The Mt. Vernon Signal Thursday, August 31, 1978 P-5 **Legislative Report**

By Rep. Harold Demarcus

As stated last week, the 1978
General Assembly emacted 33 resolutions for the purpose of conducting research into a rarea or Jopies that will be interpreted by the legislators in order to pass laws that are competent and well thought out. Today, I whould like to discuss resolutions which carry large amounts of appropriated funds to be used in the conduction of their research.

Appropriated for this study is \$30,000.
House-Joint Resolution 88, creates a
task force to study Kentucky's legal

The task force will address itself to
district and circuit judges should be

of court staffs and would Kentucky be
better off if it provided full time
prosecuting attorneys. The resolution
appropriates \$100,000 for this study.

Senate Joint Resolution 5, directs the Kentucky Historical Society to publish research about historical black families in Kentucky. \$25,000 is appropriated for the project.

House Joint Resolution 19, establishes a 32 member local government statute revision commission to review the laws regarding local government units, and continue to survey the new resulting the properties of the second o

Some of these studies will provide good pieces of legislation for the 1990 wissin. Some of these studies may provide very little. It is very easy for such previets to result in waste, especially if the studies themselves are questionable. The \$800,000 allocation for 31 resolutions is by not means a pittaney perhaps the taxpayer will receive beneficial results. At any rate, the final inspection will reulminate in the laws that are enacted in 1980.

Mortgage Interest VS Equity

It is true that owning a home builds a dollar-value equity for you as you pay off the mortage. How much of your monthly payment goes to paying off the principal and how must goes to pay off the interest is another story. The outcome depends on how long, you have been making payments.

payments.

Inasmuch as most mortgages are self-liquidating loans, you will pay a level amount each month toward paying off the interest and reduction of principal. However, remember that the interest is first computed on the balasses due and therefore the first payment is practically all interest and lasy payment is practically all interest and lasy payment is practically all

equal.

The one saving grace in the early years of high interest payments, is that all of this interest is tax deductible which can be a hefty deduction indeed.
