There are three insecticides that are registered for control of white grubs-tricilorfon (sold under the trade name of Dylox and Proxol), chloppyrifus (sold under the trade name of Dorsban), and diazinon (trade names Diazinon and Spectricide). Diazinon has given the most consistent satisfactory results in Kentucky tests. Milky spore disease is effective only against the white grubs of Japanese beetles. The most prevalent white grub in Kentucky lawns are the grubs of masked chafers, even in areas where adult Japanese beetles are a problem. Ento-mologists, warn that it is not onthwhile fo use milky disease spores unless you are sure the grubs are Japanese bettle grubs.

Still, the big Dominican would fit well into a UK lineup with 68* All-American Kenny Walker on one side of the lane and Mr. Workhorse Winston Bennett on the other. Horford the rockie might figure into an early platon system with Robert Locke and Cedinc Jerkins as backup.

The event is opened to everyone who wishes to help support the fight against Cystic Fibrosis, which among gengtic diseases, is the leading cause of death in children and young

adults. Youngsters with Cystic Fibrosis may be smaller than other children, tire more easily and be frequently out of breath. They have persistent coughs, but the

illness is not contagious.

Cystic Fibrosis is an able, lung-damaging and digestive disease. Although there is yet no cure for Cystic Fibrosis, earlier diagnosis and more effective treatment now mean that about half of the children born loday with Cystic Fibrosis can be expected to live past the age of 20-once such children never lived to start

school.

Every year of research added more than one year to the average life expectancy of a Cystic Fibrosis child during the past ten years. Funds from this event will help to insure continued research.

The Cystic Eibrosis Founda-

tion (C.F.F.). established in 1955, is a non-profit voluntary health organization, dedicated to improving the outlook for the Cystic Fibrosis patient.
