must be concerned with marketing in general. Closely allied with marketing is the matter of product promotion. The American Dairy Association and other dairy groups are doing an outstanding job of promoting milk and dairy products.

Those of us in dairying must remain aware of the competition from non-dairy products. We must keep our products competitive with these non-dairy items. We must have promotional pro-

## Artificial Breeding Program Has Much To Offer Dairymen

E.C. Troutman, Department of Animal Sciences College of Agriculture and Home Economics University of Kentucky

Through the use of outstanding sires, the artificial breeding program offers dairymen superior inheritance for high milk production in their herd. However, unless good feeding and management practices are used, the inherited potential for high milk production is never reached!

Dairymen on a production testing program have many records (tools) to aid them in their feeding and management practices. Therefore, it is interesting to compare the production of "tested" and "non-tested" herds using the artificial breeding (A.I.) program. Such a study was conducted by Michigan State University workers. Their findings show the "tested" herds using artificial breeding out-produced the "non-tested"

herds using artificial breeding by 1,600 pounds of milk and 70 pounds of butterfat!

Herds were classified as using 100 percent A.I., more than 50 percent A.I., less than 50 percent A.I., and 100 percent natural service. In each of these groups the "tested" herds out-produced the "non-tested" herds. There was not a significant difference in production between the groups based on the extent to which they used artificial breeding.

This study points out the real value of production testing and its effect on the artificial breeding program. There is little use to breed cows capable of producing at a high level, and then feed and manage them so they never reach this level. Some type of production testing program is necessary to furnish dairymen with the information they need for wise management. If you are a dairymen not on any

devoted to the use of 35 acres owned by 109 acre farm he has a total of 35 acres devoted to alfalfa. He says that he believes a dairyman can successfully control weevil with a spray program. Also, so that alfalfa is essential to the successful operation of a dairy farm in the area. He is running 35 Holsteins in cows that average slightly over 11,000 pounds milk per year.

Heavy applications of phosphate and potash together with enough lime to maintain a pH level of 7.0, in Sowders' opinion, are necessary to maintain stands and 8 ton yields of alfalfa.

devoted to the use of 35 acres owned by 109 acre farm he has a total of 35 acres devoted to alfalfa. He says that he believes a dairyman can successfully control weevil with a spray program. Heavy applications of phosphate and potash together with enough lime to maintain a pH level of 7.0, in Sowders' opinion, are necessary to maintain stands and 8 ton yields of alfalfa.

## Social Security News

Planning time is here again, and most farm operators will be expanding their operation. Some of you have, or will hire, additional labor for your expansion. This means that you will need to know just what social security reports are required. A large number of farm workers fall to gain social security coverage simply because farm operators do not report their wages.

All farm operators should keep records on each employee which should contain the employee's name, social security number, amount of wages earned, and the number of days worked. If an employee is paid \$150 or more in a calendar year, his wages must be reported. If an employee performs some work on any part of 20 days in a calendar year on a time basis, these wages also must be reported. This report is mandatory and should be made in January following the end of the calendar year in which the work was done.

If you have any questions concerning the reporting of farm wages, get in touch with your local security office in Somerset. The telephone numbers 678-8168. Please call collect.

Through the use of outstanding sires, the artificial breeding program offers dairymen superior inheritance for high milk production in their herd. However, unless good feeding and management practices are used, the inherited potential for high milk production is never reached!

Dairymen on a production testing program have many records (tools) to aid them in their feeding and management practices. Therefore, it is interesting to compare the production of "tested" and "non-tested" herds using the artificial breeding (A.I.) program. Such a study was conducted by Michigan State University workers. Their findings show the "tested" herds using artificial breeding out-produced the "non-tested"

## Artificial Breeding Program Has Much To Offer Dairymen

E.C. Troutman, Department of Animal Sciences College of Agriculture and Home Economics University of Kentucky

Through the use of outstanding sires, the artificial breeding program offers dairymen superior inheritance for high milk production in their herd. However, unless good feeding and management practices are used, the inherited potential for high milk production is never reached!

Dairymen on a production testing program have many records (tools) to aid them in their feeding and management practices. Therefore, it is interesting to compare the production of "tested" and "non-tested" herds using the artificial breeding (A.I.) program. Such a study was conducted by Michigan State University workers. Their findings show the "tested" herds using artificial breeding out-produced the "non-tested"

such type of program, see your local county agricultural extension agent for details of such programs. You will be glad you did.

## CARD OF THANKS

We, the family of Elihu McDaniel, would like to say these few words of love and kindness to each and everyone who helped in any way in the sickness and death of my sweet sickness and death of our husband and father. We especially wish to thank the staff of the Rockcastle County Baptist Hospital, Dr. J.D. Lewis, those who send flowers and food, Howell and Martin Funeral Home, Bro. Bradley and Cornelius and everyone who helped in any way. God Bless everyone in my prayer.

Wife, Bertha McDaniel, and children and grandchildren, Laverna Raine

**BOONE**

Miss Nancy Durham returned home recently from the University of Kentucky Medical Center in Lexington where she spent five weeks for treatment. She will now enter Berea Hospital for further treatment.

**GRADUATES**— Mrs. Billie Jo Headman, the former Billie Jo Howard, of Richmond, graduated from Eastern Kentucky University May 9 with an Associate Degree in Nursing. Mrs. Headman is the daughter of Mrs. Geneva Thacker Howard of Richmond and the granddaughter of Mr. and Mrs. Frank Thacker, Route 3, Mt. Vernon. She is presently employed at the Patten A. Clay Hospital in Richmond and plans to return to Eastern in the near future to obtain her bachelors degree.

pit for treatment. Her sympathy is extended the family of Vester Cope in the passing of their wife and mother. May God's richest blessings rest upon them.

Mattie Blair has been on the sick list for the past few weeks. Her speedy recovery is wished for him.

Mr. and Mrs. Lloyd Anglin and children of Union visited Mr. and Mrs. Ken Long Sunday, May 30.

Vincent Poynter of Berea visited his grandparents, Mr. and Mrs. Bill Burdine, Saturday evening and attended church services.

Mr. and Mrs. Ronald Anglin and family of Walton visited Mr. and Mrs. Ken Long Wednesday afternoon.

Tom Loman is reported very ill at his home. His brother, Robert Loman, and Joe Byrd of Junction City visited him Sunday.

Mrs. Bernice Hunt and Mrs. Etta Rees of Roundstone visited W.R. Durham, Carl and Nancy, Thursday evening, Bro. Ray and Mrs. Clover Bottom visited the Durhams Saturday evening.

Mr. and Mrs. Bill Deering and family, Mr. and Mrs. Ray Powell and family of Lexington and Mr. and Mrs. David Poynter and Vincent of Berea visited Mr. and Mrs. Bill Burdine May 30.

**SNIDER**

(delayed)

Mr. and Mrs. Lewis Van Winkle of Dayton, Ohio visited his parents, Mr. and Mrs. Bodie VanWinkle, over the week end. They all attended the decoration at Johnetta Cemetery.

Mr. and Mrs. Charles Long of Covington visited her parents, Mr. and Mrs. Edgar Barnett, over the week end.

Mr. and Mrs. Charlie Callahan of Indiana visited her parents, Mr. and Mrs. Bob Barnett and other relatives over the week end and attended the Johnetta Decoration.

Mr. and Mrs. Tom Loman reported very ill at his home. His brother, Robert Loman, and Joe Byrd of Junction City visited him Sunday.

Mrs. Bernice Hunt and Mrs. Etta Rees of Roundstone visited W.R. Durham, Carl and Nancy, Thursday evening, Bro. Ray and Mrs. Clover Bottom visited the Durhams Saturday evening.

Mr. and Mrs. Bill Deering and family, Mr. and Mrs. Ray Powell and family of Lexington and Mr. and Mrs. David Poynter and Vincent of Berea visited Mr. and Mrs. Bill Burdine May 30.

Mr. and Mrs. Bodie Barnett and son visited Mr. and Mrs. Tommie Pailbeck Sunday afternoon.

Mr. and Mrs. Lee Philbeck and daughter of Danville, Illinois visited his sister, Mrs. Eli Barnett and Mr. Barnett.

Mr. and Mrs. Lee Philbeck and daughter visited his brother, Tommie Philbeck, and family last week.

Mr. and Mrs. Emory Vanzant of Richmond, Indiana and Mr. and Mrs. Eli Barnett visited Mr. and Mrs. Max Phillips and family and Mr. and Mrs. Wayne Reuro in Richmond Monday afternoon.

Mrs. Brenda Harris of Berea visited her grandparents, Mr. and Mrs. Bodie VanWinkle, Sunday afternoon.

Mrs. Ruth VanWinkle and son and Mrs. Hazel Baker and children of Orlando visited Mr. and Mrs. Bodie VanWinkle Tuesday morning.

**HURST REUNION HELD**

The children of the late J.T. Hurst held their annual reunion Sunday, May 30 at the home of Mr. and Mrs. Grover Burton. Those present were: Mr. and Mrs. Burton, their children, Mr. and Mrs. Carroll Cromer, and Darwin, Mr. and Mrs. Lloyd Burton, Doug, Jim and Paula, Mr. and Mrs. W.A. Owens and Mark and Mr. and Mrs. Carl Burton and Alan, all of Cincinnati, Ohio.

Mrs. Julia Ellingsworth of Louisville, Mr. and Mrs. Lewis Hurst and son, Donald Hurst and family and Mr. and Mrs. Jim Taylor, all of Richmond, Indiana; Mr. and Mrs. Jack Nicholson of Indianapolis, Indiana; Mr. and Mrs. Ray Hurst, Mike and Jeff, Miss Lena Hurst of Louisville, Mr. and Mrs. George Hurst and Jeanette of Sarasota, Florida; Charles Hurst of Hamilton, Ohio; Mr. and Mrs. Lawrence Hurst, daughter, Nancy, and grandson, Jarmey, of Indianapolis, Indiana; Mr. and Mrs. Bobby Hurst and daughters, Judy, Brenda and Cathy, of Indianapolis, Indiana.

Others present were: Mr. and Mrs. Frank Smith, Ann and Pat, of Stanford, Pat, Miss Mary Darland and Johnny Thompson, all of Stanford; Miss Diana Malone of Indianapolis, Ind.; Mr. and Mrs. Cecil Thompson and grandchildren, Jill and Jo Martin, Mr. and Mrs. Don Thompson and son, Mr. and Mrs. Ray Hasty and sons, Mr. and Mrs. James Hasty, Willie Hasty and son, Mr. and Mrs. Lloyd Burton and family and Mr. and Mrs. W.A. Owens and Mark spent the week end with their parents, Mr. and Mrs. Grover Burton.

Mr. and Mrs. Edward Burton of Connersville, Indiana are visiting here at Brodhead.

Mr. and Mrs. Joe Long and Sandy of Plainfield, Indiana spent the week end with her parents, Mr. and Mrs. Ray Taylor, and other relatives.

Recent visitors of Mr. and Mrs. Russell Long were Mr. and Mrs. Roscoe Ping and son and Mr. and Mrs. John Berlin and daughter of Plainfield, Indiana and James and Roxie Blair of Florida.

Mr. and Mrs. Grace Woodson is getting alone very well.

Mrs. Ellen Owens is reported improving. We wish her a speedy recovery.

Casper Owens is ill. A speedy recovery is wished for him.

(delayed) Mrs. Ellen Owens has returned home from the Somerset City Hospital and is reported improving.

Mrs. Julia Norton is reported feeling better.

**WHAT ABOUT FUNERAL COSTS?**

A daily newspaper in one of our larger cities has recently published a series of articles in which they claim that the average cost of a funeral is \$915.00. This includes casket, services of the funeral home staff, use of cars and facilities. They did not include, grave equipment or any transportation charges.

We have never been happy being judged by any set of averages. We feel that our service is above average and that the average cost of a funeral is concerned, a few examples of every day costs might help to put funeral cost in the proper perspective.

Let's take an "average" man working an "average" lifetime - the 45 years between the ages of 20 and 65. If this man smokes a pack of cigarettes each day, he will spend \$146.00 per year or \$6,670.00 during those 45 years. If he buys a 10¢ newspaper each morning and each evening and a 25¢ newspaper on Sunday, he will spend \$75.40 per year or \$3,383.00 during those 45 years. If he spends \$10.00 worth of food per week, he will spend \$520.00 per year or \$23,400.00 during those 45 years.

Now we come to the funeral which the daily newspaper says will cost \$915.00. Our "average" man can take out a \$1,000.00 insurance policy at the age of 20 which will cost him \$15.00 per year or \$675.00 for the 45 years period. It begins to look as if the funeral is going to be the least expensive thing he is ever going to purchase.

The obvious reason of increased cost in all phases of our profession have contributed to higher fees. Also, the public has grown to expect the very finest in facilities, vehicles, and service that we can offer. Using economy cars and van trucks for funerals would indeed be refused by today's families.

We value the trust and confidence placed in us by Rockcastle Area families and will continue to do everything possible to uphold that trust.

If you have any questions about funerals or anything pertaining to funerals, please feel free to call us at anytime.

**Good Eating for Everybody... and Good Business for You, Mr. Dairy Farmer**

June is dairy month

Thanks to dairy farmers, dairy foods help everyone eat well, gain needed nutrition, enjoy great flavor. So it's mighty important to keep milk production up. And it's good business!

Thanks to our profit-proved feed, your dairy herd can eat well... and right. We have scientifically-formulated, balanced and blended feeds right for milking cows, dry cows, calves, heifers. Look to us for the feeds you need in your complete feeding program.

*Thank You, Dairy Farmers... It's our privilege to serve you*

## If Utilized Best, Corn Silage Offers More

By: Clay A. Colson, Soil Conservation Service

Corn is an excellent forage producing crop. Corn silage produce more than 1200 pounds of beef or 13,000 pounds of milk per acre from an equivalent yield of 75 bushels of grain.

The quantity and quality of corn forage is available for livestock feed only a short period of time unless some method of storage is practiced. Corn harvested in the form of silage is an efficient way of utilizing a crop of corn for cattle feeding. Corn, unlike many other forage plants, has leaves and stems as well as grain that is highly digestible if utilized at the right stage of maturity. Corn harvested at the right time and properly stored as silage will provide high quality forage.

Several management factors influence silage quality. The beginning is a good crop of corn. It should be allowed to mature until the moisture content has reduced to at least 70 percent. Present knowledge of silage making indicates that the average dry matter content of silage should be about 35 percent. Thirty-five per-

BIG FISH—Carolyn Cameron of Mt. Vernon made quite a haul recently at a public fishing lake near Berea when she bagged the twenty-eight pound catfish she is shown holding in the above photo.

## Make Your Dairy Dollars Jump

Keep your dairy herd down to earth, of course—but plan your feeding program so milk production will "shoot for the moon." We're here to help with scientifically developed, vitamin-enriched high protein feeds to meet the special needs of calves, heifers, dry cows or milkers. Trust to us to keep milk production up with modern, milk-making feeds.

Thanks, Dairy Farmers, for bringing us some of the best foods on earth—dairy products.

**Burton's**  
Feed & Supply  
Willalls, Ky.

make silage takes about 20 days. Silos should be filled, packed and sealed as rapidly as possible. Exposure to air causes unfavorable chemical reaction to take place in the chopped material. These unfavorable chemical reactions lower silage quality and animal performance. Strong odors and molds develop to improperly stored silage. This reduces the amount of the forage consumed by cows. Corn silage that is harvested at approximately 95 percent dry matter, cut from 1/4 to 1/2 inch in length, packed in the silo in a short period of time and sealed from the air will produce a high quality forage. High quality corn silage is usually light green to yellow in color, has appealing vinegary odor, tissues are firm and has a sharp acid taste with a pH of 4 to 4.5.

## Corn, Hay, Pasture and Conservation, Using No-Till

Clayton A. Colson  
Conservation Agronomist  
Soil Conservation Service

corn and other row crops without cultivation? Yes, this has been going on in Kentucky for several years. This is the method called "no-till" that has gained widespread approval across Kentucky in production of corn and soybeans mainly, along with a few other crops.

By this no-till method, the field is sprayed with chemicals to prohibit weed and grass growth. The grain is planted in either stalk fields or in fields, without any other land preparation.

Soil and water conservation and no-till planting go hand-in-hand. No soil is turned up to wash away, a mulch cover is provided for the surface to break up the rainfall and organic matter helps in soaking up the rainfall.

The use of no-till farming in the production of row crops is a very effective tool for the conservation of soil and water. Complimentary practices such as planting across the slope of the land, leaving grass in the waterways, and the production and management of crop residue for year round soil mulch adds to the practice of no-till that makes it a natural for people who are conservation minded to use for the production of crops.

### Control Factors

Some of the factors that make no-till farming a good erosion control practice are: (1) Soil particles must be detached from one another before water can transport the particles down the hill, no-till planting leaves the soil intact, therefore no natural resel-

grain (aerial seeded in September), and established to pasture by seeding grass and legume with wheat or over-seeding the grass and legume in January.

The preceding rotations can be completed without preparing a conventional seed-bed, and with leaving whatever crop residues the farmer desires on the soil surface.

Much too often farmers spray on across the waterways when planting no-till crops. This creates an area very subject to erosion and also a wet area without soil which is a very likely place for machinery to get stuck when harvesting the crops.

Crop residues such as corn stalks, wheat straw, soybean residue, etc., should be well mixed and kept on the soil surface throughout the year so they can contribute fully to the conservation of soil and water. Management of crop residue should provide for good cover of the soil through the year.

### ROYAL SUNDAE-BEST CAKE

CAKE:  
1 package (18 1/2 oz.) white cake mix  
1 pint vanilla ice cream  
1/2 cup water  
3 eggs  
TOPPING:  
1 package (8 1/2 oz.) white frosting mix  
1/2 cup water  
1/2 cup miniature marshmallows  
Chocolate or strawberry ice cream

To prepare cake: In large mixing bowl blend cake mix, vanilla ice cream, water and eggs at medium speed until ingredients are moistened. Beat 2 minutes at medium speed. Turn into a well-buttered and lightly floured 12-cup bundt pan. Bake in a preheated 325° oven 45-55 minutes. Cool in pan on wire rack 5 minutes; remove from pan to wire rack to cool completely.

To prepare topping: In a small mixing bowl place frosting mix, "Bring water and marshmallows to boiling; add to frosting mix. Beat at high speed 3-4 minutes or until desired consistency. Serve cake slices topped with scoop of chocolate or strawberry ice cream and marshmallow topping.

Frosty milk drinks make ideal coolers for fun- and fun-filled parties.

## Our Environment

By: Harold Ballinger

One of the big concerns of agriculture today is environmental quality or pollution control. The effort to clean up our environment and to keep it clean must be done at whatever the cost. But let us think of the benefits to us as individuals.

After thinking about it for a while, you will probably agree that the conservation-minded person is often the prosperous person, while the person with less concern for the environment is losing a lot of benefits because he is wasting and despoiling the countryside.

Here's a list of practices that will improve the environment and at the same time give you pride and satisfaction in doing them.

1. Prevent soil erosion. Did you notice how muddy the creeks and streams were after those heavy rains in

early May? Our soil was being carried away by those rushing waters.

The best way to prevent this kind of water pollution and soil loss is to practice good conservation methods. There are a number of conservation practices that each of us can perform to prevent soil erosion. By sowing grasses and legumes, contour row cropping, sod planting, and sod waterways, setting trees, and water impoundment facilities are things that can be done to prevent soil erosion.

2. Clean up rubbish. Beautification of the countryside improves environmental quality from an aesthetic point of view. Perhaps the abandoned and junk behind the house or barn don't bother you. But cleanup might bring a surprising reduction in the rat population. The rubbish pile could be more than an eyesore. It could be occupying land where

a building, driveway or cattle lot would be of much greater value. And any active dump where empty cans, insect sprays and fertilizer bags accumulate is always a potential hazard to a prize dairy cow, a little child or a child that might be exploring.

3. Keep the air fresh. Smoke from burning leaves and brush and offensive odors from spreading manure on the land might not seem important in the wide open spaces, but near the neighbor's house or near urban areas are of utmost importance. This might require a little extra effort on our part having the brush and rubbish hauled away and spreading of manure just prior to plowing.

4. Leave some land in the wild state. Woodlots, marshes or fence rows in their natural state enhance the environment for wildlife and beautify the countryside. That pair of quail which just walked across the meadow have to have some place to hide and feed.

An unsharpened farm forest (Cont. To 14)
